2014 EIA reports and publications

## CRUDE OIL AND NATURAL GAS RESERVES

DECEMBER 4, 2014

*U.S. Crude Oil and Natural Gas Proved Reserves, 2013*

- In 2013, Colorado had the largest increase of any state in lease condensate proved reserves at 133 million barrels.
- Colorado added net revisions of 1.9 trillion cubic feet (Tcf) to its proved natural gas reserves after a 2.6 Tcf downward net revision in 2012.

## PETROLEUM AND OTHER LIQUIDS

NOVEMBER 17, 2014

*Crude oil and lease condensate production at highest volume since 1986*

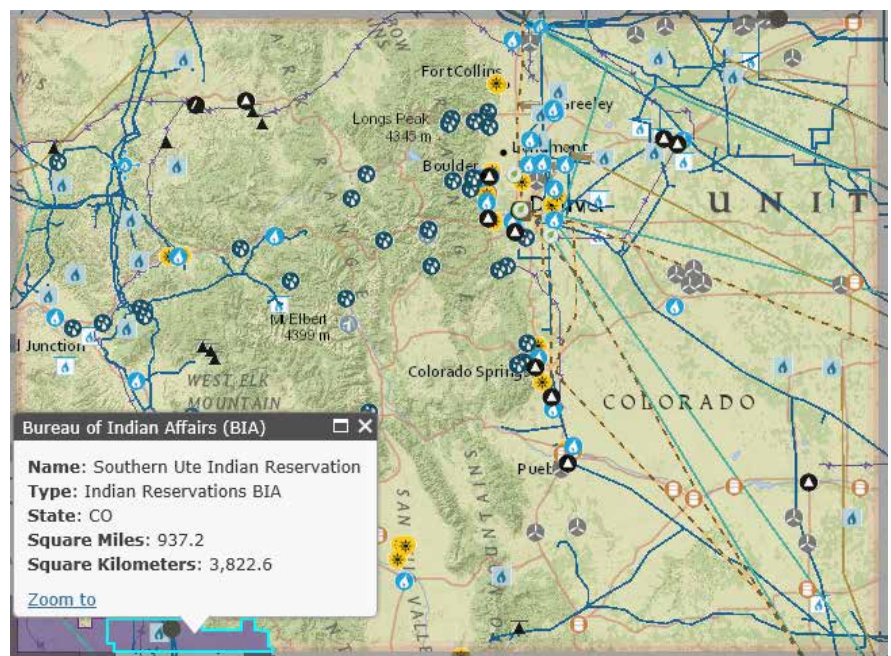

- During 2014, Colorado was 1 of 10 states to set monthly crude oil and lease condensate production records since 1995, and the state accounted for more than 64% of total U.S. production in August 2014.

## TRIBAL AFFAIRS

JUNE 19, 2014

*Sales of Fossil Fuels Produced from Federal and Indian Lands, FY 2003 through FY 2013*

- Wyoming, the federal Gulf of Mexico, New Mexico, and Colorado together represented 86% of total production of natural gas on federal and Indian lands in fiscal year 2013.
- Colorado was the fourth-largest producer of fossil fuels from federal and Indian lands in fiscal year 2013.

## COLORADO ENERGY HIGHLIGHTS:

Colorado's average household energy costs (\$1,551 per year) are 23% lower than the national average.

Colorado was seventh in the nation in crude oil production with 7,785 barrels produced in December 2014.

Colorado was ranked sixth in the nation in marketed natural gas production in 2013.

Colorado's net electricity generation from solar increased 20% from 2012 to 2013.

# RENEWABLES

APRIL 15, 2014

## Twelve states produced 80% of U.S. wind power in 2013

- According to preliminary generation data released in EIA's *March 2014 Electric Power Monthly* report, Colorado was the country's ninth largest producer of wind power with 7.4 million megawatthours (MWh) of electricity in 2013, accounting for more than 4% of the U.S. net generation from wind.

## NEW TOOLS RELEASED IN 2014:

### EIA's Colorado Flickr album

- The [Colorado album on EIA's Flickr page](#) provides users with access to images related to Colorado's energy production, consumption, prices, and other topics covered by EIA.

### Energy Disruptions Page

- EIA provides real-time storm information on an [interactive map](#) showing key layers of energy infrastructure that could be affected by significant weather events.

### Updated EIA State Energy Portal Profiles

- EIA's [Colorado State Energy Portal](#) serves as a dedicated resource for comprehensive information on Colorado's mix of energy resources, state rankings, high-level energy analysis, and interactive energy resource and infrastructure mapping tools.

Colorado, U.S. Rankings	
<b>Consumption</b>	
Total Energy per Capita	33
<b>Expenditures</b>	
Total Energy per Capita	41
<b>Production</b>	
Total Energy	7
Crude Oil	7
Natural Gas	6
Cool	11
Electricity	29
<b>Prices</b>	
Natural Gas	45
