Introduction

The U.S. Energy Information Administration (EIA), U.S. Department of Energy (DOE) is responsible for collecting and reporting energy data. Therefore, it is mandatory for Respondents to furnish requested energy information on all EIA survey forms that are applicable to them for each reporting period.

Each year, the EIA sends a copy of their Forms (including form completion instructions) to all Respondents. The instructions fully explain who is required to file the given form, and definitions are provided to clarify the types of data being requested. The *Natural Gas Information Annual Respondent Query System* (henceforth referred to as the *Query System*) shows Annual Natural Gas Supply and Disposition and Underground Gas Storage data collected from several of these forms, down to the company level. Data are displayed in various formats from three different surveys:

1. Form EIA-176, *Annual Report of Natural and Supplemental Gas Supply and Disposition*: Collects data on the supply and disposition of natural gas in the United States.
2. Form EIA-191, *Monthly Underground Gas Storage Report*: Previously, two Forms were used for reporting underground natural gas storage data. One was a "Monthly" report, and one was an "Annual" report. These monthly and annual reports for "Underground Gas Storage" were known as Forms EIA-191M and EIA-191A, respectively. The EIA-191A was discontinued in 2013; presently, only the Monthly version of the form is used. It is known simply as the EIA-191, *Monthly Underground Gas Storage Report*.
3. Form EIA-757, *Natural Gas Processing Plant Survey*: Collects detailed plant-level information on the capacity, status, and operations of natural gas processing plants to monitor supply constraints during periods of disruption due to a natural disaster, such as a hurricane.

The Query System runs within the user's Internet browser. It requires no download or installation to use. All functionality is available from a single, easy-to-use main page.

Hardware/Software Requirements

Because the Query System is a web-based system, no download or installation is necessary. All that is needed to run the Query System is a PC with up-to-date web-browsing software (such as Microsoft Edge, Mozilla Firefox, or Google Chrome) and an Internet connection.

Running the Query System

The Query System is available via a link on the EIA Natural Gas (NG) web page. The direct web address is noted below: <https://www.eia.gov/naturalgas/hgqs/>

Report Field

The screenshot shows the 'Report' field dropdown menu expanded. The menu lists various report options: '176 Natural Gas Deliveries', '176 Natural Gas Supply Items', '176 Natural Gas Other Disposition Items', '176 Type of Operations and Sector Items', '176 Continuation Text Lines', '176 Company List', '191 Field Level Storage Data (Annual)', '191 Field Level Storage Data (Monthly)', '757 Processing Capacity', and '176 Custom Report (User-defined)'. A red box highlights the '176 Natural Gas Deliveries' option, with a red line pointing to a text box below.

Title of Report currently in view

Click this field's down arrow to expand a drop-down list of predefined reports.

This screenshot shows the same interface as above, but with the '176 Natural Gas Deliveries' report selected. A pie chart displays the 2022 total volume breakdown: Electric Power Volume (41.9%), Industrial Volume (29.1%), Commercial Volume (11.9%), Residential Volume (16.9%), and Vehicle Fuel Volume (0.2%). Below the chart is a data table with columns for Area, Company, Item, and years 2019-2022. A text box at the bottom right provides contact information: 'For assistance or questions regarding 176 data, please contact Michael Kopalek at Michael.Kopalek@eia.gov or (202) 586-4001'.

There are ten different reports:

1. 176 Natural Gas Deliveries (see example on pg. 18)
2. 176 Natural Gas Supply Items (similar to Natural Gas Deliveries; see example on pg. 18)

3. 176 Natural Gas Other Disposition Items (similar to Natural Gas Deliveries; see example on pg. 18)
4. 176 Type of Operations and Sector Items (see example on pg. 19)
5. 176 Continuation Text Lines (see example on pg. 20)
6. 176 Company List (see example on pg. 20)
7. 191 Field Level Storage Data (Annual) (see example on pg. 23)
8. 191 Field Level Storage Data (Monthly) (see example on pg. 23)
9. 757 Processing Capacity (see example on pg. 24)
10. 176 Custom Report (see example on pg. 21)

Years Field

Click this arrow to expand a drop-down list of years for which data are available. Data displayed in the grid will be according to the range of years selected in these fields.

NOTE: The 176 Company List report is the only predefined report that is not equipped with the Years fields (i.e., start and end years). This is because it is designed to report on company names only.

