WHO MUST SUBMIT

The Form EIA-805 is mandatory pursuant to Section 13(b) of the Federal Energy Administration Act of 1974 (Public Law 93-275) and must be completed by the operators of bulk terminals and blending plants selected by the EIA. Companies are selected into the EIA weekly sample according to a procedure that assures coverage of 90 percent of each information element.

WHEN TO SUBMIT

The Form EIA-805 must be received by the EIA by 5 p.m. EST on the Monday following the end of the report period (e.g., the “Weekly Bulk Terminal and Blender Report” covering the week ending January 1, 2010 must be received by 5 p.m. EST January 4, 2010).

QUESTIONS

If you have any questions about Form EIA-805 after reading the instructions, please contact the Survey Manager at (202) 586-3307.

PURPOSE

The Energy Information Administration (EIA) Form EIA-805, “Weekly Bulk Terminal and Blender Report,” is used to collect data on the operations of blending plants/terminals. Reportable blending activity includes gasoline blending as well as blending and reclassification of distillate fuel oil, kerosene, and kerosene-type jet fuel. The data appear on EIA's website at www.eia.doe.gov and in the EIA publication, Weekly Petroleum Status Report.

GENERAL INSTRUCTIONS

Definitions of petroleum products and other terms are available on our website. Please refer to these definitions before completing the survey form.

PART 1. RESPONDENT IDENTIFICATION DATA

- Enter the month, day, and year for which you are filing (e.g., January 1, 2010: Month 01 Day 01 Year 10). The weekly report period begins at 7:01 a.m. EST on Friday and ends at 7:00 a.m. EST on the following Friday.

- Enter the 10-digit EIA ID Number. If you do not have a number, submit your report leaving this field blank. EIA will advise you of the number.

- Enter the name of the company filing the report.

- Enter the Doing Business As “DBA” name if appropriate.

- Enter the terminal site name.

- Enter the Terminal Control Number (TCN) used for identification of terminals in the EIR S ExSTARS system.

- Enter the physical address of the reporting company.

- Enter the mailing address of the Contact. (Note: If the physical address and mailing address are the same, provide the information only for the physical address.)

- Electronic Filing Option: The PC Electronic Data Reporting Option (PEDRO) is a Windows-based application that will enable you to enter data interactively, import data from your own database, validate your data online, and transmit the encrypted data electronically to EIA via the Internet or a dial-up modem. If you are interested in receiving this free software, contact the Electronic Data Collection Support Staff at (202) 586-9659.
Enter the name, telephone number, fax number and e-mail address of the person to contact concerning information shown on the report. The person listed should be the person most knowledgeable of the specific data reported.

PART 2. SUBMISSION/RESUBMISSION INFORMATION

Submission

Refer to "How to Submit" section for more details or methods for submitting data.

Resubmission

A resubmission is required whenever an error greater than 5 percent of the true value is discovered by a respondent or if requested by the EIA.

Enter "X" in the resubmission box if you are correcting information previously reported.

Identify only those data cells and lines which are affected by the changes. You are not required to complete the EIA ID number, the report period for which you are resubmitting and contact information.

Comments

Report any unusual aspects of your operations during the current reporting period in the Comments section at the bottom of the form below Parts 1 and 2 on the cover page. Comments will be used in the validation process and should address any data anomalies that could raise questions requiring contact by survey staff for clarification. Comments will be protected in the same manner as other information reported on this form as described in detail in "Provisions Regarding Confidentiality of Information" following Part 3 of these instructions on Page 3.

SPECIFIC INSTRUCTIONS

PART 3. BULK TERMINAL and BLENDER ACTIVITY

The Form EIA-805 is designed to collect the amount of finished product blended (i.e. input and produced) at bulk terminals.

Quantities: Report using the following criteria.

- **Report all quantities to the nearest whole number in thousand barrels** (42 U.S. gallons/barrel). Quantities ending in 499 or less are rounded down, and quantities ending in 500 or more are rounded up (e.g., 106,499 barrels are reported as 106 and 106,500 barrels are reported as 107).

- **Report** data only for those products blended at the terminal. If the quantity for a product for which you usually report data is zero, please enter "0". Shaded cells on the form are those in which data are not currently required to be reported.

Input

**Report** as input any finished product, blending component, oxygenate, or other material blended or reclassified to a different product. Examples of quantities to report as input include Reformulated Blending Stock for Oxygenate Blending (RBOB) and Fuel Ethanol blended to produce finished reformulated motor gasoline, and kerosene blended with distillate fuel oil.

**Report** input whether blending or product reclassification takes place due to transfers of products between tanks, through in-line blending systems, or by splash blending in trucks or rail cars.

**Report** as input any Distillate Fuel Oil to be reclassified to a different sulfur category as well as any Distillate Fuel Oil, Kerosene, or Kerosene-Type Jet Fuel being reclassified to a different product code (see Reclassification of Inventory discussed later in these instructions).

