Where shown, (s) = Physical unit value less than 0.5 or Btu value less than 0.05.

Notes: · Although there is biodiesel use in other sectors, all biodiesel consumption is assigned to the transportation sector. · Biodiesel blended into diesel, which is accounted for under distillate fuel oil, is shown separately in this table to display the use of renewable energy. Because of differences in data sources and estimation methods, the ratio of

biodiesel consumption and distillate fuel oil consumption should not be interpreted as the average biodiesel blend ratio. · Totals may not equal sum of components due to independent rounding.
