What drives crude oil prices?

An analysis of 7 factors that influence oil markets, with chart data updated monthly and quarterly

May 10, 2022 | Washington, DC
Crude oil prices react to a variety of geopolitical and economic events

- Iraq invades Kuwait
- Saudis abandon swing producer role
- Iran-Iraq War
- Iranian revolution
- Arab Oil Embargo
- Oil prices rise steeply
- OPEC cuts targets
- 9-11 attacks
- Global financial collapse
- OPEC production quota unchanged
- Global pandemic reduces oil demand
- U.S. spare capacity exhausted

Economic growth has a strong impact on oil consumption

% change (year-on-year)

Sources: U.S. Energy Information Administration, Oxford Economics
Changes in expectations of economic growth can affect oil prices

Note: Starting in January of each year, each line shows the expected forecast of GDP growth for the specified calendar year, which tends to move toward the actual realized growth outcome as the year progresses. Expectations continue to evolve into the next calendar year as revised GDP data become available (e.g., 2008 GDP expectations are revised even during 2009).
