## Introduction

### 1.1 Purpose and Functions

The EIA-176 Query System is a PC-based system for users to produce reports and extract data from the EIA-176 database that is used to produce the *Natural Gas Annual*. Its purpose is to provide users with company-level data. This information is available in a format similar to the survey form for individual companies, as well as in files suitable for tabular calculation.

The query system has two functions. • The first is to provide individual company responses in a form that resembles the EIA-176 survey form. This is viewable on-line, and available in a printed form. Appendix A shows a sample EIA-176 form. Each respondent is available in the year they reported data on the form EIA-176.

- The second function is to provide files of EIA-176 data for use with other software packages. The query system provides two methods to obtain tabular data. (1) a set of 24 pre-selected queries. The information in these queries was designed to satisfy the bulk of data requests received by the EIA. Appendix B outlines the pre-selected queries and their data items. And;

(2) The second method is for user-selected queries. These queries offer users the ability to access sets of data items not included in the pre-specified queries. Appendix C outlines the available data items. Data in the pre-selected and user-selected queries includes adjustment entries made by EIA staff to ensure that EIA-176 and publication data balance.

Data sets from both query methods can be saved to separate files in a variety of popular formats that include: text, comma-delimited for spreadsheets, SDF files for use with dBase, and fixed width format for use in other software packages.

New in the pre-selected query section is a report of Name/Address data, a report detailing individual company items shown in the continuation pages of the form, and LNG activity.

## 1.2 Hardware and Software Requirements

The minimum hardware requirements needed to install and use the EIA-176 Query System are:

- An IBM-compatible personal computer (PC) – minimum Pentium 75 is suggested and 24 MB of RAM
- The Windows operating system 95, 98, 2000, XP or NT –4.0 Service Pack 3 or later\*
- Internet Explorer 5.0 or higher
- An 80-column monitor
- 15 MB of hard-drive space

\* - See the 'Getting Started' document for notes about installing and using the EIA-176 Query system with Access 2003.

## 2.0 Installing the Query System

### 2.1 Installing the EIA-176 Query System

To install the EIA-176 Query System on your PC:

- 1) Download the software from the EIA web site.
- 2) Open Windows Explorer and find the file. The name will depend on which version was selected. All executables will begin with **EIA176Qry**. The rest of the name will indicate the version of Access that was selected.
- 3) Double click on the file **EIA176Qry...exe** and follow the instructions.
- 4) As the installation begins, a 'Welcome' screen is displayed. Click the 'Next' button to continue.
- 5) The 'Select Destination Directory' screen will be displayed. Click the 'Next' button if you wish to continue the installation to the default directory – C:\Program Files\EIA176Qry. If you wish to change the default directory, click the 'Browse' button.
- 6) The 'Ready to Install' screen will be displayed. To continue with the installation click on the 'Next' button.
- 7) A progress bar will appear.
- 8) When the installation is completed the 'Installation Completed' screen will be displayed.

Note: In some instances you will be prompted to re-start you computer to complete the installation. This is normal and can be done immediately to use the query system, or later if so desired.

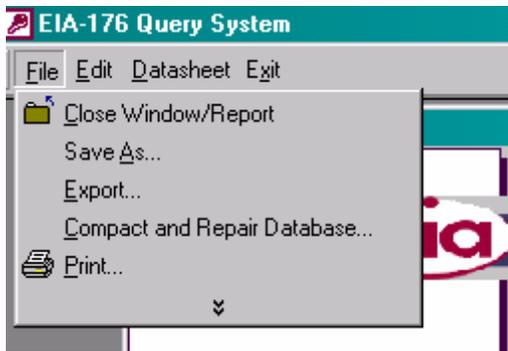

### 2.2 Starting the EIA-176 Query System

The query installation program creates a program group and a desktop icon for the EIA-176 Query System. The desktop icon starts the query system up immediately and appears on the desktop after the install program runs.

### 2.3 Compressing the File for best performance

The program group, which is available through the START menu has the EIA-176 Query System icon, as well as an option to Optimize (Compact and Repair) the query system. If you run a lot of queries and get unpredictable behavior from the application you should optimize the database.

The Optimize option should be run periodically so that the query database does not become fragmented. In the Access 2000 version the compact and repair option is available from the File Menu.

In Access 2000 or above run the Compact and Repair from the File menu.

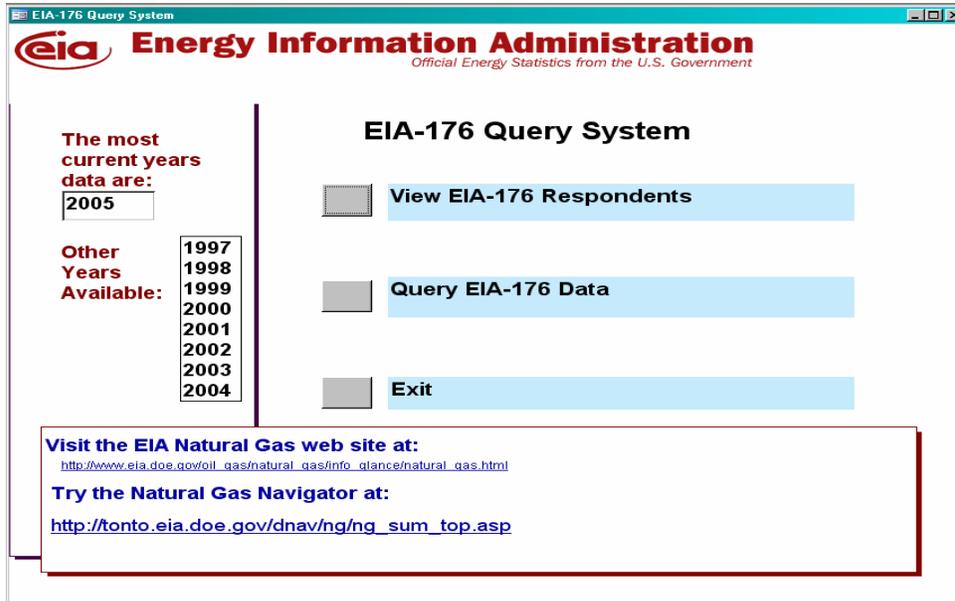

In the Access 97 version use the Optimize Database option from the Program Group to repair the database.

### 3.0 Using the Query System

After a successful installation you can use the query system to print off individual company submissions or to generate data files from your Windows desktop by clicking the **START** button, then the **Programs** button. If you are using Access 2003 please see the "Getting Started" document for a description of some warning screens you may encounter. Select the EIA Applications items, and then click EIA-176 Query, and the Main Menu Screen of the query system is displayed, as show below:

#### 3.1 Main Menu

The three main options available in the EIA-176 Query system are accessed via this menu. They are:

- 1) View EIA-176 Respondents: Click this to choose individual respondents and view or print their submissions
- 2) Query EIA-176 Data: Click this to choose pre-selected or user selected queries which will allow the user to save data to PC-compatible files
- 3) Exit: This ends the EIA-176 query.

**Each option is described in the sections that follow.**

## 3.2 View EIA-176 Respondent

### 3.2.1 Select a Company

After clicking the **View EIA-176 Respondents** button on the **Main Menu**, the following **Choose EIA-176 Company Screen** is displayed.

- 1) Select the report year first.
- 2) Select the retrieval method

If you select a company by name you will see a list of EIA-176 company names. If you select a company in a state you will get a list of states. The companies will appear after you select a state.

#### 3.2.1.1 Select a Company in a State

If you Select a **Company in a State** you'll see a list of states

Highlight the state(s) you want and use the single right pointing arrow  located in-between the two white boxes to move the state to the selected box.

To unselect a state use highlight it in the selected (leftmost) box and use the single left pointing arrow  to move the state out of the selected box.

Once you've selected a state click on the Select Company button to see available companies

**Select Company**

within that state.

Use the mouse to select the company you want to view in the Companies available box. Click the right pointing arrow to move it to the selected box on the right.

### 3.2.1.2 Select a Company by Name

**View EIA-176 Respondents - Choose EIA-176 Company(s)**

Please enter a report year:

1997  
1998  
1999  
2000  
2001  
2002  
2003  
2004  
2005

Choose a retrieval method

Select a Company in a State

Select a Company by Name

Select Respondent Name

**Companies Available**

AZ	ADJUSTMENT P L CO

Print Selections

<=Back

*Use the arrow buttons to select a state or company.*

El Paso Natural Gas has been selected.

