s = Absolute percentage less than 0.05 or value is less than 0.5 of the table metric.

<sup>1</sup> Mines that produce coal using shortwall, scoop loading, hand loading, or other methods.

Notes: Recoverable coal reserves at producing mines represent the quantity of coal that can be recovered (i.e. mined) from existing coal reserves at reporting mines. Excludes mines producing less than 50,000 short tons, which are not required to provide data and refuse recovery.
