

## Appendix B. Current-Dollar Gross Domestic Product by State

The current-dollar gross domestic product (GDP) data used in the U.S. Energy Information Administration (EIA) State Energy Data System (SEDS) to calculate total energy consumed per current dollar of output are in Tables B1 and B2. The data are the U.S. Department of Commerce, Bureau of Economic Analysis, current-dollar GDP estimates by state, for 1997 forward.

Both the national-level and state-level current-dollar GDP data are from the U.S. Department of Commerce, Bureau of Economic Analysis (BEA) “Regional Economic Accounts” dataset. There is a difference in the coverage between the two series. The difference between the sum of the states GDP and the U.S.-level GDP reflects federal military and civilian activity located overseas. For details, see BEA’s Regional Economic Accounts: Methodologies, <http://www.bea.gov/regional/methods.cfm>.

### *Additional note*

BEA reports current-dollar GDP for 1997 forward based on the North American Industry Classification System (NAICS) and current-dollar GDP. Before 1997, the data are based on the Standard Industrial Classification (SIC). Through the 2012 data cycle, SEDS published current-dollar GDP by state from 1970 forward. In 2014, BEA completed a comprehensive revision of the state GDP and only revised the data for 1997 forward. Because of the incompatibility between the two sets of data, SEDS removed the state GDP data before 1997.

### *Data sources*

GDPRVZZ — Current-dollar gross domestic product by state and the United States, in millions of dollars.

- 1997 forward: U.S. Department of Commerce, Bureau of Economic Analysis, Regional Economic Accounts, <https://apps.bea.gov/itable/iTable.cfm?ReqID=70&step=1>, select Annual Gross Domestic Product by State, GDP in current dollars (SAGDP2), NAICS (1997-forward), All Areas, and All industry total.

**Table B1. Current-Dollar Gross Domestic Product by State, 1997-2007**  
(Billion Dollars)
