^a Balancing item volumes are equal to total disposition (net storage changes plus natural gas plant liquid [NGPL] production plus consumption) minus total supply (marketed production plus net interstate movements plus net movements across U.S. borders plus supplemental gas supplies).

^b Positive numbers denote net receipts; negative numbers denote net deliveries.

^c Negative numbers indicate withdrawals from storage in excess of additions to storage and are, therefore, additions to total supply.

* Volume is less than 500,000 cubic feet.

^e Estimated data.
