^a We reduced the reported volume of natural gas imported by pipeline from Canada by the amount of natural gas liquids removed from the saturated natural gas carried by the Alliance Pipeline. The Alliance Pipeline moves saturated natural gas from the border to a processing plant in Illinois. After the adjustment, volumes of imported natural gas on this pipeline are on the same physical basis as other reported volumes of pipeline imports.

^R Revised data.

Note: Prices for liquefied natural gas (LNG) imports are reported as landed (when received at the terminal) or tailgate (after regasification at the terminal). Generally, the reporting of LNG import price varies by point of entry, and the average prices are calculated from a combination of both types of prices. Totals may not equal sum of components because of independent rounding. Prices are in nominal dollars. Total imports prices represent the weighted average of the imports for each country. CNG refers to compressed natural gas.