### 3.3.2 View and Print EIA-176 Respondent Submission

**View =>**

To view the submissions click the **View=>** button.

**Print Selections**

To print the submission without previewing it click the **Print Selection** button.

View Respondent result – Preview screen

OMB No. 1905-0175  
Expiration Date: 12/31/2008  
Version No.: 2006.01

**ANNUAL REPORT OF NATURAL AND SUPPLEMENTAL GAS SUPPLY AND DISPOSITION**  
**FORM EIA-176**  
**REPORT YEAR 2005**

This report is mandatory under the Federal Energy Administration Act of 1974 (Public Law 93-274). For the provisions concerning the confidentiality of information and sanctions statements, see instructions.  
**Title 18 USC makes it a criminal offense for any person knowingly and willingly to make to any Agency or Department of the United States any false, fictitious, or fraudulent statements as to any matter within its jurisdiction.**

Part 1. RESPONDENT IDENTIFICATION	Part 2. SUBMISSION INFORMATION
<p>Enter the name and mailing address to the company filing the EIA-176</p> <p><b>EIA ID Number</b> 17603864</p> <p><b>Company Name:</b> EL PASO NATURAL GAS COMPANY</p> <p><b>Operations in (State):</b> AZ</p>	<p>A completed form must be filed by March 1</p> <p>Forms may be submitted using one of the following methods:</p> <p><b>Mail to:</b> ATTN: EIA-176 Energy Information Administration, EIA-45 U.S. Department of Energy P.O. Box 8279 Silver Spring, MD 20907</p> <p><b>Email:</b> OIG.SURVEYS@eia.doe.gov</p> <p><b>Fax:</b> (202) 586-1076</p> <p><b>Secure File Transfer:</b> <a href="https://ido.eia.doe.gov/upload/ndt/oeoog.jsp">https://ido.eia.doe.gov/upload/ndt/oeoog.jsp</a></p> <p><b>Questions?</b> Call: 1(877)800-5261</p>

You can maximize the preview screen by clicking on the resize button in the upper right corner.

You can view subsequent pages of the preview screen by clicking the navigation buttons at the bottom of the screen.

The right pointing arrow > takes you to later pages.

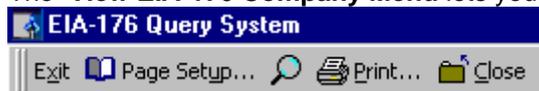

The right arrow with the bar >| takes you to the last page.

The left pointing arrow < takes you to earlier pages.

The left arrow with the bar |< takes you to the first page.

### 3.2.2.1 View EIA-176 Company Menu

The **View EIA-176 Company Menu** lets you control this display.

- Exit** – Closes this application.
- Page Setup...** – Allow you to choose a printer and set the page orientation (portrait works best).
- Changes the magnification of the report.
- Print...** – Sends the report to the printer.
- Close** – Closes this report and either shows the next report if you've selected more than one, or returns you to the Choose Company screen.

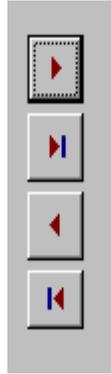

Once you've returned to the Choose Company Menu you can exit this function by clicking on the **<=Return** button.

This will return you to the Main Menu.

### 3.2.2.2 Choose Company Arrow Functions

Below is a summary of what the arrow buttons in the Choose an EIA-176 Company do:

Moves the highlighted item in the left box to the right box.

Move all the items in the left box to the right box.

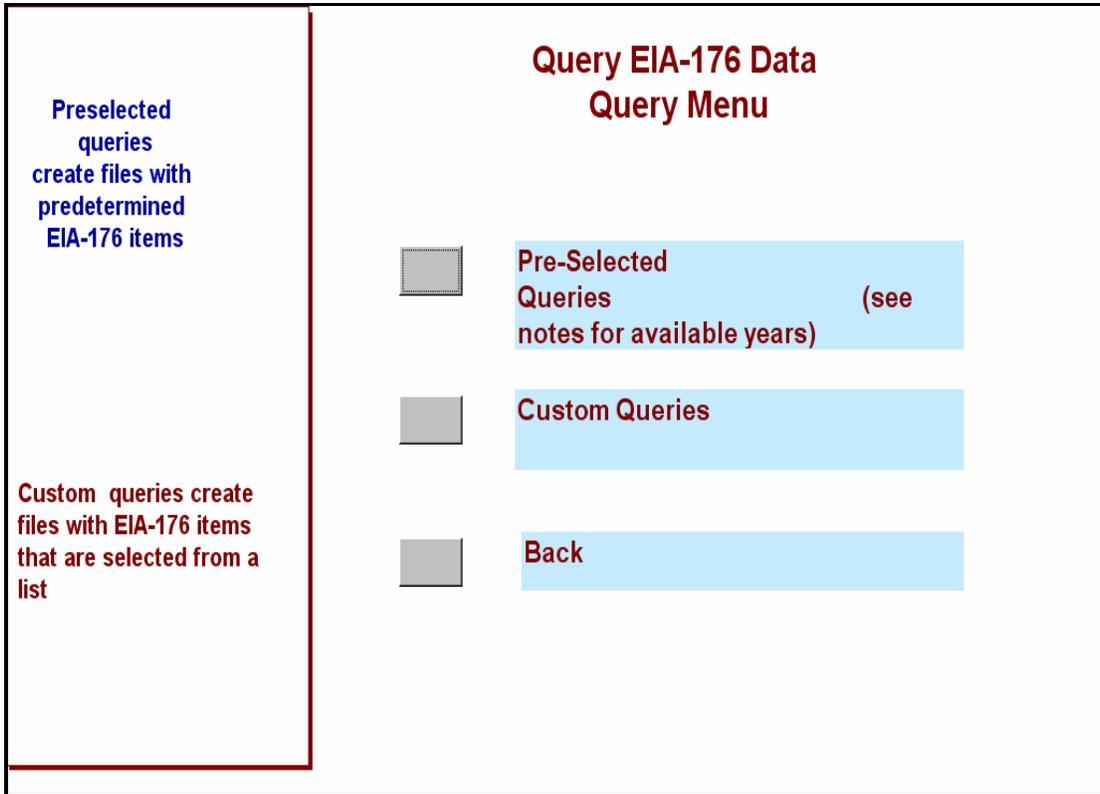

Moves the highlighted item in the right box to the left box.

Move all the items (highlighted or not) from the right box to the left box.

### 3.3 Query EIA-176 Data

To view, select the **Query Menu** from the **Main Menu**.

There are two query options: Pre-selected, and User-selected.

The **Pre-selected Queries** option offers 24 queries that can be run on all or selected companies. The queries and the data items they include are detailed in Appendix B.

The **User-selected Queries** option allows users to select other EIA-176 data items for inclusion in data fields. They have a structured format. The rows will always be EIA-176 companies; users may select column data values.

The following sections will describe these two options.

#### 3.3.1 Pre-Selected Queries

Pre-selected queries are queries whose conditions have already been created. These queries save the user the trouble of having to set the desired conditions each time he/she wishes to run the pre-set query.

The following pre-set queries are available:

Sorted by:

- State
- Volumes by sector (sales + transported)
- Prices by sector
- Rankings, by volume, national, and within States
- Type of Operations

Other:

Detailed data on continuation lines.

The first step in the pre-selected queries is to choose the year and company(s) you want to query.

### 3.3.1.1 Select a Company Screen

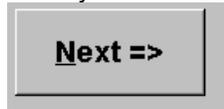

The Select Company screen for the queries is quite similar to that described in the View Respondent option which is described in section 3.3.1.

Begin by selecting a year in the 'Please enter a report year:'.

You can select EIA-176 companies to include in your queries. If you want all companies choose the **Select All Companies** option, this retrieval method does not appear on the View Respondents menu. This will close this screen and go to the select queries screen.

The same white boxes that were used in the view respondent data are used here. If you **Select a Company in a State** you'll see a list of states to choose from.

Once you've made your selections click the Next=> button to select a query to run.