1 / 204 (4670 rows) For assistance or questions regarding 176 data, please contact Michael Kopalek at Michael.Kopalek@eia.gov or (202) 586-4001

NOTE: As the yearly columns change, so too does the pie chart. It will always show the most recent year. For example, if the selected years were 2019 to 2022, the chart would auto-update to show 2022 data (assuming 2022 is the most recent year for the time frame).

Pie Chart only appears on the Natural Gas Deliveries report

Moving the cursor over the pie reveals volumes of the type of deliveries. For example, moving the cursor over the Industrial piece of the pie reveals the Industrial Volume for the year displayed.

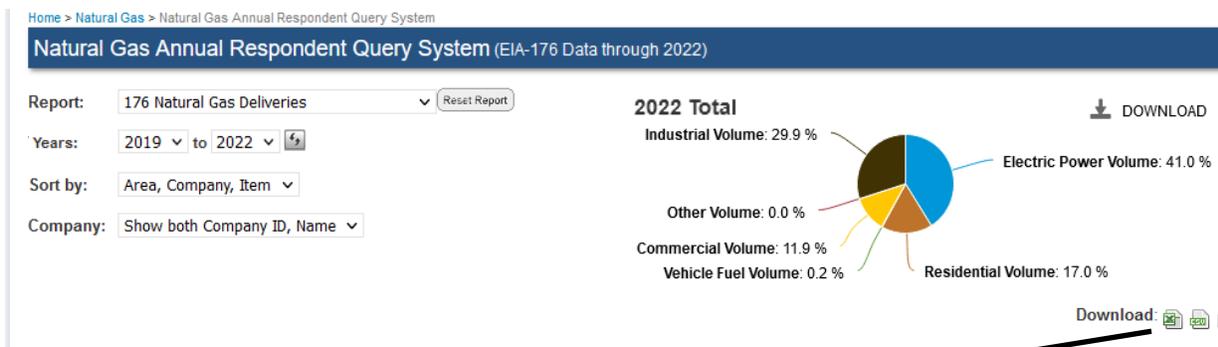

Click on the pie chart to view the **NG Deliveries trend graph**. Image files and data files can be downloaded using the "DOWNLOAD" button in the upper right corner of the graph (and above the pie chart). Click on the Close button (X), located in the upper-right corner of the graph, to close the graph window.

Click "DOWNLOAD" to download an image, PDF, or data file version of the graph

Download Functionality: Three Icons

The **Download icons** are located at the top, right-side of the Data Table grid. These icons allow users to download data in a comma separated value (csv) format.

1. The leftmost icon is used to download the data currently displayed in the Data Table grid to a Microsoft (MS) Excel file. The file is named **176 Natural Gas Deliveries.xlsx**, and will be loaded to your "Downloads" folder when you click the icon. **NOTE:** ONLY the data rows appearing on the grid will transfer to the Excel spreadsheet.
2. The middle icon is used to download the grid data contents on the grid to a delimited text file (.csv). The file is named **export.xlsx**, and will be loaded to your "Downloads" folder when you click the icon.
3. The rightmost icon is used to download the ENTIRE dataset (*not* restricted to only what is visible on the grid) to a zipped (.zip) text file. The file is named **all_ng_data.zip**, and will be loaded to your "Downloads" folder when you click the icon.

The format for these downloaded spreadsheets, identifying the contents of each data column, is described in Appendix A, "Data Download Columns." A sample of the 176 Natural Gas Deliveries spreadsheet is shown below:

