</table>

### Footnotes:
- (a) Includes lease condensate.
- (b) Crude oil production from U.S. Federal leases in the Gulf of Mexico (GOM).
- (c) Net imports equals gross imports minus gross exports.
- (d) Crude oil adjustment balances supply and consumption and was previously referred to as “Unaccounted for Crude Oil.”
- (e) Renewables and oxygenate production includes pentanes plus, oxygenates (excluding fuel ethanol), and renewable fuels.
- (f) Petroleum products adjustment includes hydrogen/oxygenates/renewables/other hydrocarbons, motor gasoline blend components, and finished motor gasoline.
- (g) "Other Oils" includes aviation gasoline blend components, finished aviation gasoline, kerosene, petrochemical feedstocks, special naphtha, lubricants, waxes, petroleum coke, asphalt and road oil, still gas, and miscellaneous products.

**Notes:** The approximate break between historical and forecast values is shown with historical data printed in bold; estimates and forecasts in italics.

**SPR:** Strategic Petroleum Reserve

**HC: Hydrocarbons**

**Historical data:** Latest data available from Energy Information Administration databases supporting the following reports: Petroleum Supply Monthly, DOE/EIA-0109; Petroleum Supply Annual, DOE/EIA-0340; and Weekly Petroleum Status Report, DOE/EIA-0208.

**Minor discrepancies with published historical data are due to independent rounding.**

**Projections:** EIA Regional Short-Term Energy Model.
