</table>

### Supply (million short tons)
- Production ...........................................
- Appalachia ..........................................
- Interior ...............................................
- Western .............................................
- Primary Inventory Withdrawals .....................
- Imports ..............................................
- Export Power Sector ..................................
- Metallurgical Coal ..................................
- Steam Coal .........................................
- Total Primary Supply ................................

### Consumption (million short tons)
- Coke Plants .........................................
- Electric Power Sector (b) ............................
- Retail and Other Industry ............................
- Residential and Commercial .........................
- Other Industrial ......................................
- Total Consumption ....................................

### End-of-period Inventories (million short tons)
- Primary Inventories (d) .............................
- Secondary Inventories ...............................
- Retail and General Industry .........................
- Coke Plants .........................................
- Commercial & Institutional ..........................

### Coal Market Indicators
- Coal Miner Productivity (Tons per hour) ............
- Total Raw Steel Production (Million short tons per day) ..........................................
- Cost of Coal to Electric Utilities (Dollars per million Btu) ..........................................

### Notes:
- Waste coal includes waste coal and coal slurry reprocessed into briquettes.
- Coal used for electricity generation and (a limited amount of) useful thermal output by electric utilities and independent power producers.
- The discrepancy reflects an unaccounted-for shipper and receiver reporting difference, assumed to be zero in the forecast period.
- Primary stocks are held at the mines and distribution points.
- = no data available.

---

Historical data: Latest data available from Energy Information Administration databases supporting the following reports: Quarterly Coal Report, DOE/EIA-0121; and Electric Power Monthly.

Minor discrepancies with published historical data are due to independent rounding.

Forecasts: EIA Short-Term Integrated Forecasting System.