 Independent Statistics and Analysis U.S. Energy Information Administration		OMB No. 1905-0175 Expiration Date: 07/31/2027 Version No.: 2024.01 Burden: 12.0 hours
ANNUAL REPORT OF NATURAL AND SUPPLEMENTAL GAS SUPPLY & DISPOSITION FORM EIA-176		
This report is mandatory under 15 U.S.C. §772. Failure to comply may result in criminal fines, civil penalties and other sanctions as provided by law. For the sanctions and the provisions concerning the confidentiality of information submitted on this form, see instructions. 18 U.S.C. §1001 makes it a criminal offense for any person knowingly and willingly to make to any Agency or Department of the United States any false, fictitious, or fraudulent statements as to any matter within its jurisdiction.		
PART 1. RESPONDENT IDENTIFICATION DATA		PART 2. SUBMISSION INFORMATION
REPORT PERIOD: Year: <input type="text" value="2"/> <input type="text" value="0"/> <input type="text"/>		A completed form must be filed by March 1 Form may be submitted using Secure File Transfer: https://signon.eia.doe.gov/upload/noticeoog.jsp Questions? Please contact the EIA Survey Support Team using the following communication methods: By email: EIA4USA@eia.gov By phone: 1-855-EIA-4USA (1-855-342-4872) [Monday through Friday, 8:00 a.m. to 6:00 p.m. eastern time]
EIA ID NUMBER: <input type="text" value="1"/> <input type="text" value="7"/> <input type="text" value="6"/> <input type="text"/>		
If this is a resubmission, enter an "X" in the box: <input type="checkbox"/>		
If any Respondent Identification Data has changed since the last report, enter an "X" in the box: <input type="checkbox"/>		
Company Name: _____ Operations in (State): _____ Contact Name: _____ Phone No.: _____ Ext: _____		

User Guide Link

Click on the **User Guide** link to instantly open this publication: *Natural Gas Information Annual Respondent Query System User's Guide*.

Definitions, Sources, & Notes Link

Click on this link to display an abundance of supplemental, reference material—a sample is shown below.

. Definitions

Key Terms	Definition
Commercial Consumption	Gas used by nonmanufacturing establishments or agencies primarily engaged in the sale of goods or services. Included are such establishments as hotels, restaurants, wholesale and retail stores and other service enterprises; gas used by local, State, and Federal agencies engaged in nonmanufacturing activities.
Distribution Use	Natural gas used as fuel in the respondent's operations.

. Explanatory Notes

Please note that not all sector items collected on the EIA-176 will match the [Natural Gas Annual](#).

Sector Item	States where published data are from another source	Source of Published Items
Residential	FL, GA, MD, NJ, NY, OH, PA, VA	Published price for these States include data from the EIA-910, "Monthly Natural Gas Marketer Survey" as a component of prices. Volumes are from EIA-176 respondents.
Commercial	DC, GA, MD, MI, NY, OH, PA, VA	Published price for these States include data from the EIA-910, "Monthly Natural Gas Marketer Survey" as a component of prices. Volumes are from EIA-176 respondents.

Full Screen Mode

Note that the double arrow icon on the right () switches your view to “full-screen” mode. In full-screen mode, only the data table is displayed in your browser – the report title, clickable drop-downs, and the pie chart disappear – allowing you to see many more records at one time. Full-screen mode looks like this:

Exit Fullscreen mode

U.S. Total	Total of All Companies	Other Volume	36,633	23,339	48,217	

 (4674 rows) For assistance or questions regarding 176 data, please contact Michael Kopalek at Michael.Kopalek@eia.gov or (202) 586-4001

Reset Report

When activated, the **Reset Report** button clears away all modifications that might have been administered to the report and returns the display to its default settings.

Swap

Typically, date/time data are displayed chronologically, i.e., data grouped in columns according to given years are displayed (from left to right) in ascending order--the START Year being the least recent (or oldest) year, while the END Year reflects the most recent.

Click on the **Swap** button to reverse the order of the dated (year) columns. Data can be displayed in either ascending order or descending order. Whatever current order is displayed, click the **Swap** button to reverse it.

Counters & Arrows

In the illustration above, the **page counter** reveals: 1/199. This means that there are 199 pages to this particular report, and the first page (1) is the page that is currently in view. In addition to the page counter, a **row counter** is revealing that there are 4,774 rows of data contained in this report.

The **page directional arrows** provide users with the option of either incrementally stepping through pages one at a time  OR (with a single click) scrolling all the way back to the first page of the report  OR conversely, scrolling all the way forward to the last page (using just one click) .

Filter: Area

Area refers to a United States geographical area. To filter for specific “areas,” so that only those chosen areas are displayed, expand the Area drop-down, and click the check box adjacent to a given area(s).

