**Notes:**
- ² Stock change includes refinery and net inputs, stock change by sulfur content, and distillate fuel oil.
- ³ Distillate stocks located in the ‘Northeast Reserve’ are excluded. For details see Appendix D.

**Adjustments:**
- ¹ Includes an adjustment for crude oil, previously referred to as ‘Unaccounted For Crude Oil.’ Also included is an adjustment for motor gasoline blending components, fuel ethanol, and distillate fuel oil. See Appendix B, Note 2C for a detailed explanation of these adjustments.
- ² A negative number indicates a decrease in stocks and a positive number indicates an increase in stocks.
- ³ Distillate stocks with sulfur greater than 15 ppm to 500 ppm may include distillate fuel oil with sulfur content 15 ppm and under due to product detail limitations in the exports data received from the U.S. Census Bureau.

**Exports:**
- Total residual fuel oil ending stocks and stock change include stocks held at pipelines. Residual fuel oil ending stocks and stock change by sulfur content exclude pipeline stocks. Therefore, the sum of residual fuel oil ending stocks and stock change by sulfur content may not equal total residual fuel oil ending stocks and stock change.