A detailed description of each pre-selected query can be obtained by highlighting the query title. The description appears in the box titled Query Description. The units the query will display in are shown in the Query Units box.

Once you've selected a query by highlighting it, click the Run Query=> button to execute the query.

The status bar is displayed at the bottom of the screen while the query is running. Some queries take a few moments to be displayed.

The screenshot shows the EIA-176 Query System interface. At the top, a status bar indicates 'Running query' with a progress indicator. Below this is a table titled 'Select a Query to Run' for the year 2005. The table lists various companies and their associated volumes. At the bottom of the interface, there are navigation buttons: '<=Back' and 'Run Query =>'. A text box on the right explains the query units: 'Query Units: Volumes are in MCF - 1,000 cubic feet @ 14.73 psia and 60 degrees F.'

CompanyID	COMPANYNAME	ST	YEAR	ResVolMcf	TRVolMcf	ComVolMcf	ComCo\$t	It

Query output is displayed in a grid on your screen.

### 3.3.1.3 EIA-176 Query Menu Functions

Menu items at the top of the screen are used to filter output, or export to other data formats.

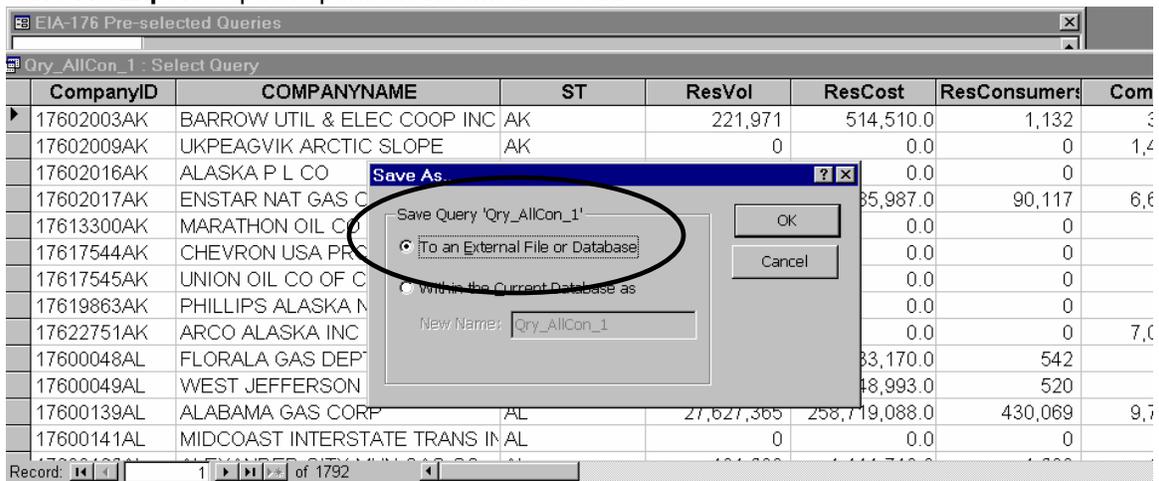

#### File

- Close – Closes the query grid.
- Save As/Export – Saves the data to another file
- Page Setup – lets you choose print settings
- Print Preview – Shows what a printout will look like
- Exit – Quits the Query system.

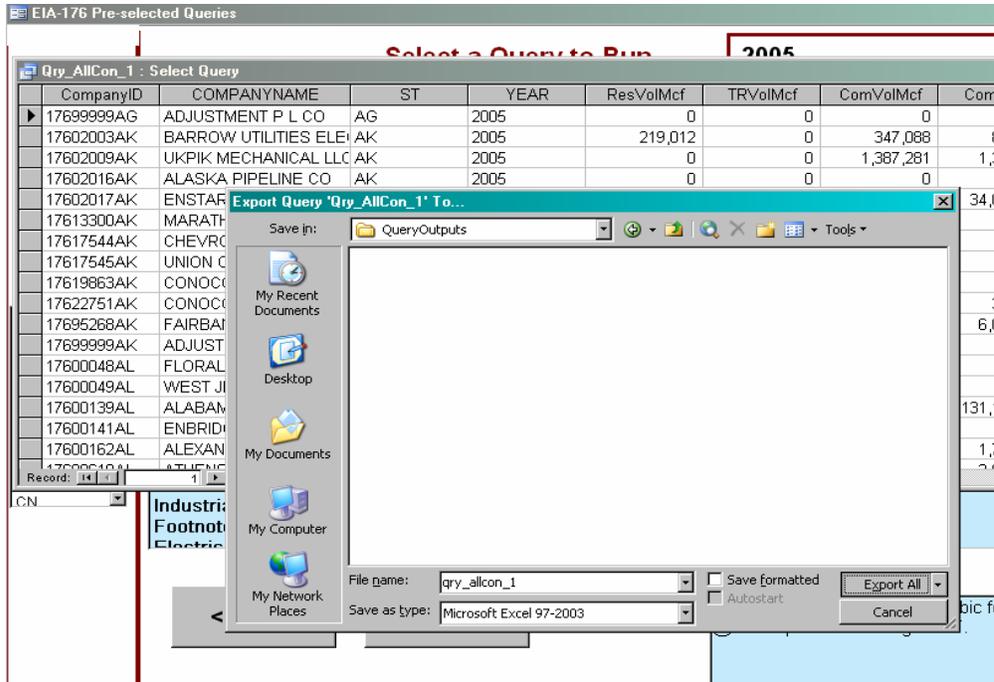

**Close** – Exits the select query window.

**Save As/Export** - option opens an intermediate box.

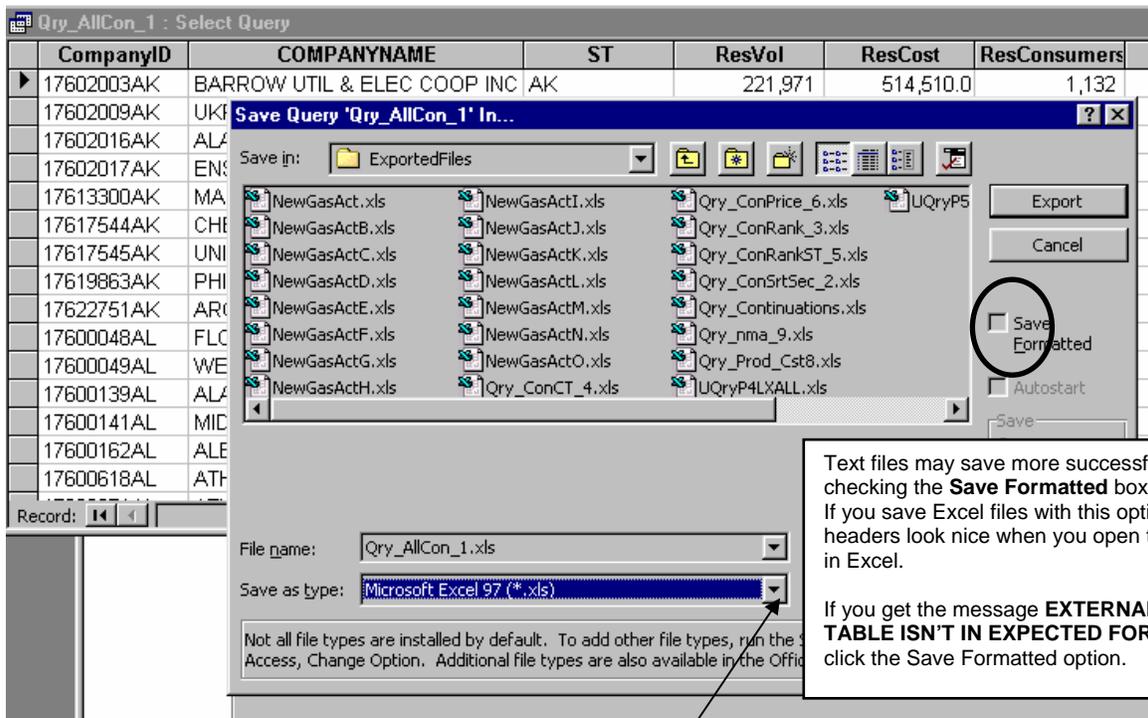

After you choose this option you will be presented with an initial **'Save As'** dialog box. Select the **'To an External File or Database'** option, and click the OK button. You will not be able to access your file if you choose the **'Within the Current Database'** option.

