

Released: December 2025
Next MECS will be fielded in 2027

Table 10.11 Number of establishments with capability to switch coal to alternative energy sources, 2022

Level: National data
Row: NAICS codes
Column: Energy sources
Unit: Establishment counts

NAICS code ^a	Subsector and industry	Coal ^b			Alternative energy sources ^c					
		Total consumed ^d	Switchable	Not switchable	Electricity receipts ^e	Natural gas	Distillate fuel oil	Residual fuel oil	HGL (excluding natural gasoline)	Other ^f
Total United States										
311	Food	20	D	19	0	D	0	0	0	0
3112	Grain and Oilseed Milling	6	D	5	0	D	0	0	0	0
311221	Wet Corn Milling and Starch Manufacturing	D	0	D	0	0	0	0	0	0

Data source: U.S. Energy Information Administration, Office of Energy Demand and Integrated Statistics, Form EIA-846, 2022 *Manufacturing Energy Consumption Survey*

Note: Totals may not equal sum of components because of independent rounding.

^a The Bureau of the Census classifies establishments using the 2022 North American Industry Classification System (NAICS).

^b These counts include only those establishments that reported this activity in 2022. Establishments for which only a portion of the total consumed fuel was reported as switchable contribute to the establishment counts in both the *switchable* and *not switchable* columns. Therefore, the sum of these establishment counts may be greater than the corresponding establishment count of the total number of establishments consuming the fuel.

^c *Alternative energy sources* consist of those energy sources that could have been substituted for coal during 2022. The quantities are expressed in thousands of short tons and therefore represent the quantity of coal that could have been displaced by the given alternative type of energy.

^d *Total consumed* represents those quantities (total inputs) of coal that were ascertained switchable or not switchable, plus an additional quantity for which the switching status was not ascertained.

^e *Electricity receipts* represent those quantities of electricity generated off the manufacturing establishment site and available at the site for consumption. It includes those quantities for which payment was made, quantities transferred in, quantities purchased and paid for by a central purchasing entity, and quantities for which payment was made in kind. It does not include electricity generated onsite. *Electricity receipts* have not been adjusted to account for any quantities that might have been resold or transferred out. The estimates include those quantities that were ascertained switchable or not switchable, plus an additional quantity for which the switching status was not ascertained.

^f *Other* includes all other types of energy that are not already identified that respondents indicated could have been consumed in place of coal.

* Estimate less than 0.5

D=Withheld to avoid disclosing data for individual establishments

Q=Withheld because relative standard error (RSE) is greater than 50%

NA=Not available
