Notes:
- Totals may not equal sum of components due to independent rounding. See Appendix A for EIA methodology for Federal offshore production. Some states/areas whose data are labeled "not available" are assumed to have negligible quantities of gas (less than 500,000 cubic feet).
- Sources: Gross withdrawal volumes in Florida fluctuate year to year because nonhydrocarbon gases are occasionally included in gross withdrawals. Production data for all natural gas producing states were obtained directly from state and federal agencies, state-sponsored public record databases, or commercial data vendors such as PointLogic Energy and Enverus DrillingInfo. Other sources of production data include responses to the mandatory form EIA-914, Monthly Crude Oil, Lease Condensate, and Natural Gas Production Report. Additional data derived from Form EIA-816, Monthly Natural Gas Liquids Report; Form EIA-64A, Annual Report of the Origin of Natural Gas Liquids Production; the Bureau of Safety and Environmental Enforcement; Form EIA-23, Annual Survey of Domestic Oil and Gas Reserves; and EIA estimates based on historical data.