**Note:** This will look a little different depending on the version of MS Access that you are using. Under Windows XP and Access 2002 the Export screen will look as follows:

Next you will be presented with a Windows dialog box. Headers may look better when you select Save Formatted. You can put your own name into the File Name box.

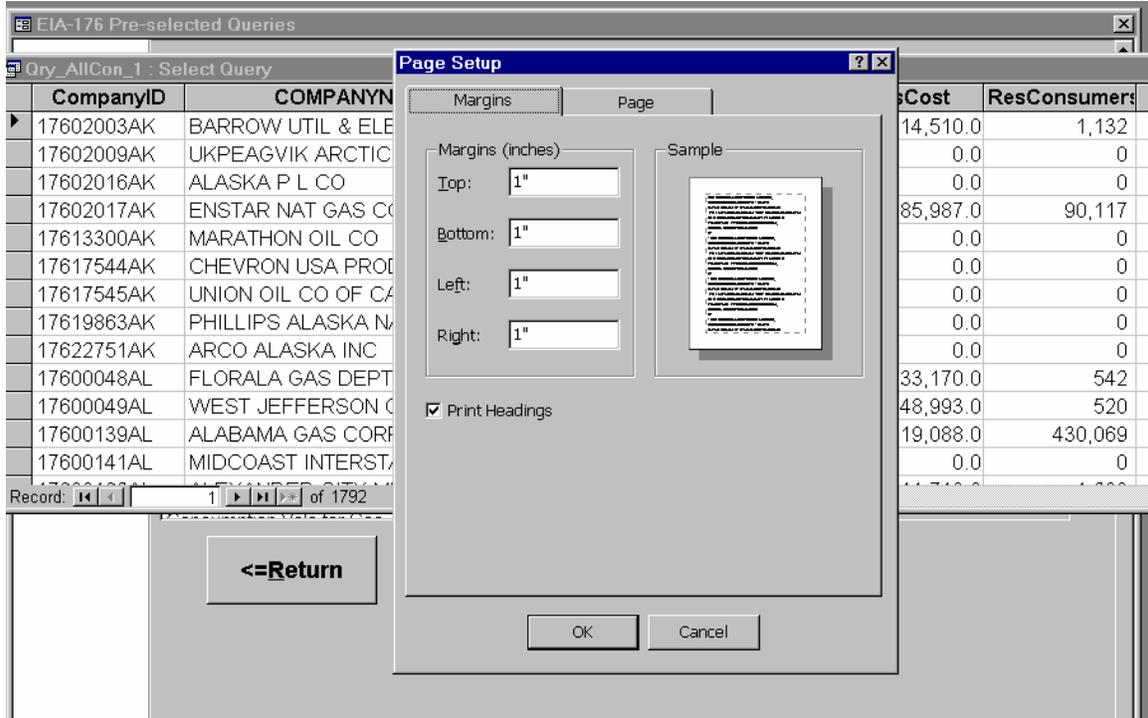

Different file type options are available by pulling down the 'Save as File Type' list box as shown. By scrolling down the list of available file types you can choose dBase formats also. Once you've named your file and selected the file type to save as click the Export button to finish

the operation. Export

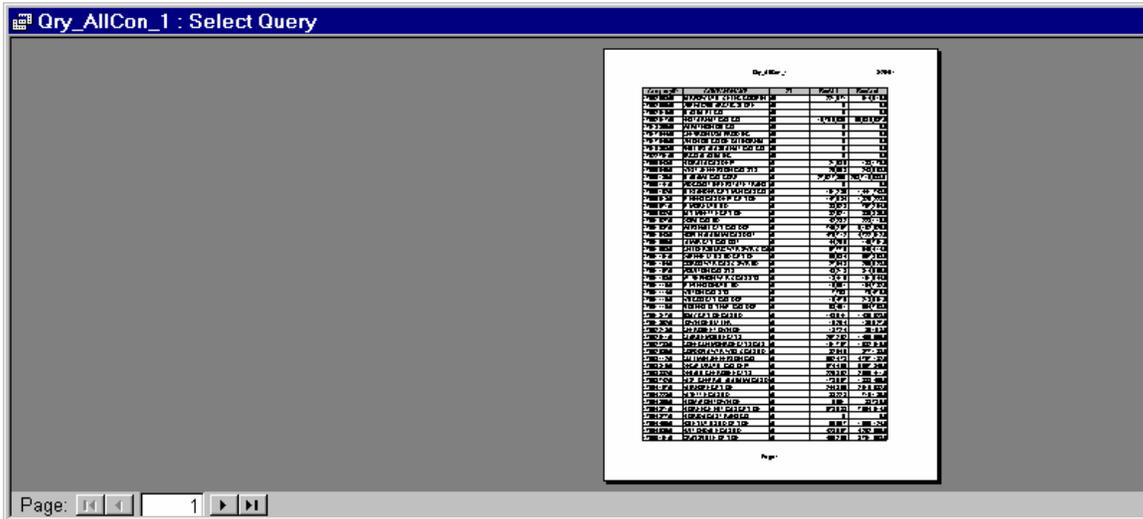

**Page Setup**

This option lets you set print settings and page orientation.

Most query output looks best with the print orientation Landscape. This can be selected from the Page tab.

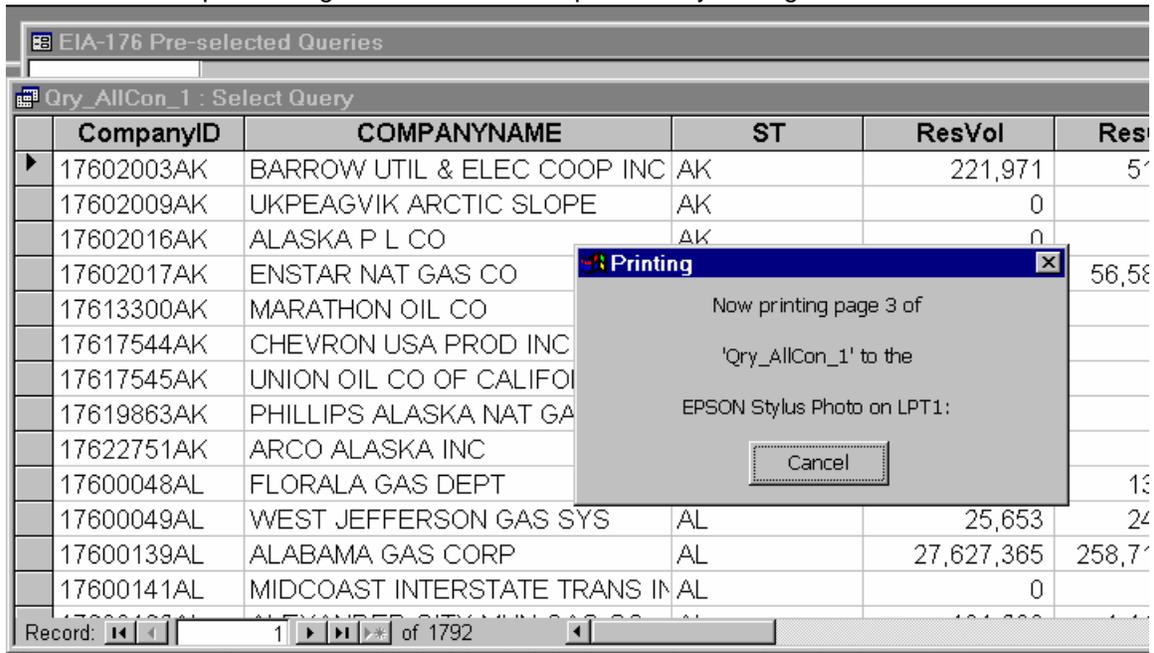

Print Preview

The Print Preview buttons lets you see what the printout will look like.