2022 Total
 Vehicle Fuel Volume: 0.2 %
 Residential Volume: 16.9 %
 Other Volume: 0.0 %
 Electric Power Volume: 41.9 %
 Commercial Volume: 11.9 %
 Industrial Volume: 29.1 %

Area	Volume	2019	2020	2021	2022
U.S. Total	Residential Volume	5,018,518,521	4,674,456,169	4,716,658,154	4,964,166,166
U.S. Total	Commercial Volume	3,514,565,858	3,162,663,893	3,289,075,622	3,509,075,622
U.S. Total	Industrial Volume	8,416,660,208	8,212,977,100	8,374,672,351	8,536,812,351
U.S. Total	Electric Power Volume	11,596,874,362	11,510,407,146	11,341,637,439	12,309,512,439
U.S. Total	Vehicle Fuel Volume	50,789,707	46,875,819	52,334,019	63,812,019
U.S. Total	Other Volume	36,633	23,339	48,217	48,217
Alabama	Residential Volume	30,615,524	28,178,482	32,225,876	30,415,524
Alabama	Commercial Volume	24,874,649	22,905,919	25,711,053	25,711,053
Alabama	Industrial Volume	217,039,988	209,124,319	233,071,661	212,988,988
Alabama	Electric Power Volume	490,120,456	457,068,138	460,073,798	553,368,138
Alabama	Vehicle Fuel Volume	62,192	48,160	60,234	60,234

The drop-down menu displays the **U.S. Total** option at the top. Selecting the checkbox for U.S. Total collects the metrics from all of the geographical areas, sums them, then displays the output in terms of total values for the combined areas.

Following the U.S. Total option, each individual Area is listed in alphabetical order. Users can individually click as many Areas as desired. When finished, the **OK** button commits the entries, and the Query System populates the grid with the appropriate data for all chosen Areas.

When the user wants to include many Areas in the displayed report, the **Select All** button at the bottom of the drop-down list proves very handy. Sometimes it is easier and faster to “deselect” items than it is to scroll-and-click through a lengthy list of choices. In other words, with the **Select All** button, users prompt the interface to check **all** of the Area checkboxes. Then, users can uncheck any boxes that they do not want included in the report.

The filter feature also gives users the ability to type text to filter on. Any row containing the text will be displayed. In addition, each piece of text can be separated with a semi-colon and that will act as an ‘OR’ condition.

NOTE: Along with the **Select All** button, there is also a **Clear All** button next to it, as shown below.

This allows users to “unselect” any checked items. When all desired Areas are selected, click **Submit** to activate the Filter.

Filter: Company

Company refers to the actual company names within the energy industry (i.e., Respondent entities within the frame for the EIA-176 and/or EIA-191 surveys). As described in the previous section, this **Company** filter works the same way.

The top menu option, if selected, totals the output for all of the companies; the rest of the options are displayed in alphabetical order and used for individual company selection. This drop-down list is also equipped with **Select All**, **Clear All**, and **Submit** buttons that work in the same manner as previously described (refer to the instructions for *Filter: Area*).

Filter: Item

Item offers six reporting options (see the illustration below). These represent the different energy types measured by volume. This **Item** filter works the same way as documented for the other filters. A report can be generated to show all available data for the various Items or only certain, selected ones.

Like the other filter categories, this drop-down is equipped with **Select All**, **Clear All**, and **Submit** buttons. For details on how these buttons operate, refer to the instructions for *Filter: Area*.

Select All Clear All Submit

Item's Unique Display Feature: Referencing the Location of an Item on the EIA Form

Table cells under the Item column offer a handy feature. Moving the cursor over a cell renders a reference (pop-up hint) describing where the given item can be found on the Form EIA-176. For example, a pop-up that reads as, **[10.1 + 11.1]** is conveying that the subject (in this case, "Residential Volume") is located on lines 10.1 and 11.1 of the Form EIA-176.

Area	Company	Item	2018
Nebraska	BLACK HILLS ENERGY	Vehicle Fuel Volume	78,236
Wyoming	BLACK HILLS ENERGY	Residential Volume	2,525,164
Wyoming	BLACK HILLS ENERGY	Commercial Volume	2,313,381
Wyoming	BLACK HILLS ENERGY	Industrial Volume	9,105,950

