

Annual Coal Distribution Report 2023

October 2024

The U.S. Energy Information Administration (EIA), the statistical and analytical agency within the U.S. Department of Energy (DOE), prepared this report. By law, our data, analyses, and forecasts are independent of approval by any other officer or employee of the U.S. Government. The views in this report do not represent those of DOE or any other federal agencies.

Overview of Annual Coal Distribution Tables, 2023

Introduction

The *Annual Coal Distribution Report* (ACDR) provides detailed information about domestic coal distribution by coal-origin state, coal-destination state, consumer category, and method of transportation. It also summarizes foreign coal distribution by coal-producing state.

The 2023 *Annual Coal Distribution Report* supersedes the data contained in the four *Quarterly Coal Distribution Reports* previously issued for 2023. This report relies on the most current data available from our various monthly, quarterly, and annual surveys of the coal industry and electric power generation industry. In addition, the report contains actual annual data instead of imputed data for smaller electric generation plants that are excluded from the monthly filing requirements.

Table format and sources

The electric power sector in this report includes electric utilities, independent power producers, and electric utility combined-heat-and-power plants. Commercial combined-heat-and-power plants and industrial combined-heat-and-power plants, which also submit data on the Form EIA-923, are included in the industrial plants (excluding coke) and commercial and institutional sectors.

Coal receipts as provided in the *Annual Coal Distribution Report* for the electric power sector are less than the total quantities reported on Form EIA-923. This is because the *Annual Coal Distribution Report* reflects domestic distribution of coal. Coal imports from Form EIA-923 are excluded as are volumes of waste coal in the electric power sector and combined-heat-and-power plants.

At the end of the second quarter of 2014, we discontinued both the Form EIA-3, *Quarterly Coal Consumption and Quality Report, Manufacturing and Transformation/Processing Coal Plants and Commercial and Institutional Coal Users*, and the Form EIA-5, *Quarterly Coal Consumption and Quality Report—Coke Plants*. A new Form EIA-3, *Quarterly Survey of Industrial, Commercial, and Institutional Coal Users*, became the data collection form for coke plants, industrial plants (excluding coke), and commercial and institutional facilities.

We obtain data on coal distributed to coke plants from the new Form EIA-3. The volume of coal distributed to coke plants excludes coal imports and so is smaller than the volume of receipts at coke plants reported in the *Quarterly Coal Report*, which includes imports.

We collect coal distributed to industrial plants (excluding coke) on the new Form EIA-3 and on Form EIA-7A, *Annual Survey of Coal Production and Preparation*. The volume of receipts reported for industrial plants (excluding coke) in the *Annual Coal Distribution Report* is smaller than the volume of receipts for industrial plants in the *Quarterly Coal Report* because the *Quarterly Coal Distribution Report* excludes waste coal and imports.

In 2008, we replaced the residential and commercial consuming sector with the commercial and institutional sector, which excludes the residential sector and the small amounts of coal used in the transportation fuel sector (primarily tourist steam railroads). The new Form EIA-3 also collects information on commercial and institutional coal distribution.

Previously, Form EIA-6A, *Coal Distribution Report—Annual*, did not identify refuse (also called waste coal)¹ that was included in anthracite and bituminous distributions. Now, waste coal receipts are collected and separately identified on Form EIA-923, and they are especially important in Pennsylvania and West Virginia. The *Annual Coal Distribution Report* excludes waste coal and small volumes of synthetic coal that may have been distributed after all synthetic coal plants were closed.

The modified Form EIA-7A now collects the coal exports previously reported on the discontinued Form EIA-6A. Coal exports may differ from the volumes reported in the *Quarterly Coal Report*, which we obtained from the U.S. Census Bureau, U.S. Department of Commerce, Form EM 545, *U.S. Exports of Domestic and Foreign Merchandise*. Survey results differ because of differences in survey frame populations, survey errors, assumptions, and definitions. Since 2010, we have added the estimates of coal exports data by brokers and traders to the *Annual Coal Distribution Report*.

Resolving missing data in the Form EIA-923 records

In reporting the 2023 data, a number of respondents submitted the Form EIA-923 with a blank or null entry for origin state, and a smaller number submitted without entering a transportation mode. By applying computerized algorithms and reviewing past plant receipts, we identified some of the coal-origin states and the likely method of transportation.

U.S. domestic coal distribution detailed data files

The 2023 *Annual Coal Distribution Report's* detailed data files are Microsoft Excel spreadsheets that provide aggregated volumes of coal by origin state, destination state, consumer type, and transportation mode. The volumes represent short tons of coal for the calendar year 2023 by each quarter.