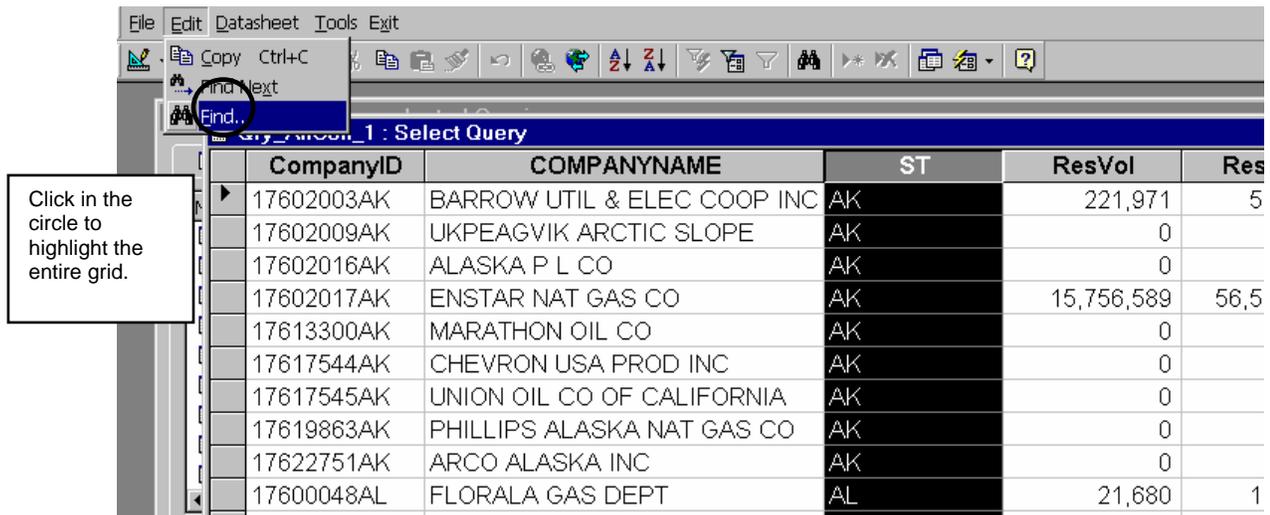

Print

The Print button prints the grid off. Some of the queries may be large.

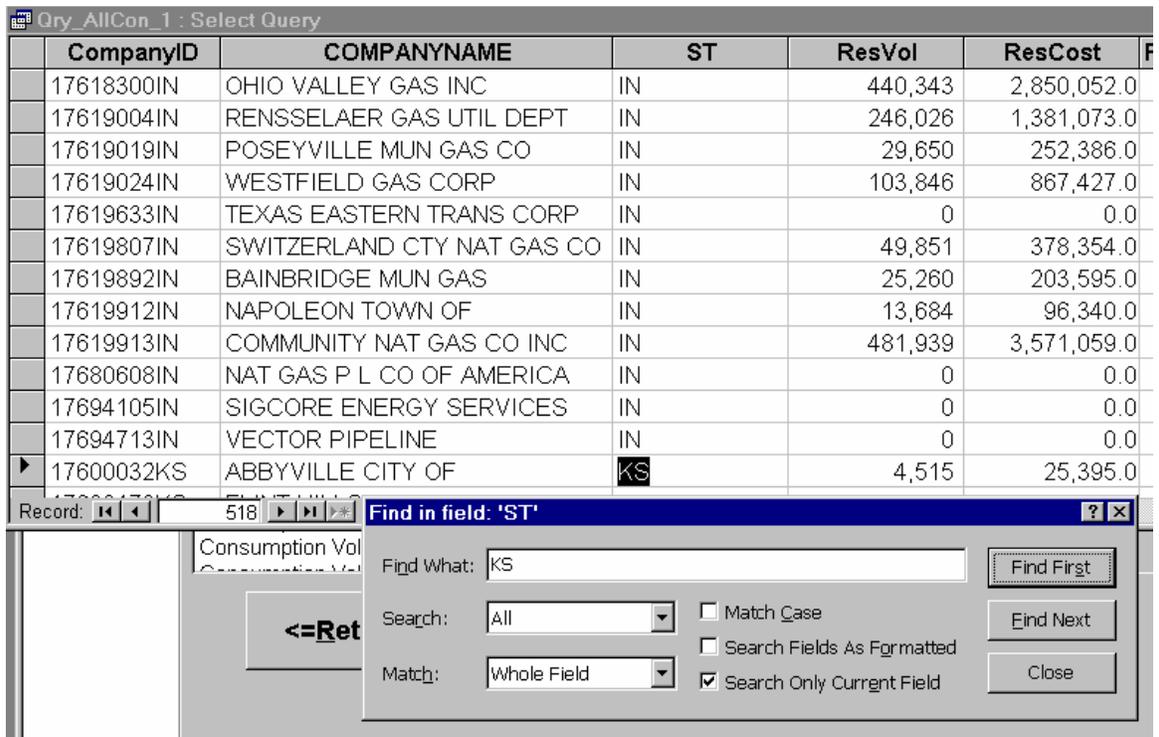

To use the Copy option the grid or column needs to be highlighted. The entire grid can be highlighted by clicking in the upper left corner (circled). Individual columns can be highlighted by clicking in the column header.

To use Find, select just one column by clicking on the column header. The ST column is highlighted in this example.

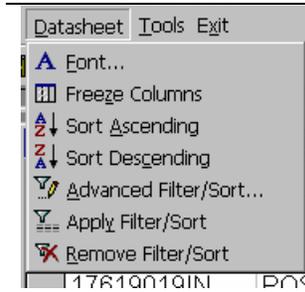

With the column selected pull down the Edit menu and click on the Find option.

A dialog box will appear. Enter the value you wish to search for. After you've centered the value you want to find click either Find First, or Find Next. The grid will advance to the found value or tell you that no values exist.

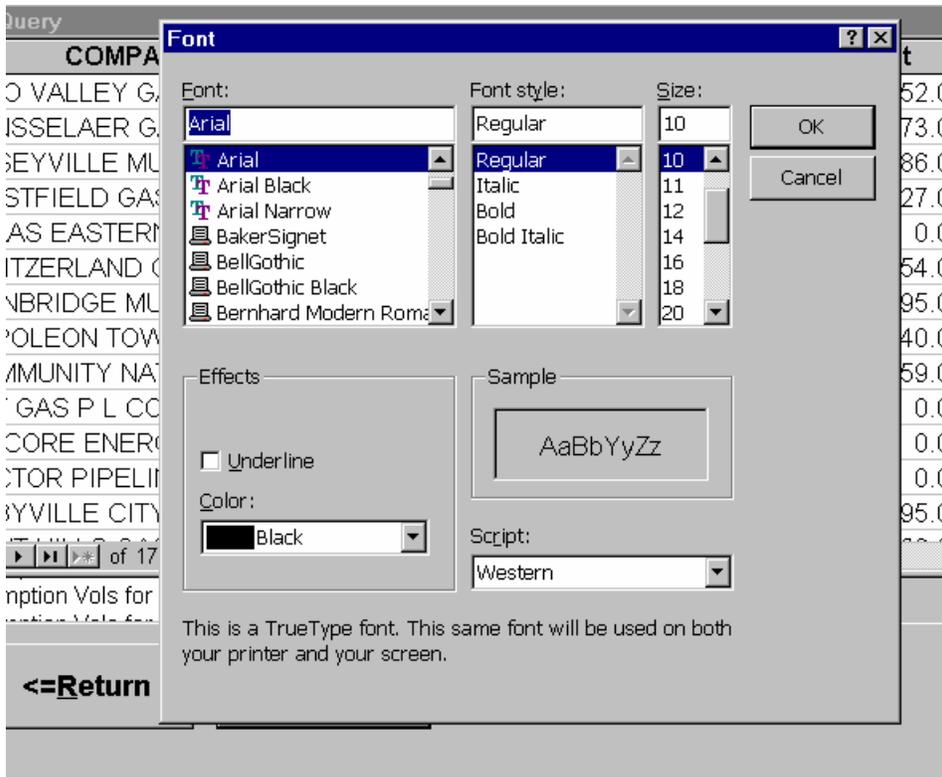

**Datasheet**

Font - adjusts the type in the grid  
Freeze columns -makes the frozen column always appear  
Sort Ascending/Descending - sorts the data in the grid by the selected column  
Advanced Filter - lets you enter some simple criteria for data in the query.  
Apply Filter - is used in conjunction with Advanced Filter  
Remove Filter/Sort – removed the Applied Filter

Datasheet items allow you to manipulate the query that you've run.

The **Font** menu item changes the font of the data in the grid.

