- 1-10 Mbd
- 0.5-1 Mbd
- 0.05-0.5 Mbd
- <0.05 Mbd

The map represents a partial boundary outline for the Eastern great basin oil and gas fields. It shows the distribution of fields within the region, marked with different colors indicating various reserve classes. The map is created by the U.S. Energy Information Administration (EIA) and includes projections and data from various sources. The data is informed by subsurface structural information and is subject to revisions. The boundaries shown on the map are not necessarily definitive and may be subject to change.
