EIA-813
MONTHLY CRUDE OIL REPORT
INSTRUCTIONS

QUESTIONS
If you have any questions about Form EIA-813 after reading the instructions, please contact the Survey Manager at (202) 586-3536.

PURPOSE
The Energy Information Administration (EIA) Form EIA-813, "Monthly Crude Oil Report," is used to collect data on end-of-month stocks of crude oil, and movements of crude oil by pipeline. A summary of the data appear on EIA’s website at www.eia.gov and in numerous government publications.

WHO MUST SUBMIT
Form EIA-813 is mandatory pursuant to Section 13(b) of the Federal Energy Administration Act of 1974 (Public Law 93-275) and must be completed by companies which carry or store 1,000 barrels or more of crude oil. Included are:

- gathering and trunk pipeline companies (including interstate, intrastate, and intracompany pipelines),
- crude oil producers,
- terminal operators,
- storers of crude oil (except refineries), and
- companies transporting Alaskan crude oil by water in the 50 States and the District of Columbia.

WHEN TO SUBMIT
Form EIA-813 must be received by the EIA by the 20th calendar day following the end of the report period (e.g., the Form EIA-813 covering the January report period must be received by February 20).

Form EIA-813 Semi Annual Storage Capacity Supplement must be received by the EIA by the 20th of April for the report period March and by the 20th of October for the report period September.

HOW TO SUBMIT
Instructions on how to report via email, facsimile, or secure file transfer are printed on PART 2 of Form EIA-813.

Secure File Transfer: This form may be submitted to the EIA by facsimile, e-mail, or secure file transfer. Should you choose to submit your data via e-mail or facsimile, we must advise you that e-mail and facsimile are insecure means of transmission because the data are not encrypted, and there is some possibility that your data could be compromised. You can also send your Excel files to EIA using a secure method of transmission: HTTPS. This is an industry standard method to send information over the web using secure, encrypted processes. (It is the same method that commercial companies use to communicate with customers when transacting business on the web.) To use this service, we recommend the use of Microsoft Internet Explorer 5.5 or later or Netscape 4.77 or later. Send your surveys using this secure method to:
https://signon.eia.doe.gov/upload/noticeoog.jsp

Electronic Filing Option: The PC Electronic Data Reporting Option (PEDRO) is a Windows-based application that will enable you to enter data interactively, import data from your own database, validate your data online, and transmit the encrypted data electronically to EIA via the Internet or a dial-up modem. If you are interested in receiving this free software, contact the Electronic Data Collection Support Staff at (202) 586-9659.

COPIES OF SURVEY FORMS, INSTRUCTIONS AND DEFINITIONS
Copies in portable document format (PDF) and spreadsheet format (XLS) are available on EIA’s website. You may access the materials at the following link:
http://www.eia.gov/survey/#petroleum

Files must be saved to your personal computer. Data cannot be entered interactively on the website.

GENERAL INSTRUCTIONS
Definitions of petroleum products and other terms are available on our website. Please refer to these definitions before completing the survey form.

PART 1. RESPONDENT IDENTIFICATION DATA
- Enter the month and year. The monthly report period begins at 12:01 a.m. EST on the first day of the month and ends midnight of the last day of the month.
- Enter the 10-digit EIA ID Number. If you do not have a number, submit your report leaving this field blank. EIA will advise you of the number.
- If there has been a change since the last report, enter an “X” in the block provided.
- Enter the name of the reporting company.
- Enter the Doing Business As “DBA” name if appropriate.
- Enter the physical address of the reporting company.
- Enter the mailing address of the Contact. (Note: If the physical address and mailing address are the same, provide the information only for the physical address.)
- Enter the name, telephone number, facsimile number, and e-mail address of the person to contact concerning information shown on the report. The person listed should be the person most knowledgeable of the specific data reported.
PART 2. SUBMISSION/RESUBMISSION INFORMATION

Submission

Refer to “How to Submit” section for more details or methods for submitting data.

Resubmission

- A resubmission is required whenever an error greater than 5 percent of the true value is discovered by a respondent or if requested by the EIA.
- Enter “X” in the resubmission box if you are correcting information previously reported.
- Identify only those data cells and lines which are affected by the changes. You are not required to file a complete form when you resubmit, but be sure to complete the EIA ID number, the report period for which you are resubmitting and contact information.