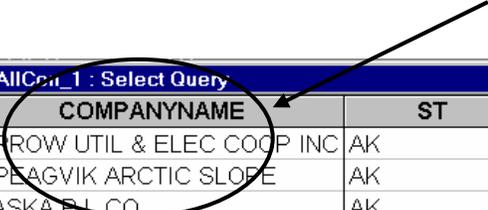

In this example, selecting Bold turns all the items bold.

Qry_AllCon_1 : Select Query				
CompanyID	COMPANYNAME	ST	ResVol	
17618300IN	OHIO VALLEY GAS INC	IN	440,343	
17619004IN	RENSSELAER GAS UTIL DEPT	IN	246,026

Record: 1 of 1792

Pull down on the Datasheet menu item and click Freeze columns.

The COMPANYNAME column always appears at the left. Even when scrolling to the right, COMPANYNAME stays on the screen:

The screenshot shows a query grid titled 'Qry\_AllCon\_1 : Select Query'. The first column is 'COMPANYNAME', which is frozen. The other columns are 'ComCost', 'ComConsumer', and 'Othe'. The grid contains data for various companies, with 'ENSTAR NAT GAS CO' having the highest 'ComCost' value of 21,445,075. The status bar at the bottom indicates 'Record: 1 of 1792'.

COMPANYNAME	ComCost	ComConsumer	Othe
BARROW UTIL & ELEC COOP INC	756,030	215	
UKPEAGVIK ARCTIC SLOPE	507,003	3	
ALASKA P L CO	0	0	
ENSTAR NAT GAS CO	21,445,075	12,420

WEST JEFFERSON GAS SYS	25,366	22	
ALABAMA GAS CORP	78,594,955	33,822	
MIDCOAST INTERSTATE TRANS IN	0	0	

Columns can be 'unfrozen' only by exiting the query grid.

The screenshot shows a software interface with a menu open over a data table. The menu includes options like 'Font...', 'Freeze Columns', 'Sort Ascending', 'Sort Descending', 'Advanced Filter/Sort...', 'Apply Filter/Sort', and 'Remove Filter/Sort'. The 'Sort Ascending' option is highlighted. In the background, a table is visible with columns 'COMPANYNAME', 'ST', 'ResVol', and 'Re...'. The 'ResVol' column header is circled in red. A black arrow points from the 'Sort Ascending' menu item to the circled 'ResVol' header. The table data includes rows for companies like 'RROW UTIL & ELEC COOP INC', 'PEAGVIK ARCTIC SLOPE', 'ALASKA P L CO', 'ENSTAR NAT GAS CO', 'MARATHON OIL CO', 'CHEVRON USA PROD INC', 'UNION OIL CO OF CALIFORNIA', 'PHILLIPS ALASKA NAT GAS CO', 'ARCO ALASKA INC', 'FLORALA GAS DEPT', 'WEST JEFFERSON GAS SYS', 'ALABAMA GAS CORP', and 'MIDCOAST INTERSTATE TRANS IN AL'. The 'ResVol' values range from 0 to 27,627,365.

To use the sort ascending feature select a column by clicking on the column heading. Pull down the Datasheet menu and click on Sort Ascending. The query will be sorted according to the values in the selected column.

**Qry\_AllCon\_1 : Select Query**

	CompanyID	COMPANYNAME	ST	ResVol

To use the Advanced filter option no rows need to be selected. Just pull down the Datasheet menu and click on the Advanced filter option.

The filter design window will appear.

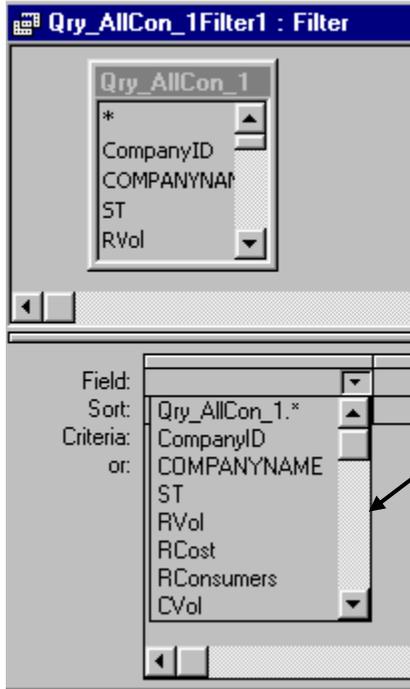

This window can be resized by stretching the edges.

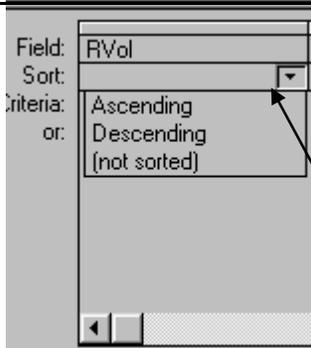

1) The first step is to copy the field you want to search from the field list into the criteria grid.

You can either drag the name of the column you want to search or sort by in the upper pane of the window into the criteria grid in the lower pane of the window, or double click on a field to copy it to the next available field cell in the grid.

2) By clicking on the Field column in the lower pane you can get a list of fields in the query.

3) In this example we've selected the RVol field. You can pull down the sort cell and specify a sort order if you want.

4) In the Criteria cell we've entered a condition that Rvol be greater than 900000.

5) Click on the Apply/Filter Sort toolbar button when you're ready to apply the filter. Any records that don't meet the criteria you specified will disappear from the view. They have been filtered out. If you click on the Remove Filter/Sort button they will appear again.

**6)** The rows that appear should meet the criteria. A note: on full survey datasets it helps to have plenty of memory available. If you run a filter and nothing changes you may not have enough memory to process.

If you have enough memory, you are not limited to one field or value. You can select several fields in the criteria grid. The EIA-176 Query system offers standard operators

- = Equals
- > Greater than
- < Less than
- >= Greater than or equal to
- <= Less than or equal to
- <> Not

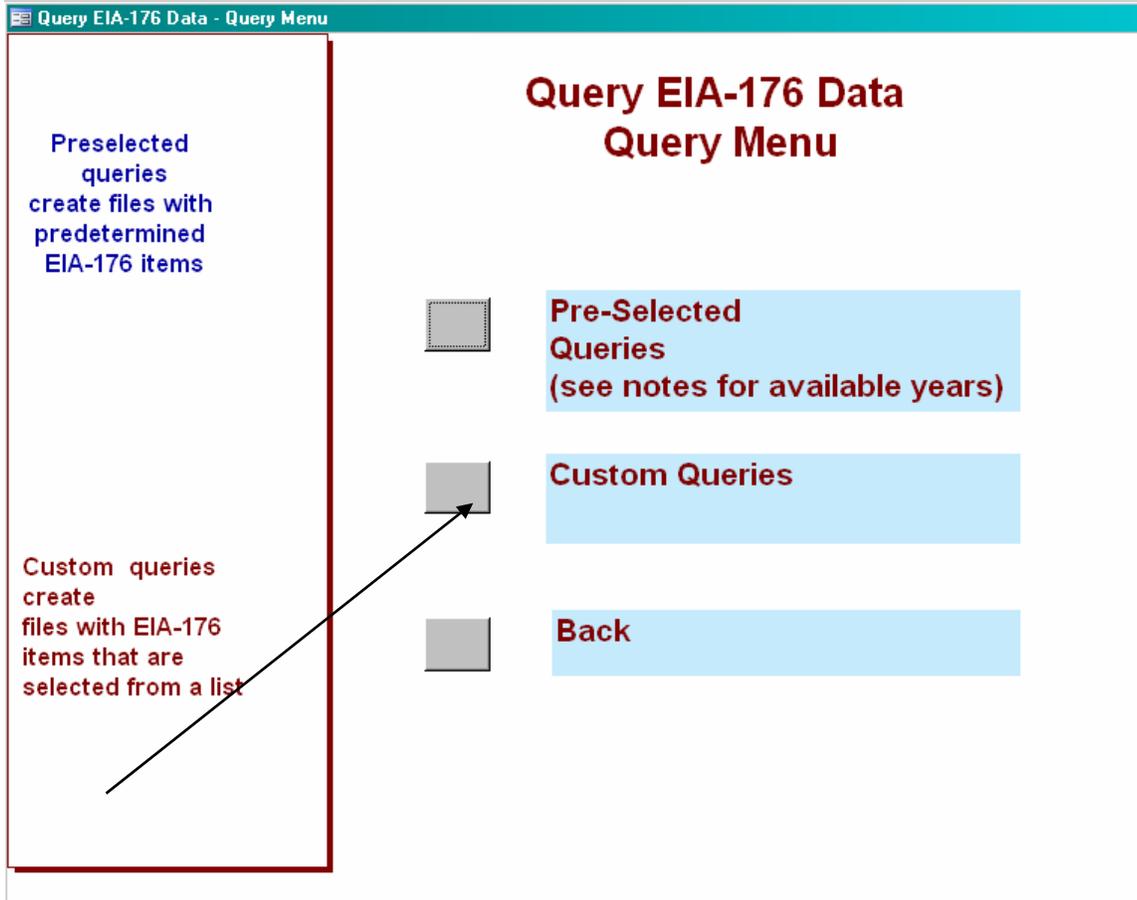

To specify AND/OR criteria place the operators in different rows of the criteria grid.

