**Supply (million short tons)**

- Production
- Appalachia
- Interior
- Western
- Primary Inventory Withdrawals
- Imports
- Exports
- Metallurgical Coal
- Steam Coal
- Total Primary Supply
- Secondary Inventory Withdrawals
- Waste Coal (a)
- Total Supply

**Consumption (million short tons)**

- Coke Plants
- Electric Power Sector (b)
- Retail and General Industry
- Electric Power Sector (b)
- Coke Plants

**End-of-period Inventories (million short tons)**

- Primary Inventories (d)
- Secondary Inventories
- Electric Power Sector
- Retail and General Industry
- Coke Plants

**Coal Market Indicators**

- Coal Miner Productivity (Tons per hour)
- Total Raw Steel Production (Million short tons per day)
- Cost of Coal to Electric Utilities (Dollars per million Btu)

---

(a) Waste coal includes waste coal and coal slurry reprocessed into briquettes.

(b) Coal used for electricity generation and a limited amount of useful thermal output by electric utilities and independent power producers.

(c) The discrepancy reflects an unaccounted-for shipper and receiver reporting difference, assumed to be zero in the forecast period.

(d) Primary stocks are held at the mines and distribution points.

Notes: The approximate break between historical and forecast values is shown with historical data printed in bold; estimates and forecasts in italics.

Historical data: Latest data available from Energy Information Administration databases supporting the following reports: *Quarterly Coal Report*, DOE/EIA-0121; and *Electric Power Monthly*, DOE/EIA-0226.

Minor discrepancies with published historical data are due to independent rounding.

Projections: EIA Regional Short-Term Energy Model.