Comments

Report any unusual aspects of your operations during the current reporting period in the Comments section at the bottom of the form below Parts 1 to 4 on the first page.

Comments will be used in the validation process and should address any data anomalies that could raise questions requiring contact by survey staff for clarification. Comments will be protected in the same manner as other information reported on this form as described in detail in “Provisions Regarding Confidentiality of Information” following Part 7 of these instructions on Page 4.

SPECIFIC INSTRUCTIONS

- Report all quantities to the nearest whole number in thousand barrels (42 U.S. gallons/barrel). Quantities ending in 499 or less are rounded down, and quantities ending in 500 or more are rounded up (e.g., 106,499 barrels are reported as 106 and 106,500 barrels are reported as 107).
- Report data for only those lines which are applicable to your operation. If there are no data for a specific line, leave the entire line blank. Shaded cells on the form are those in which data are not currently required to be reported.

PART 3. STOCKS OF CRUDE OIL

Report all stocks in the custody of the facility regardless of ownership. Reported stock quantities should represent actual measured inventories.

Report stocks as of midnight of the last day of the report month, corrected to 60 degrees Fahrenheit (ºF) less basic sediment and water (BS&W).

Report all domestic and foreign stocks held in the custody of your company and in transit thereto, except those in transit by pipelines which you do not operate. Include foreign stocks only after entry through Customs. Exclude stocks of foreign origin held in bond.

For purposes of this report, “after entry through Customs” is said to occur on:
- the “entry date” specified in block 7 on the U.S. Customs and Border Protection CBP Form 7501, “Entry Summary;”
- the “import date” specified in block 5 on the U.S. Customs and Border Protection CBP Form 214A (Statistical Copy), “Application for Foreign Trade Zone Admission and/or Status Designation;” or
- the “export date” specified in block 4 on the U.S. Department of Commerce Form 7525-V, “Shipper’s Export Declaration,” for shipments from Puerto Rico to the 50 States and the District of Columbia.

Pipeline/Tank Farm Stocks (Code 056) - Report all domestic and foreign crude oil stocks held in pipelines, tank farms, and terminals operated by the reporting company in each PAD District. Include stocks held in tanks above ground and in underground storage caverns. Include stocks in transit to your facilities except those in transit by pipelines which you do not operate. Report crude oil stocks at Cushing, Oklahoma with total Pipeline/Tank Farm Stocks in PAD District 2. Report crude oil stocks at Cushing, Oklahoma separately using Code 053 as described below. Use Table 1 to determine the PAD District classification of each State.

Table 1. State Classification

</table>

Cushing, Oklahoma Stocks (Code 053) - Report all domestic and foreign crude oil stocks held in pipelines, tank farms, and terminals operated by the reporting company in the Oklahoma counties of Lincoln, Payne, and Creek.

Lease Stocks (Code 057) - Report all crude oil stocks held on leases.
Alaskan Crude Oil in Transit by Water (Code 092) - Report all Alaskan crude oil stocks in transit by water between Alaska and the other States, the District of Columbia, Puerto Rico, and the Virgin Islands. Include stocks held at transshipment terminals in Alaskan Crude Oil in Transit (Code 092) rather than in PAD District 5 stocks. These stocks must be reported by the transporting company having custody of these stocks. Do not include these quantities in Code 056 or Code 057.

PART 4. STRATEGIC PETROLEUM RESERVE RECEIPTS OF DOMESTIC CRUDE OIL

Part 4 is completed only by the Strategic Petroleum Reserve of the U.S. Department of Energy. All other reporting companies skip this section of the survey form.

PART 5. MOVEMENTS OF CRUDE OIL BY PIPELINE BETWEEN PAD DISTRICTS DURING THE MONTH

Report all movements of petroleum products between PAD Districts made by your company during the month.

Exclude intermediate movements for pipeline systems operating in more than two PAD Districts. For example, a shipment originating in PAD District 3, passing through PAD District 2, and terminating in PAD District 1, is reported as a movement from PAD District 3 to PAD District 1.

PARTS 6, 7 and 8, SEMI ANNUAL SUPPLEMENT FOR STORAGE CAPACITY AND STOCKS IN TANKS AND UNDERGROUND CAVERNS

Report all quantities to the nearest whole number in thousand barrels (42 U.S. gallons/barrel). Quantities ending in 499 or less are rounded down, and quantities ending in 500 or more are rounded up (e.g., 106,499 barrels are reported as 106 and 106,500 barrels are reported as 107).

