Jinta Region	Wisconsin		* *						

Notes: Rates are based on a weighted average of the difference between the commodity cost and total delivered cost of coal shipments to plants in the electric power sector. In addition, the rates are based on the primary transport mode selected by a plant's owner or operator so may include other secondary or tertiary modes. Values are presented in 2022 dollars. For the composition of coal basins, refer to the definition of "coal-producing regions" in EIA's glossary at www.eia.gov/tools/glossary.

W = Withheld to avoid disclosure of individual company data.

Table 3a. Average Annual Coal Transportation Costs from Coal Basin to State by Truck (2022 dollars per ton)
