

# Energy Efficiency is Critical for Governmental Facilities Asset Modernization

2018 EIA Energy Conference

# Energy Performance Contracting (EPC, ESPC, etc.)

- Use of future energy savings to improve our aging buildings now, without capital dollars.

- An agreement to improve the energy efficiency of a facility. The costs of the services are paid from the savings generated by the project.

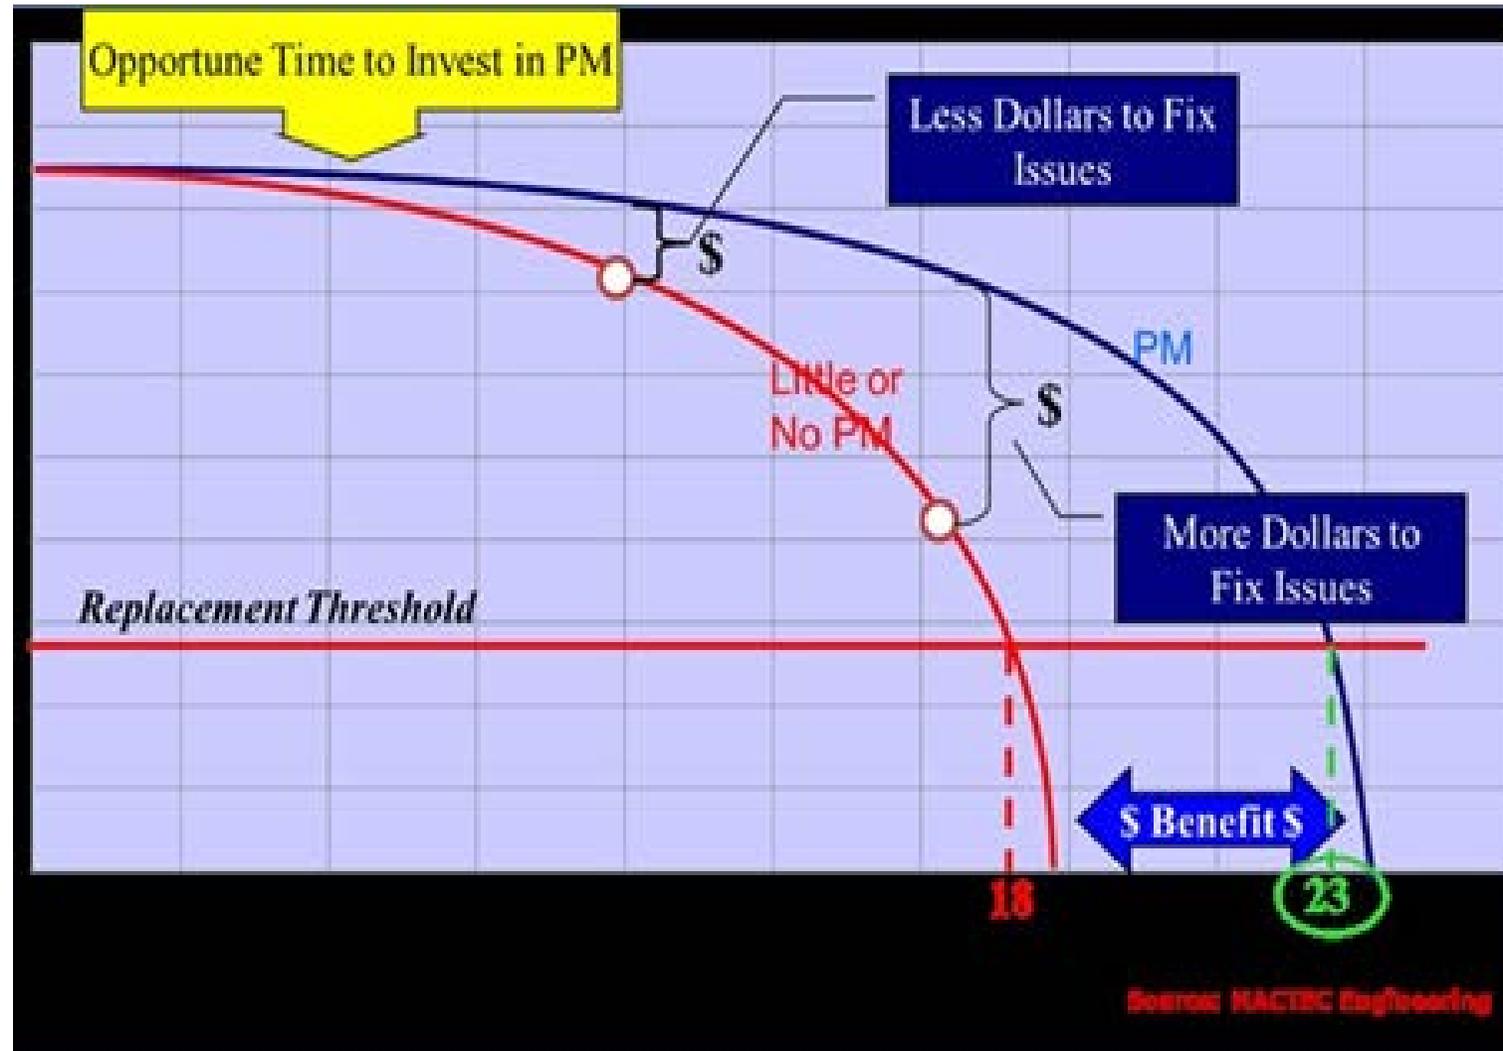

- Cost neutral – ***Guaranteed results***

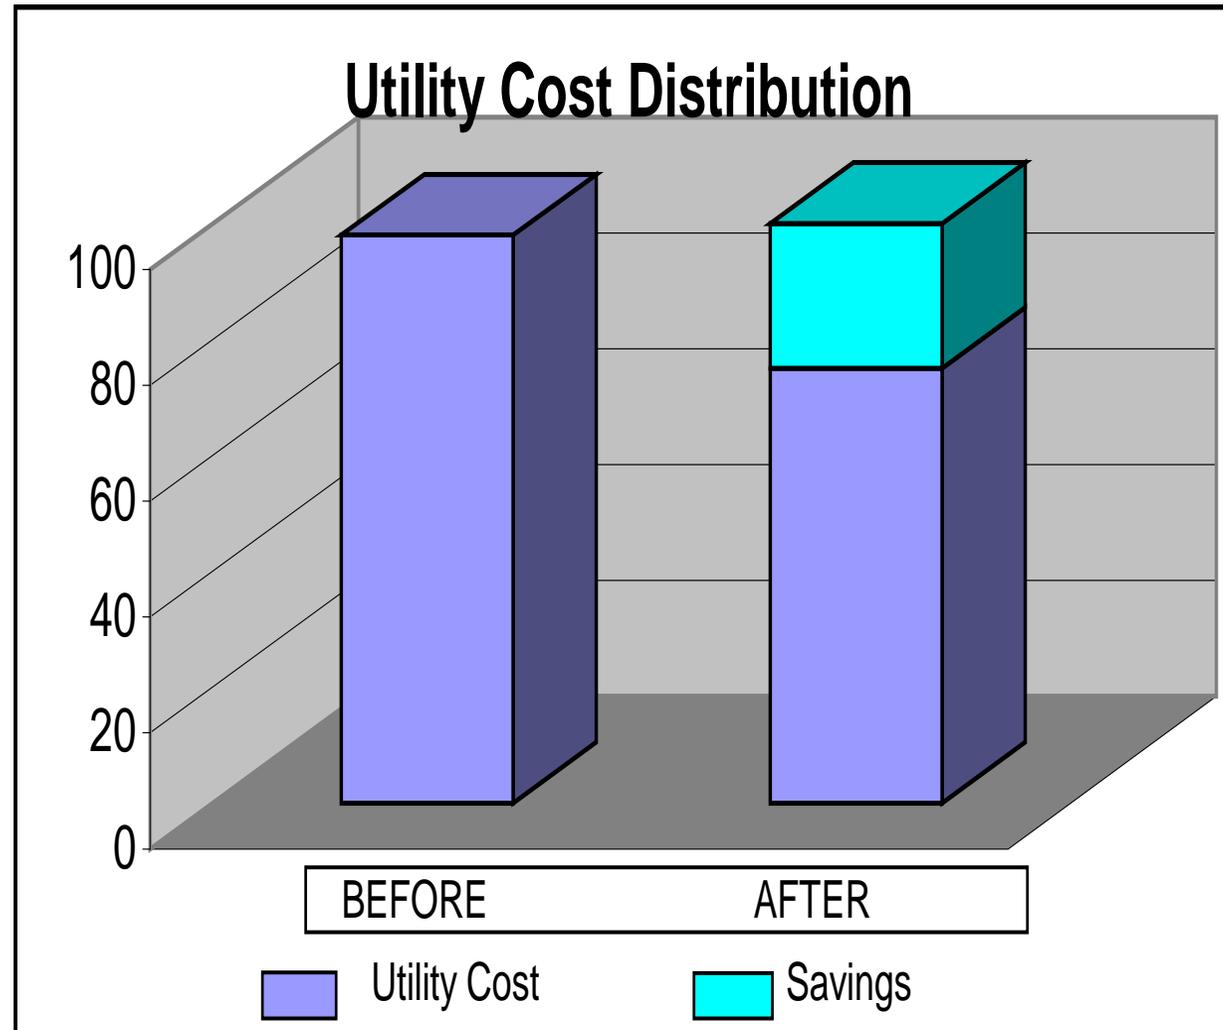

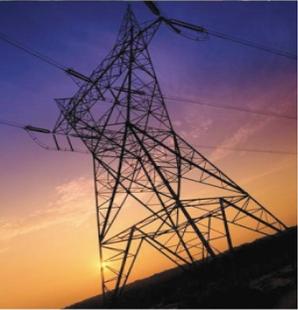

# Infrastructure Rapidly Aging while funding is decreasing

- \*Average age of school buildings in the US is 42 years!
- We are facing a critical infrastructure crisis

- Council of the Great City Schools, "Reversing the Cycle of Deterioration in the Nation's Public School Buildings," October 2014, p. 13.

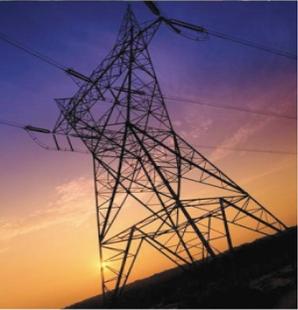

*“Everyone is paying  
for an Energy  
Performance  
Contract whether  
they do it or not!”*

# Where to Utilize

- Office Buildings
- School Facilities
- Wastewater Treatment Plants
- Correctional Facilities
- Health Facilities
- Traffic Control Lighting
- Educational Facilities