Field: ST Sort: Criteria: TX and MI or:		To express AND criteria within a single field use the AND operator  This filter asks for a State value of TX AND MI.
Field: ST      RVol Sort: Criteria: "TX"      >90000 or:		To express AND criteria between fields put each criteria on the same row of the criteria grid.  This statement asks for ST equal to TX and Rvol > 90000.

Field: Sort: Criteria: or:	ST  "TX " Or "MI"	<p>To express OR criteria within a single field use the OR operator.</p> <p>This statement asks for ST equal to TX OR MI</p>				
Field: Sort: Criteria: or:	<table border="1"><tr><td>ST</td><td>RVol</td></tr><tr><td>"TX "</td><td>&gt;90000</td></tr></table>	ST	RVol	"TX "	>90000	<p>To express OR criteria between multiple fields place the criteria on separate rows of the criteria grid.</p> <p>This statement asks for ST equal to TX or Rvol &gt; 90000.</p>
ST	RVol					
"TX "	>90000					

### 3.3.2 - Custom Queries

The **Custom Queries** option allows you to choose individual data items from the entire EIA-176 for inclusion in datasets. The methods are similar to those used in the Pre-selected queries.

#### 3.3.2.1 View EIA-176 Company Menu

First you will be prompted to select Companies and Year. This screen is similar to the Company selection screen in other parts of the query.

### Query EIA-176 Data - Choose EIA-176 Company(s)

Please enter a report year:

You can select one or more companies by name or state .

Use the arrow buttons to select a state or company.

**Choose a retrieval method**

Select a Company in a State     Select all Companies

Select a Company by Name

Choose EIA-176 Companies to include in your query

1997

1998

1999

2000

2001

2002

2003

2004

2005

Next =>

<=Back

After you've selected companies and the year, you will go onto the Select Reported Data Items button. You'll be presented with a list of EIA-176 form data lines to pick from

### 3.3.2.2 Pick Reported Lines

**User-Selected Queries - for year(s):** 2005

**Select Reported Data Items**

You have selected all companies

- 76

- CT
- DC
- DE
- EG
- FI

Part/	LineNo/	Description
3	3014	CNEAF Alternative Fuel Answers
4	0110	Gas Produced onsystem by comp
4	0120	Synthetic natural gas produced
4	0210	Underground Storage Withdrawal
4	0220	Received from LNG
4	0230	Other Storage Withdrawals
4	0300	Transported into rpt ST from: ST
4	0400	Receipts at City Gate
4	0500	Other Receipts
4	0600	Supplemental Gasous Fuels (6.0 t
4	0700	Total Supply
5	0800	Inventory of LNG
6	0900	Heat Content of consumer deliveri
6	1010	Del to Residential Sales
6	1020	Del to Commercial Sales
6	1030	Del to Industrial sales
6	1040	Del to Electric Utility Sales
6	1050	Del fo Vehicle Fuel
6	1060	Del to Other (Commercial, Industrial)

**Item Selected/Item Units**

Refer to the survey form below.

[http://www.eia.doe.gov/oil\\_gas/natural\\_gas/survey\\_forms/nat\\_survey\\_forms.html](http://www.eia.doe.gov/oil_gas/natural_gas/survey_forms/nat_survey_forms.html)

Each line item with data from the form is represented with a short description. The Part and Line Number is also included. The highlight method is similar to that in the Company screen.

Once all your selections have been made click **Finished Selecting**.

The items are labeled like the lines on the survey form. If you select the 'Natural Gas Survey Forms' hyperlink you'll be taken the Natural Gas survey form page, and can view a copy of the EIA-176 survey form and instructions. If you have questions about which items you want to see this can be useful.

The units of the survey items are available in the Selected Items box after you select them:

**Item Selected/ Item Units**

4	0700	Total Supply	Mcf
6	1010	Del to Residential Sales	Mcf, Dollars, Count of Cons
6	1020	Del to Commercial Sales	Mcf, Dollars, Count of Cons
6	1030	Del to Industrial sales	Mcf, Dollars, Count of Cons
6	1040	Del to Electric Utility Sale	Mcf, Dollars, Count of Cons

**Proposed Natural Gas Surveys**

**EIA's Natural Gas Division Survey Form Comments**  
 The public comment period for the natural gas forms clearance package, seeking a 3-year extension for data collection activities, concluded Friday, May 6. EIA will review all comments before making a final proposal to OMB later this summer. Please contact: Steve Nalley at 202-586-0959 or [snalley@eia.doe.gov](mailto:snalley@eia.doe.gov) should you have questions.

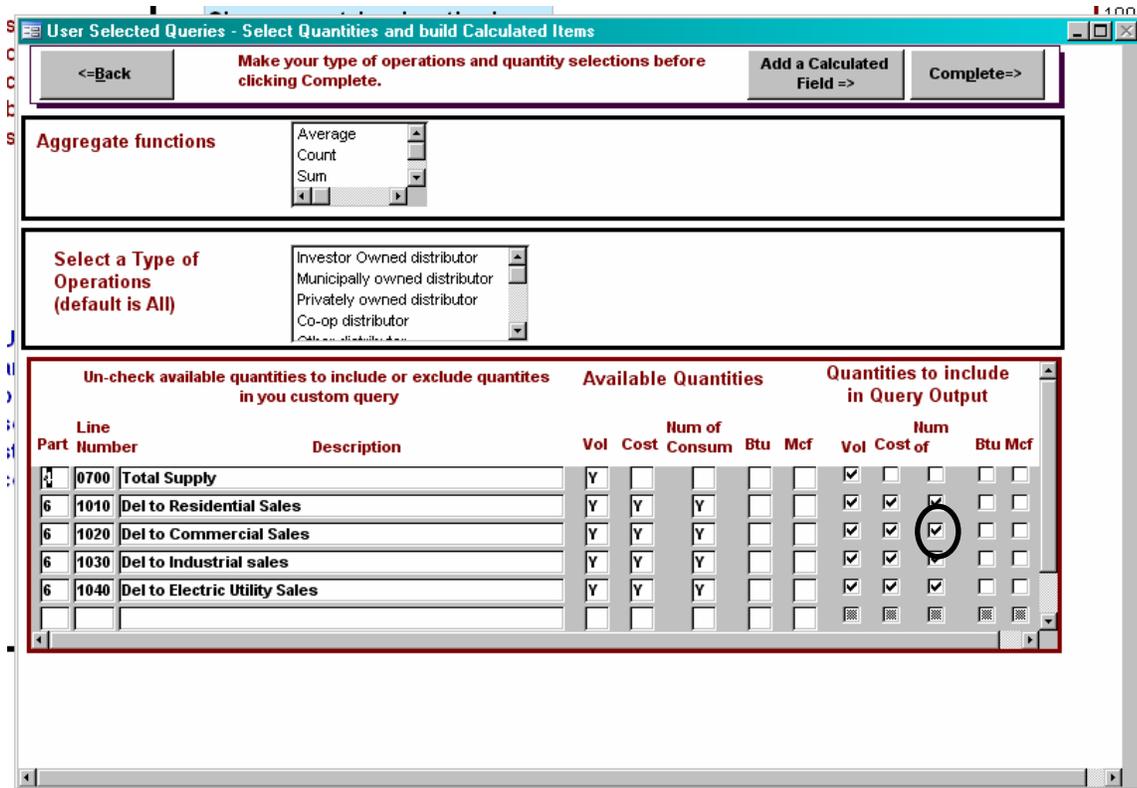

**Current Survey Forms**

[Natural Gas Survey Forms](#)   [Reserves Survey Forms](#)

Natural Gas Survey Forms	Forms	Instructions
<b>EIA-176, "Annual Report of Natural and Supplemental Gas Supply and Disposition"</b> A detailed State level balance of supply and disposition is reported by all companies which physically take possession of natural gas (e.g. synthetic gas producers, processors, distributors, storage operators, and pipeline operators) excluding producers and consumers. A <a href="#">PC-based application</a> for filing this form is also available. Frequently asked questions about the form are answered in <a href="#">FAQ: Form 176</a>	<a href="#">PDF</a> <a href="#">XLS</a>	<a href="#">PDF</a>

**3.3.2.3 Select Quantities and Build Calculated Items**

The Select Quantities and build Calculated Items screen has three parts.  
 Aggregate functions  
 Select Company Available Quantities.  
 Calculated field.

