Administration

# Monthly Biodiesel Production Report

With data for July 2016

September 2016

This report was prepared by the U.S. Energy Information Administration (EIA), the statistical and analytical agency within the U.S. Department of Energy. By law, EIA's data, analyses, and forecasts are independent of approval by any other officer or employee of the United States Government. The views in this report therefore should not be construed as representing those of the Department of Energy or other Federal agencies.

---

## Biodiesel Highlights and Background, Data for July 2016

### *Highlights*

**Production** – U.S. production of biodiesel was 140 million gallons in July 2016. Biodiesel production during July 2016 was 5 million gallons higher than production in June 2016. Biodiesel production from the Midwest region (Petroleum Administration for Defense District 2) accounted for 69 percent of the United States total. Production came from 94 biodiesel plants with capacity of 2.1 billion gallons per year.

**Sales** – Producer sales of biodiesel during July 2016 included 79 million gallons sold as B100 (100% biodiesel) and an additional 60 million gallons of B100 sold in biodiesel blends with diesel fuel derived from petroleum.

**Feedstocks** – There were a total of 1,025 million pounds of feedstocks used to produce biodiesel in July 2016. Soybean oil remained the largest biodiesel feedstock during July 2016 with 536 million pounds consumed.

### *Background*

The Monthly Biodiesel Production Report provides data on operations of the U.S. biodiesel industry as part of EIA's response to section 1508 of the Energy Policy Act of 2005 which directed EIA to publish information on renewable fuels including biodiesel. Data are provided for the U.S. and in selected cases by state and region.

The source of data is [Form EIA-22M Monthly Biodiesel Production Survey](#), used to collect the following information from registered producers of biodiesel.

- plant location, operating status, and annual production capacity
- production of 100% biodiesel (B100)
- biodiesel coproduct production
- stocks
- feedstock, alcohol input, and catalysts used in biodiesel production
- sales of B100 and blended biodiesel from producing plants
- sales of biodiesel to end-users

Form EIA-22M provides data necessary to monitor growth of the biodiesel industry in order to allow Congress to assess whether objectives of Section 503 of the Energy Policy Act of 1992 and Section 1508 of the Energy Policy Act of 2005 are being achieved.