ITEM DESCRIPTION	NUMBER OF CUSTOMERS	VOLUME (Mcf @ 14.73 psia and 60° F)	REVENUE (including taxes) (whole dollars)		NOTES*	
			E	F	E	F
10.0 Deliveries of natural gas that you do own to end-use consumers within the report State (for assistance in determining proper categorization of customers, see page 3 of instructions)						
10.1 Residential						
10.2 Commercial						
10.3 Industrial						
10.4 Electric power						
10.5 Vehicle fuel						
10.6 Other (not included in above categories) (Specify type)						
11.0 Deliveries of natural gas that you do not own to end-use consumers within the report State (for assistance in determining proper categorization of customers, see page 3 of instructions)						
11.1 Residential						
11.2 Commercial						
11.3 Industrial						
11.4 Electric power						
11.5 Vehicle fuel						
11.6 Other (not included in above categories) (Specify type)						

NOTE: This same reference feature is also available for Company Name ID. For example, moving the cursor over a Company Name displays that company's unique EIA-176 ID number (176XXXXSS).

Data Table Revealing Output from Sample Query

Having set all of the query parameters, the output is displayed in a tabular (column-row) format referred to as the **Data Table** (or grid).

Data Table

Navigation: |< << 3 / 204 >> >| (4670 rows) For assistance or questions regarding 176 data, please contact Michael Kopalek at Michael.Kopalek@eia.gov or (202) 586-4001

Bi-directional Arrows: Ascending & Descending

Refer to the **Data Table** pictured below. There are unseen **bi-directional arrows** in the header cell of each column, which appear when you click on the name of the column. When you do so, you activate the sorting function, and the arrow appears to indicate how the data are sorted (either ascending (represented with an arrow pointing up) or descending (shown with a down arrow) order). Among the columns that can be sorted in this manner are the Year columns, i.e., those labeled as 2019, 2020, 2021, and 2022 below. On the sample screen below, **2019** has been selected by the user and therefore the displayed data are shown in order from greatest to least based on 2019 volumes. The arrow is circled in red. To change it so that the rows are shown from least to greatest, click the arrow circled below and the data are shown in ascending order. If you then click it again, the sort for that column is turned off and the arrow once again disappears.

Data Table

Clicking on a bi-directional arrow overrides the sort selected using the “Sort By” field. The field selected with the bi-directional arrow automatically becomes the item by which the data are sorted.

For example, on the “176 Natural Gas Deliveries” screen, if you selected “Area, Company, Name” in the Sort By field, the displayed data is sorted in that order.

However, if you next click the bi-directional arrow above any of the “Year” columns, then the displayed data gets sorted by its data value for the selected year, highest-to-lowest (or lowest-to-highest).

The “Area, Company, Name” sort is now ignored *until you select a new Sort By option*, at which time the Sort By field then overrides the previously selected bi-directional arrow field.

The first three reports listed on the Reports drop-down are:

176 Natural Gas Deliveries. The information pertaining to natural gas deliveries can be found on lines 10.0 and 11.0 of Form EIA-176.

176 Natural Gas Supply Items. The information pertaining to natural gas supply can be found in Part 4 of Form EIA-176.

176 Natural Gas Other Disposition Items. The information pertaining to other natural gas disposition items can be found on lines 12.0 through 20.0 of Form EIA-176.

These three reports' appearance and functionality are similar, with data displayed in columns by year. The remaining four EIA-176 reports are formatted differently and described in the sections that follow.

176 Types of Operations and Sector Items

This information can be found on the Form EIA-176 within Part 3.

176 Custom Report (User Defined)

The **Custom Report** is the tenth and final menu option on the *Report* drop-down. As its name implies, this option allows users to customize their report by being able to pick (by line number and item name) which EIA-176 elements to display.

To create a custom report, first select the **Custom Report (User Defined)** option from the *Report* drop-down. The display will look similar to the illustration below. Notice the **Choose Items** button circled in red. The Data Table initially displays the message “No Rows to Show” as the user has not yet selected any items to include in the report.

Click on the **Choose Items** button to display the menu of EIA-176 data items shown below (this is a pick list). Highlight line item(s) from this pick list by simply clicking on the applicable title.

