Data source: U.S. Energy Information Administration, Office of Energy Demand and Integrated Statistics, Form EIA-457A of the *2024 Residential Energy Consumption Survey (RECS)*

Note: Because of rounding, data may not sum to totals. See RECS Terminology for the definitions of terms used in these tables.

^a *Total U.S.* includes all primary occupied housing units in the 50 states and the District of Columbia. Vacant housing units, seasonal units, second homes, military houses, and group quarters are excluded.

^b Total square footage includes all basements, finished or conditioned (heated or cooled) areas of attics, and conditioned garage space that is attached to the home. Unconditioned and unfinished areas in attics and attached garages are excluded. The square footage of the home is based on respondent reports. For households that did not report an exact square footage estimate, the square footage of the home was imputed based on a reported square footage range and/or characteristics of the home.

^c *Census urban-rural classification* is based on categories defined by the U.S. Census Bureau for the 2020 census. Urban areas are densely settled cores of blocks with at least 2,000 housing units or a population of at least 5,000. All other areas are rural.

^d The Building America program, sponsored by the U.S. Department of Energy, created these climate regions. We combined climate regions for this publication. The Subarctic region is included with data for *Very cold/Cold*.

Q=Data withheld because either the relative standard error (RSE) was greater than 50% or fewer than 10 households were in the reporting sample.

N=No households in reporting sample.

Preliminary data release date: March 2026

Preliminary data release date: March 2026

Relative standard errors (RSEs) for Table HC2.9 Structural and geographic characteristics of U.S. homes, by home size, 2024

RSEs for number of housing units

	Total U.S. ^a	Size of home in square feet ^b					3,000 or greater
		Less than 1,000	1,000 to 1,499	1,500 to 1,999	2,000 to 2,499	2,500 to 2,999	
All homes	P	1.03	1.73	2.16	2.26	3.30	2.13
Months hot tub is used							
0 to 3	4.17	15.72	12.45	11.68	10.84	14.70	7.77
4 to 7	9.37	Q	28.43	23.69	22.50	24.49	16.85
8 to 12	5.83	25.83	14.98	12.41	13.17	15.79	8.41
No hot tub	0.26	1.03	1.70	2.19	2.57	3.54	2.26
Hot tub heating fuel							
Electricity	4.77	17.11	13.00	9.63	10.05	12.65	8.13
Natural gas	9.36	34.16	36.03	31.28	21.07	27.54	13.05
Some other fuel	18.41	Q	Q	Q	Q	Q	23.62
Hot tub used zero months	5.77	21.15	13.49	14.87	15.88	20.25	11.12
No hot tub	0.26	1.03	1.70	2.19	2.57	3.54	2.26

Data source: U.S. Energy Information Administration, Office of Energy Demand and Integrated Statistics, Form EIA-457A of the *2024 Residential Energy Consumption Survey (RECS)*

Note: Because of rounding, data may not sum to totals. See RECS Terminology for the definitions of terms used in these tables.

^a *Total U.S.* includes all primary occupied housing units in the 50 states and the District of Columbia. Vacant housing units, seasonal units, second homes, military houses, and group quarters are excluded.

^b Total square footage includes all basements, finished or conditioned (heated or cooled) areas of attics, and conditioned garage space that is attached to the home. Unconditioned and unfinished areas in attics and attached garages are excluded. The square footage of the home is based on respondent reports. For households that did not report an exact square footage estimate, the square footage of the home was imputed based on a reported square footage range and/or characteristics of the home.

^c *Census urban-rural classification* is based on categories defined by the U.S. Census Bureau for the 2020 census. Urban areas are densely settled cores of blocks with at least 2,000 housing units or a population of at least 5,000. All other areas are rural.

^d The Building America program, sponsored by the U.S. Department of Energy, created these climate regions. We combined climate regions for this publication. The Subarctic region is included with data for *Very cold/Cold*.

P=Estimate is equal to the control total that is used in poststratification and is based on the U.S. Census Bureau's 2024 American Community Survey one-year estimates.

Q=Data withheld because either the relative standard error (RSE) was greater than 50% or fewer than 10 households were in the reporting sample.

N=No households in reporting sample.