Report storage capacity and stocks in tanks and underground caverns as of March 31 and September 30 on survey submissions for those months. It is unnecessary to complete the Form EIA-813 supplement parts for months other than March and September.

Report crude oil storage capacity of tanks and underground caverns. Include tanks and underground storage capacity at tank farms as well as working and breakout capacity of tanks and caverns associated with pipeline operations.

Exclude leased storage capacity located at facilities operated by other companies. This storage capacity will be reported by the companies operating those facilities.

Exclude storage capacity of pipes (line fill), trucks, rail cars, barges, and tankers. Also exclude storage capacity of tanks and pipelines used for lease stocks (i.e. exclude storage capacity for stocks reported using code 057 in Part 3). Companies that only report stocks using code 057 will have nothing to report in Parts 6, 7, and 8.

Report storage capacity at Cushing, Oklahoma in Part 7 equal to crude oil storage capacity located in the Oklahoma counties of Lincoln, Payne, and Creek. Include storage capacity at Cushing, Oklahoma when reporting total crude oil storage capacity in PAD District 2. Storage capacity at Cushing is a subset of total storage capacity in PAD District 2.

Report working storage capacity and net available shell storage capacity as described in figure 1 for tanks or figure 2 for caverns. Figures 1 and 2 are based in part on schematics developed by the National Petroleum Council and U.S. Strategic Petroleum Reserve.

Figure 1. Schematic of Tank Storage Capacity and Stocks

Figure 2. Schematic of Cavern Storage Capacity and Stocks

Terms used in Figures 1 and 2 are defined as follows.

- **Contingency Space (Tank):** Available space that is above the maximum operating inventory level. This storage space remains empty during normal operations, but it is available if needed. It allows flexibility to exceed working storage capacity without reaching an inventory level that might create safety hazards or disrupt operations. Storage space above the top of this level is unavailable.
• **Contingency Space (Cavern):** Available space that is below the critical cavern depth but still above unavailable space. This storage space remains filled with brine during normal operations, but it is available if needed. It allows flexibility to exceed working storage capacity without reaching an inventory level that might create hazards or disrupt operations.

• **Net Available Shell Storage Capacity (Tank):** Total available space including tank bottoms, working storage capacity, and contingency space.

• **Net Available Shell Storage Capacity (Cavern):** Total available space including working storage capacity, and contingency space.

• **Tank Bottoms:** Inventory that is below the normal suction line of a storage tank. In floating roof tanks, this is at least the volume required to remain in a storage tank in order to keep the roof from touching the bottom of a storage tank.

• **Total Shell Capacity:** Total storage space including unavailable space and net available shell storage capacity.

• **Unavailable Space (Tank):** Storage space that is required as part of the design of a tank but cannot be used. Includes tank tops, safety allowance, and any other space that is included by design but cannot be used.

• **Unavailable Space (Cavern):** Storage space that is required as part of the design of an underground storage facility but cannot be used. Includes the brine sump and any other space that is included by design but cannot be used.

• **Working Storage Capacity (Tank):** Available capacity for storing crude oil or liquid products that is above tank bottoms and below contingency space. When filled to this capacity, inventory of crude oil or liquid products stands at the maximum operating inventory level.

• **Working Storage Capacity (Underground):** Available capacity for storing crude oil or liquid products that is above contingency space.

**Storage Capacity in Operation**

Storage capacity in operation includes capacity of tanks and caverns that were available and able to be used to hold stocks on the report date. Tanks and caverns in operation may hold stocks, they may hold only tank bottoms, or they may be empty, but they must have been able to be placed in operation on the report date.

**Report** working storage capacity of tanks and caverns that were in operation on the report date.

**Report** net available shell storage capacity of tanks and caverns that were in operation on the report date.

**Report** net available shell storage capacity in operation as either "leased to others" or "exclusive use" as follows.

• **Leased to Others:** Report the entire capacity of a tank or cavern as "leased to others" if all or any portion of the tank or cavern was leased to another company or to another part or business unit of your company on the report date. Also include the entire capacity of a tank or cavern if all or any portion of the tank or cavern was made available for lease to others on the report date.

• **Exclusive Use:** Include capacity of tanks and caverns that are used exclusively by your company and were not leased or made available for lease to other companies on the report date. Report capacity used for throughput agreements as exclusive use even if throughput agreements involve other companies.