- [B.1] Alternative Fuel Fleet?(1=Yes,0=No)
- [B.2] Alternative Fleet Size
- [C.1] Customer Choice: Residential (Eligible)
- [C.2] Customer Choice: Residential (Participating)
- [D.1] Sales/Acquisitions?(1=Yes,0=No)
- [01.1] Production Volume
- [01.2] Synthetic Production Volume
- [02.1] Underground Storage Withdrawals Volume
- [02.2] LNG Storage Withdrawals Volume
- [02.3] Above Ground Storage Withdrawals Volume
- [03.0] Receipts from State or US border Volume
- [04.0] Receipts at Citygate Volume
- [04.1] Receipts at Citygate Delivered to Sales Customers Cost
- [04.1] Receipts at Citygate Delivered to Sales Customers Volume
- [04.2] Receipts at Citygate Delivered to Transportation Customers Volume
- [05.0] Other Receipts Volume
- [06.0] Supplemental Gaseous Fuels Volume
- [07.0] Total Supply Volume
- [08.0] LNG Inventory at end of Year Volume
- [08.1] LNG Facility Year End Volume
- [08.1] LNG Facility Year End Capacity
- [08.2] Marine Terminal Facility Year End Volume
- [08.2] Marine Terminal Facility Year End Capacity
- [09.0] Heat Content of Delivered Gas (BTU/cf)
- [10.1 + 11.1] Residential Volume

Display selected items in a table

(To select multiple items, hold down the Ctrl or Shift key)

NOTE: To select multiple, non-consecutive line items, hold down the **<Ctrl>** key while clicking on the desired titles. To select a group of consecutive line items, hold down the **<Shift>** key while highlighting (blocking) a range of titles. Note that you can only select up to 20 line items at once. Selecting more than 20 items will yield no query results.

Next, click on the button labeled, **Display selected items in a table**. At this point the Query System generates a custom report—displaying a report layout specific to only the line items selected. You may then filter the items as you can in other reports; note that the drop-down list shown below only displays the Items that were chosen from the “Display selected items...” list.

EIA-757 Report

The U.S. Energy Information Administration's (EIA) Form EIA-757, *Survey of Natural Gas Processing Plants*, is used to collect information on the capacity, status, and operations of natural gas processing plants and to monitor constraints of natural gas processing plants during periods of supply disruption in areas affected by emergency situations, such as a hurricane.

EIA is responsible for collecting and reporting on this energy data. Therefore, it is mandatory for Plant Respondents to furnish the processing capacity information applicable to them on the survey for each reporting period (occurring approximately once every three years).

757 Processing Capacity

This EIA-757 report shows plant capacity and flow; BTU content; dry gas storage capacity; and natural gas liquid storage capacity down to the plant/company level. Such data are collected via the EIA-757 survey and displayed in tabular format, as shown below.

Report:

Years: to

Download:

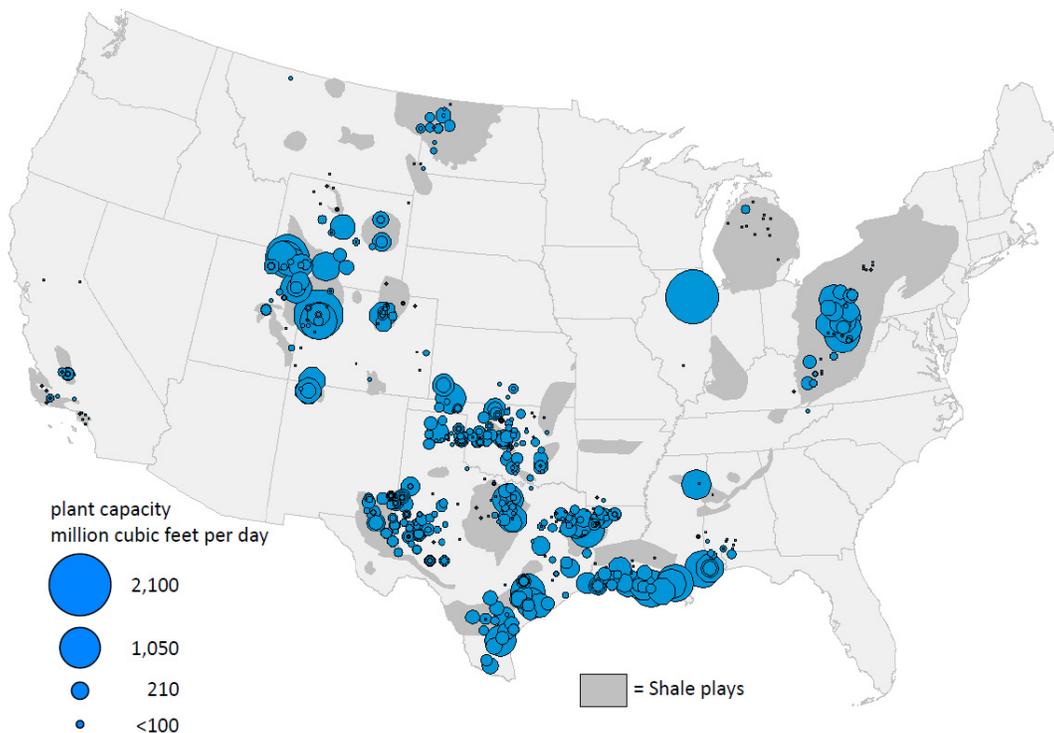

EIA Analyst Internal Version **757 Data last updated: Jan 31, 2019 at 2:56 PM**

(Volumes in Million Cubic Feet per day, except storage -- Dry Gas:Million Cubic Feet, Liquids:Barrels) [User Guide](#) • [Definitions, Sources, & Notes](#)

Click on the **User Guide** link to instantly open this publication: *Natural Gas Information Annual Respondent Query System*.

Definitions, Sources, & Notes Link: (EIA-757)

Click this link to display an abundance of supplemental, reference material—such as that illustrated below.

. Definitions

Key Terms	Definition
Commercial Consumption	Gas used by nonmanufacturing establishments or agencies primarily engaged in the sale of goods or services. Included are such establishments as hotels, restaurants, wholesale and retail stores and other service enterprises; gas used by local, State, and Federal agencies engaged in nonmanufacturing activities.
Distribution Use	Natural gas used as fuel in the respondent's operations.

. Explanatory Notes

Sector Item	States where published data are from another source	Source of Published Items
Residential	FL, GA, MD, NJ, NY, OH, PA, VA	Published price for these States include data from the EIA-910, "Monthly Natural Gas Marketer Survey" as a component of prices. Volumes are from EIA-176 respondents.
Commercial	DC, GA, MD, MI, NY, OH, PA, VA	Published price for these States include data from the EIA-910, "Monthly Natural Gas Marketer Survey" as a component of prices. Volumes are from EIA-176 respondents.

Display's Buttons, Counters, and Arrows: (EIA-757)

There are two important buttons on the main display: **Reset Report** and **Swap**. Furthermore, there are page and row counters, accompanied by directional arrows, along the bottom.

Report: 757 Processing Capacity Reset Report

Years: 2017 to 2017 ↕

Release Date: September 2015 | Next Release Date: October 2018

Download:

(Volumes in Million Cubic Feet per day, except storage – Dry Gas: Million Cubic Feet, Liquids: Barrels)

[User Guide](#) • [Definitions, Sources, & Notes](#)

Year	Report State	Plant Name	Owner Company	Operator Company	County Name	Zip
2014	AL	Atmore	Gas Processors Inc	Gas Processors Inc	Escambia	
2014	AL	Big Escambia Creek	Escambia Operating Compan...	Eagle Rock Energy G & P, LLC	Escambia

For assistance or questions regarding 757 data, please contact Michael Kopalek at Michael.Kopalek@eia.gov or (202) 586-4001

Reset Report: (EIA-757)

When activated, the **Reset Report** button clears away all modifications that might have been administered to the report and returns the display to its default settings.

Swap: (EIA-757)

Typically, date/time data are displayed chronologically, i.e., data grouped in columns according to given years are displayed (from left to right) in ascending order--the START Year being the least recent (or oldest) year, while the END Year reflects the most recent.

Click on the **Swap** button to reverse the order of the dated (year) columns. Data can be displayed in either ascending order or descending order. Whatever current order is displayed, click the **Swap** button to reverse it. **NOTE: Currently, only current year data are available. Consequently, as of this writing, the Swap feature cannot be demonstrated.**

Counters & Arrows: (EIA-757)

In the previous illustration, the **page counter** reveals: 6/26. This means that there are 26 pages to this particular report, and the first page (1) is the page that is currently in view. In addition to the page counter, a **row counter** is revealing that there are 551 record rows of data contained in this report.

The **page directional arrows** provide users with the option of either incrementally stepping through pages one at a time  OR (with a single click) scrolling all the way back to the first page of the report  OR conversely, scrolling all the way forward to the last page (using just one click) .