**Report** gross input for each item listed on the survey form except where shaded.

Production

**Report** as production any finished product or blending component blended or reclassified from inputs reported on Form EIA-805. One example of production to report on Form EIA-805 is Finished Reformulated Motor Gasoline blended from input of RBOB and Fuel Ethanol.

**Report** production whether blending or product reclassification took place due to transfers of products between tanks, through in-line blending systems, or by splash blending in trucks or rail cars.

**Report** as production any Distillate Fuel Oil reclassified from a different sulfur category as well as any Distillate Fuel Oil, Kerosene, or Kerosene-Type Jet Fuel reclassified from a different product code (see Reclassification of Inventory discussed later in these instructions).

**Report** gross production for each item listed on the survey form except where shaded. Do not "net out" production by reporting the difference between production and input.

Total Input and Total Production

When Form EIA-805 is completed correctly, every input barrel should have a corresponding product on barrel. Therefore, total input should equal total production reported for Code 999. Small variances may exist due to rounding, measurement, gains, and losses, but reports with variances exceeding 2 thousand barrels should be checked for accuracy and will very likely prompt a follow-up call from EIA.
Reclassification of Inventory

Report a finished product that is reclassified as a different finished product as follows: the quantity of the original product is reported in the “Input” column and the reclassified product is reported in the “Production” column.

Example, if you have 10,000 barrels of kerosene in storage at the end of January, this quantity is to be reported as “Stocks” of Kerosene (Code 311) on the January report. If during February the intended use of the 10,000 barrels of kerosene is changed to Kerosene-Type Jet Fuel, report this reclassification by reporting the 10,000 barrels as an “Input” of Kerosene (Code 311) and as a “Production” of Kerosene-Type Jet Fuel (Code 213).

Gasoline Treated as Blendstock (GTAB)

If GTAB is tested at the terminal and is certified as a finished motor gasoline where no further blending or treatment is required, such as adding oxygenates, report GTAB as follows.

Report the quantity of GTAB that is certified as a finished product as an input of “GTAB”.

Report an equal volume of the appropriate finished motor gasoline as a “Production” of the finished motor gasoline after it has been certified.

Report input of GTAB and other material such as Fuel Ethanol and then production of the appropriate Motor Gasoline or other Motor Gasoline Blending Component in cases where GTAB is blended with another material to produce a new product.

Transmix

Transmix is created when two different petroleum products (e.g. motor gasoline and distillate fuel oil) become commingled during pipeline transport. Exclude transmix from all quantities reported on Form EIA-805.

PROVISIONS REGARDING CONFIDENTIALITY OF INFORMATION

The information reported on this form will be protected and not disclosed to the public to the extent that it satisfies the criteria for exemption under the Freedom of Information Act (FOIA), 5 U.S.C. §552, the DOE regulations, 10 C.F.R. §1 004.11, implementing the FOIA, and the Trade Secrets Act, 18 U.S.C. §1905.

The Federal Energy Administration Act requires the EIA to provide company-specific data to other Federal agencies when requested for official use. The information reported on this form may also be made available, upon request, to another component of the Department of Energy (DOE); to any Committee of Congress, the Government Accountability Office, or other Federal agencies authorized by law to receive such information. A court of competent jurisdiction may obtain this information in response to an order. The information may be used for any nonstatistical purposes such as administrative, regulatory, law enforcement, or adjudicatory purposes.

Disclosure limitation procedures are not applied to the statistical data published from this survey’s information. Thus, there may be some statistics that are based on data from fewer than three respondents, or that are dominated by data from one or two large respondents. In such cases, it may be possible for a knowledgeable person to estimate the information reported by a specific respondent.

Company specific data are also provided to other DOE offices for the purpose of examining specific petroleum operations in the context of emergency response planning and actual emergencies.

SANCTIONS

The timely submission of Form EIA-805 by those required to report is mandatory under Section 13(b) of the Federal Energy Administration Act of 1974 (FEAA) (Public Law 93-275), as amended. Failure to respond may result in a civil penalty of not more than $2,750 per day for each violation, or a fine of not more than $5,000 per day for each criminal violation. The government may bring a civil action to prohibit re-porting violations which may result in a temporary restraining order or a preliminary or permanent injunction in conjunction with the civil action, the court may also issue mandatory injunctions commanding any person to comply with these reporting requirements.

FILING FORMS WITH THE FEDERAL GOVERNMENT AND ESTIMATED REPORTING BURDEN

Respondents are not required to file or reply to any Federal collection of information unless it has a valid OMB control number. Public reporting burden for this collection of information is estimated to average 1 hour and 50 minutes per response, including the time of reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information including suggestions for reducing this burden to: Energy Information Administration, Statistics and Methods Group, EI-70, 1000 Independence Avenue, S.W., Washington, D.C. 20585; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.