Current and previous data files and reports are available on our website:

- [Quarterly Coal Distribution Report \(QCDR\)](#)
- [QCDR for previous quarters](#)
- [Annual Coal Distribution Report \(ACDR\)](#)
- [ACDR for previous years](#)

¹ *Waste coal*: Usable material that is a byproduct of previous coal processing operations. Waste coal is usually composed of mixed coal, soil, and rock (mine waste). Most waste coal is burned as-is in unconventional fluidized-bed combustors. For some uses, waste coal may be partially cleaned by removing some extraneous noncombustible constituents. Examples of waste coal include fine coal, coal obtained from a refuse bank or slurry dam, anthracite culm, bituminous gob, and lignite waste.

- = No data reported.

Note: Electric Power Sector in this report includes electric utilities, independent power producers, and electric utility combined heat and power plants. Data for all consumer categories are for coal receipts at those plants, with one exception. Coal distributed to industrial plants includes a small amount of coal consumed by coal preparation plants. Total may not equal sum of components because of independent rounding.

Sources: Electric Power Sector: Form EIA-923, "Power Plant Operations Report;" Industrial Plants (excluding Coke), Commercial and Institutional Plants, and Coke Plants: Form EIA-3, "Quarterly Survey of Industrial, Commercial & Institutional Coal Users" and Form EIA-7A, "Annual Survey of Coal Production and Preparation."

s = Quantity is less than 500 short tons, but value is included in any associated total.

- = No data reported.

Note: Electric Power Sector in this report includes electric utilities, independent power producers, and electric utility combined heat and power plants. Data for all consumer categories are for coal receipts at those plants, with one exception. Coal distributed to industrial plants includes a small amount of coal consumed by coal preparation plants. Total may not equal sum of components because of independent rounding.

Sources: Electric Power Sector: Form EIA-923, "Power Plant Operations Report;" Industrial Plants (excluding Coke), Commercial and Institutional Plants, and Coke Plants: Form EIA-3, "Quarterly Survey of Industrial, Commercial & Institutional Coal Users" and Form EIA-7A, "Annual Survey of Coal Production and Preparation."

Note: Electric Power Sector in this report includes electric utilities, independent power producers, and electric utility combined heat and power plants. Data for all consumer categories are for coal receipts at those plants, with one exception. Coal distributed to industrial plants includes a small amount of coal consumed by coal preparation plants. Total may not equal sum of components because of independent rounding.

Sources: Electric Power Sector: Form EIA-923, "Power Plant Operations Report;" Industrial Plants (excluding Coke), Commercial and Institutional Plants, and Coke Plants: Form EIA-3, "Quarterly Survey of Industrial, Commercial & Institutional Coal Users" and Form EIA-7A, "Annual Survey of Coal Production and Preparation."

West Virginia (Southern)	Truck	12	-	-	-	12
Destination State Total		7,406	-	78	-	7,484
	Railroad	7,384	-	78	-	7,462
	Truck	23	-	-	-	23

- = No data reported.

Note: Electric Power Sector in this report includes electric utilities, independent power producers, and electric utility combined heat and power plants. Data for all consumer categories are for coal receipts at those plants, with one exception. Coal distributed to industrial plants includes a small amount of coal consumed by coal preparation plants. Total may not equal sum of components because of independent rounding.

Sources: Electric Power Sector: Form EIA-923, "Power Plant Operations Report;" Industrial Plants (excluding Coke), Commercial and Institutional Plants, and Coke Plants: Form EIA-3, "Quarterly Survey of Industrial, Commercial & Institutional Coal Users" and Form EIA-7A, "Annual Survey of Coal Production and Preparation."

South Dakota

s = Quantity is less than 500 short tons, but value is included in any associated total.

- = No data reported.

Note: Electric Power Sector in this report includes electric utilities, independent power producers, and electric utility combined heat and power plants. Data for all consumer categories are for coal receipts at those plants, with one exception. Coal distributed to industrial plants includes a small amount of coal consumed by coal preparation plants. Total may not equal sum of components because of independent rounding.

Sources: Electric Power Sector: Form EIA-923, "Power Plant Operations Report;" Industrial Plants (excluding Coke), Commercial and Institutional Plants, and Coke Plants: Form EIA-3, "Quarterly Survey of Industrial, Commercial & Institutional Coal Users" and Form EIA-7A, "Annual Survey of Coal Production and Preparation."

U.S. Domestic and Foreign Coal Distribution by State of Origin

Domestic and Foreign Distribution of U.S. Coal by State of Origin, 2023