**Available Quantities:**

For each line item you select this portion of the screen will have a row. The **Available Quantities** portion shows you what quantities are available for this item. The **Quantities to include** portion allows you to include or exclude quantities.

For this example, if you aren't interested in the Number of Consumers for deliveries to Residential Sales, you would use the mouse to deselect that item, and it won't appear in your query data file.

### Type Of Operations

You can select multiple Types of Operations if you choose.

If no selection is made, all types are included. If they are all included they are not identified.

#### Aggregate functions

The Aggregate functions provide summary statistics for all the companies selected. The Aggregate functions, the Type of Operations, and the Add calculated functions are mutually exclusive.

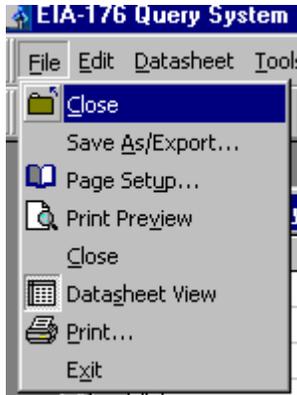

When you select Aggregate functions other options become disabled.

In the following example the Aggregate function has been grouped by Delivered to Consumers

Dynamic_Query : Select Query					
	ST	Year	SmDIResSaIVI	SmDIResSaICs	SmDIResSaINt

## **Appendix A – EIA-176 Survey Form**

## Appendix B – Pre-Selected Query Items

Query description	Query Memo
Answers to Question in Part II about Alternative Fuel Vehicles	This Query has the answers from companies on Part 3. This data is only available in 2005.
All Part IV & V Items (Volumes)	This Query has all Part IV & V Volume items.
All Part VI Items (Volumes, Costs)	This Query has all Part VI Volume and Cost items.
All Sector Items (Volumes, Costs, Consumers)	All consumption items by part and line number. In an easy to pivot format for Excel.
All Sector items sorted by state	This query includes company data sorted by state for lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6. Volumes and Number of Consumers are available for all lines. Costs are only available for lines 10.1 thru 10.4, and 10.6.
Sector Sector Prices	Consumption Sector Prices in an easy to pivot format for multiple years
Residential Sector Volumes - Delivered, Transported, Total	Residential sector volumes - delivered, transported and total.
Company Name Information	This query includes the Company Name, State of Operation and the Type of Operations category they reported.
Commercial Sector Volumes	Commercial sector volumes - delivered, transported and totals.
Detail level Continuation Lines	This query shows continuation lines with the company reference for Parts 4 & 5.
Interstate Movement Lines (3.0 and 14.0)	This Query shows lines 3.0 and 14.0. It can be pivoted in Excel to replicated Table 12 from the Natural Gas Annual.
Industrial Sector Volumes	Industrial sector volumes - delivered, transported and totals.
Footnotes and Associated Data Values	This query shows data values and associated footnotes for selected companies.
Sector Vols sorted by sector	This query includes company data sorted by sector - Residential, Commercial, Industrial, Electric, and Vehicle Fuel . The query includes volumes with delivered and transported items.
Electric Sector Volumes	Electric sector prices - delivered, transported, and totals.
Sector Vols ranked nationally	This query includes company data sorted by volume amounts. Consumption delivered to consumer items - lines 10.1 thru 10.4, and 10.6 are added to consumption transported items -lines 11.1 thru 11.4 and 11.6 to rank companies nationally.
Vehicle Fuel Volumes	Vehicle Fuel Volumes - delivered, transported and totals.
Total Delivered including 176 Electric	This query has sectors including electric.
Sector Vols ranked by state	This query includes Company data sorted and ranked by volume amount by state. Consumption delivered to consumer items -lines 10.1 thru 10.4, and 10.6- are added to consumption transported items -lines 11.1 thru 11.4 and

Query description	Query Memo
	11.6.
LNG & Underground Gas Storage	This Query has LNG and Underground Storage Injections & Withdrawals, as well as LNG Inventory at the end of the year.
Sector Prices sorted by sector	This query includes prices for consumption data - lines 10.1 thru 10.4, and 10.6 - only. Costs are not collected for transported consumption sector.
Sector Vols for Investor Owned Distribution Companies	This query includes only companies who checked A on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Municipally Owned Distribution Companies	This query includes only companies who checked B on Section II. Type of Operations. It covers lines 10.1 thru 10.4 and 10.6. who checked B on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Privately Owned Distribution Companies	This query includes only companies who checked C on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Cooperatively Owned Distribution Companies	This query includes only companies who checked D on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Other Distribution Companies	This query includes only companies who checked E on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Interstate Pipelines	This query includes only companies who checked F on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Intrastate Pipelines	This query includes only companies who checked G on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Storage Operators	This query includes only companies who checked H on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Synthetic Natural Gas Plant Operators	This query includes only companies who checked I on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Producers	This query includes only companies who checked J on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Gathers	This query includes only companies who checked K on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Liquefied Natural Gas (LNG) Operators	This query includes only companies who checked L on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.
Sector Vols for Other Operators	This query includes only companies who checked M on Section II. Type of Operations. It covers lines 10.1 thru 10.4, and 10.6 and lines 11.1 thru 11.4 and 11.6.

**Appendix C – User Selected Query Item names**

<b>UserQueryName</b>	<b>UQPart</b>	<b>UQLin</b>
Number of Alternative Fuel Vehicles	3	3014
Gas Produced onsystem by company	4	0110
Synthetic natural gas produced	4	0120
Underground Storage Withdrawals	4	0210
Received from LNG	4	0220
Other Storage Withdrawals	4	0230
Transported into rpt ST from: ST or Cntry	4	0300
Receipts at City Gate	4	0400
Other Receipts	4	0500
Supplemental Gasous Fuels	4	0600
Total Supply	4	0700
Inventory of LNG	5	0800
Heat Content of consumer deliveries	6	0900
Del to Residential Sales	6	1010
Del to Commercial Sales	6	1020
Del to Industrial sales	6	1030
Del to Electric Utility Sales	6	1040
Del fo Vehicle Fuel	6	1050
Del to Other (see footnotes for type)	6	1060
Trans to Residential Consumers	6	1110
Trans to Commercial Consumers	6	1120
Trans to Industrial Consumers	6	1130
Trans to Electric Utilities	6	1140
Trans for Vehicle Fuel use	6	1150
Trans to Other (see footnotes for type)	6	1160
Pipeline Compressor Use	6	1210
New Pipeline Fill	6	1220
Distribution Company Use	6	1230
Other (see footnotes for type)	6	1240
Underground Storage Injections	6	1310
Liquefied natural gas (LNG) Injections	6	1320
Other Storage Injections (see footnotes for type)	6	1330
Trans to State Line: Comp ST/Cntry	6	1400
Lease Use	6	1500
Returned to oil and/or gas reservoirs	6	1600
Losses from leaks, migration, damage and/or	6	1700
Other Disp: Distribution Companies	6	1810
Other Disp: Other Pipelines	6	1820
Other Disp: Storage Operators	6	1830
Other Disp: Other (Specify type)	6	1840
Total Disposition	6	1900
Unacc't for gas supply	6	2000