Filters in Columns: (EIA-757)

Looking at the Query System interface, the first seven columns within the grid are equipped with a filter function. Observe the diagram below, which illustrates the full complement of data columns for the EIA-757 Processing Capacity. Notice the three-line symbol within the headings of the first seven columns.

The first column in the grid is the Year column (self-explanatory), followed by the Report State column. The filter  renders a drop-down menu from which users can select certain states for custom reporting/viewing, thus, eliminating the display of data for all others.

Natural Gas Annual Respondent Query System (EIA-757 Data through 2017)

Report: 757 Processing Capacity Reset Report

Years: 2017 to 2017 ↻

Release Date: September 2015 | **Next Release Date:** October 2018

Select All Clear All Submit

The states are listed in alphabetical order. Users can individually click as many states as desired. The **Select All** button auto-selects every state for display.

When many choices are sought for a report, the **Select All** button proves very handy. Sometimes it is easier and faster to “deselect” items than it is to scroll-and-click through a lengthy list of choices. In other words, with the **Select All** button, users prompt the interface to check all of the checkboxes. Then, users can uncheck any boxes that they do not want included in the report. Click the **Clear All** button to deselect all selected items.

Once all desired state(s) are selected, click the **Submit** button to commit the entries, and the Query System will populate the grid with the appropriate data for those selected states ONLY.

Appendix A
Data Download Columns

This appendix describes the data shown in each column of the All Data download file:

YEAR	ID	ATYPE	RKEY	AREA1	LINE	VALUE	REF_CODE	REF_NAME
Reporting year	Company ID	Units*	Unique sequence number for the continuation lines for a specific item	State or Country abbreviation	Corresponding Line Number on Form EIA-176**	Numeric value	Code associated with continuation cells (lines 3.0, 6.0, 12.6, 14.0 & 18.4)	Company name, type of gas, etc., associated with continuation cells (lines 3.0, 6.0, 12.6, 14.0 & 18.4)

*Units:

- VL = Volume
- PR = Price
- PC = Percentage
- CS = Cost
- CT = Count
- YA = Capacity (Lines 8.1 & 8.2)

**Line number: 0110 = Line 1.1; 1240 = Line 12.4. Most of the line numbers are straightforward but a few do not use this easy-to-decipher format (data found in Part 3 of the form, for example). The complete list of LINE items is shown below:

LINE	Description	LINE	Description
0003	Natural Gas Pump Price	1110	Residential Transport
0005	Customer Choice: Residential (Eligible)	1120	Commercial Transport
0006	Customer Choice: Residential (Participating)	1130	Industrial Transport
0007	Customer Choice: Commercial (Eligible)	1140	Electric Power Transport
0008	Customer Choice: Commercial (Participating)	1150	Vehicle Fuel Transport
0009	Sales/Acquisitions?(1=Yes,0=No)	1160	Other Transport
0010	Distribution Territory Counties	1210	Facility Space Heat
0110	Production	1216	Other
0120	Synthetic Production	1220	New Pipeline Fill
0210	Underground Storage Withdrawals	1230	Pipeline dist/storage compressor use
0220	LNG Storage Withdrawals	1240	Vaporization/liquefaction/LNG fuel
0230	Above Ground Storage Withdrawals	1250	Vehicle fuel used in company fleet
0300	Receipts from State or US border	1260	Other
0400	Receipts at Citygate	1310	Underground Storage Injections
0410	Receipts at Citygate Delivered to Sales Customers	1320	LNG Storage Injections
0420	Receipts at Citygate Delivered to Transportation Customers	1330	Above Ground Storage Injections
0500	Other Receipts	1400	Deliveries out of State
0600	Supplemental Gaseous Fuels	1500	Lease Use
0700	Total Supply	1600	Returns for Repress./Reinjection
0800	LNG Inventory at end of Year	1700	Losses from Leaks
0810	LNG Facility Year End Capacity	1810	Disposition to Distribution Companies
0820	Marine Terminal Facility Year End	1820	Disposition to Other Pipelines
0900	Heat Content of Delivered Gas (BTU/cf)	1830	Disposition to Storage Operators
1010	Residential Sales	1840	Disposition to Other
1020	Commercial Sales	1900	Total Disposition
1030	Industrial Sales	2000	Unaccounted For
1040	Electric Power Sales	3014	Alternative Fuel Fleet?(1=Yes,0=No)
1050	Vehicle Fuel Sales		
1060	Other Sales