Net available shell storage capacity of tanks in operation must always be greater than or equal to working storage capacity of tanks and caverns in operation.

**Idle Storage Capacity**

Idle storage capacity includes capacity of tanks and caverns that were not usable for holding stocks on the report date but could be placed in operation within 90 days of the report date after maintenance or repair. When assessing whether or not a tank or cavern can be placed in service within 90 days, it is acceptable to use a current planned or scheduled return to service date. It is unnecessary to try to account for possible contingencies (e.g., maintenance delays caused by weather) unless they were incorporated into the planned or scheduled in operation date.

**Report** net available shell storage capacity of idle tanks and caverns.

**Exclude** storage capacity of idle tanks and caverns when reporting working storage capacity.

**Exclude** storage capacity of idle tanks and caverns that were idle at the end of the report month and could not be placed in operation within 90 days.

**Exclude** storage capacity of idle tanks and caverns where there is no scheduled date when the capacity will be placed in service.

**Exclude** storage capacity of tanks and caverns under construction even when construction is scheduled for completion within 90 days. Storage capacity of tanks and caverns under construction is reported as capacity in operation only after new tanks and caverns are placed in service.

**New Storage Capacity**

**Report** new storage capacity beginning with the first storage capacity report period after the new capacity was placed in operation.

**Exclude** new capacity while it is under construction even when the scheduled completion date was within 90 days of a storage capacity report date.

**Stocks in Tanks and Underground Caverns**

**Report** stocks in tanks and caverns in Part 8. Stocks reported in Part 8 should equal Pipeline/Tank Farm Stocks (code 056) reported in Part 3 minus pipeline fill and minus any crude oil barrels in rail cars, trucks, tankers, or barges. Stocks reported in Part 8 are intended to be on the same basis as storage capacity and will be used for calculating utilization of tank and cavern storage capacity. Stocks held in tanks and caverns should be less than or equal to net available shell storage capacity.
PROVISIONS REGARDING CONFIDENTIALITY OF INFORMATION

The information reported on this form will be protected and not disclosed to the public to the extent that it satisfies the criteria for exemption under the Freedom of Information Act (FOIA), 5 U.S.C. §552, the DOE regulations, 10 C.F.R. §1004.11, implementing the FOIA, and the Trade Secrets Act, 18 U.S.C. §1905.

The Federal Energy Administration Act requires the EIA to provide company-specific data to other Federal agencies when requested for official use. The information reported on this form may also be made available, upon request, to another component of the Department of Energy (DOE); to any Committee of Congress, the Government Accountability Office, or other Federal agencies authorized by law to receive such information. A court of competent jurisdiction may obtain this information in response to an order. The information may be used for any nonstatistical purposes such as administrative, regulatory, law enforcement, or adjudicatory purposes.

Disclosure limitation procedures are not applied to the statistical data published from this survey's information. Thus, there may be some statistics that are based on data from fewer than three respondents, or that are dominated by data from one or two large respondents. In these cases, it may be possible for a knowledgeable person to estimate the information reported by a specific respondent.

Company specific data are also provided to other DOE offices for the purpose of examining specific petroleum operations in the context of emergency response planning and actual emergencies. The data collected on Form EIA-813, "Monthly Crude Oil Report," is used to report aggregate statistics on and conduct analyses of end-of-month stocks and movements of crude oil by pipeline.

SANCTIONS

The timely submission of Form EIA-813 by those required to report is mandatory under Section 13(b) of the Federal Energy Administration Act of 1974 (Public Law 93-275), as amended. Failure to respond may result in a civil penalty of not more than $2,750 each day for each violation, or a fine of not more than $5,000 for each willful violation.

The government may bring a civil action to prohibit reporting violations which may result in a temporary restraining order or a preliminary or permanent injunction without bond. In such civil action, the court may also issue mandatory injunctions commanding any person to comply with these reporting requirements.

FILING FORMS WITH THE FEDERAL GOVERNMENT AND ESTIMATED REPORTING BURDEN

Respondents are not required to file or reply to any Federal collection of information unless it has a valid OMB control number. Public reporting burden for this collection of information is estimated to average 2 hours per response. This includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information including suggestions for reducing this burden to: Energy Information Administration, Office of Survey Development and Statistical Integration, EI-21, 1000 Independence Avenue, S.W., Washington, D.C. 20585; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.
