Drilling Productivity Report

For key tight oil and shale gas regions

Note:

The DPR rig productivity metric new-well oil/gas production per rig can become unstable during periods of rapid decreases or increases in the number of active rigs and well completions. The metric uses a fixed ratio of estimated total production from new wells divided by the region's monthly rig count, lagged by two months. The metric does not represent new-well oil/natural gas production per newly completed well.

The DPR metric legacy oil/gas production change can become unstable during periods of rapid decreases or increases in the volume of well production curtailments or shut-ins. This effect has been observed during winter weather freeze-offs, extreme flooding events, and the 2020 global oil demand contraction. The DPR methodology involves applying smoothing techniques to most of the data series because of inherent noise in the data.

Year-over-year summary

Drilling Productivity Report

December 2021
drilling data through November
projected production through January

New-well oil production per rig
barrels/day
- January-2021
- January-2022

Legacy oil production change
thousand barrels/day
- January-2021
- January-2022

Indicated monthly change in oil production (Jan vs. Dec)
 thousand barrels/day
- January-2021
- January-2022

Oil production
 thousand barrels/day
- January-2021
- January-2022

New-well gas production per rig
thousand cubic feet/day
- January-2021
- January-2022

Legacy gas production change
million cubic feet/day
- January-2021
- January-2022

Indicated monthly change in gas production (Jan vs. Dec)
 million cubic feet/day
- January-2021
- January-2022

Natural gas production
 million cubic feet/day
- January-2021
- January-2022
Appalachia Region

Oil production

- 0 barrels/day month over month
- New-well oil production per rig
  - 2012: 6,000 barrels/day
  - 2013: 5,000 barrels/day
  - 2014: 4,000 barrels/day
  - 2015: 3,000 barrels/day
  - 2016: 2,000 barrels/day
  - 2017: 1,000 barrels/day
  - 2018: 0 barrels/day

- Legacy oil production change
  - 2012: -5.0 thousand barrels/day
  - 2013: 0.0 thousand barrels/day
  - 2014: 5.0 thousand barrels/day
  - 2015: 10.0 thousand barrels/day

- Indicated change in oil production (Jan vs. Dec)
  - January: +8 thousand barrels/day
  - December: -7 thousand barrels/day
  - January: +1 thousand barrels/day

- Natural gas production
  - 2012: 34,325 MMcf/d
  - 2013: 34,903 MMcf/d

- Indicated change in natural gas production (Jan vs. Dec)
  - January: +1,214 million cubic feet/day
  - December: -1,136 million cubic feet/day
  - January: +78 million cubic feet/day

- New-well gas production per rig
  - 2012: 36,000 thousand cubic feet/day
  - 2013: 24,000 thousand cubic feet/day
  - 2014: 12,000 thousand cubic feet/day
  - 2015: 6,000 thousand cubic feet/day
  - 2016: 0 thousand cubic feet/day

- Legacy gas production change
  - 2012: 0 thousand cubic feet/day
  - 2013: 0 thousand cubic feet/day
  - 2014: 0 thousand cubic feet/day
  - 2015: 0 thousand cubic feet/day

- Indicated change in natural gas production (Jan vs. Dec)
  - January: +1,214 million cubic feet/day
  - December: -1,136 million cubic feet/day
  - January: +78 million cubic feet/day

- New-well gas production per rig
  - 2012: 180 rigs
  - 2013: 150 rigs
  - 2014: 120 rigs
  - 2015: 90 rigs
  - 2016: 60 rigs
  - 2017: 30 rigs
  - 2018: 0 rigs

- Legacy rig count
  - 2012: 188
  - 2013: 188
  - 2014: 188
  - 2015: 188
  - 2016: 188
  - 2017: 188
  - 2018: 188

- Oil +1 thousand barrels/day month over month
- Gas +78 million cubic feet/day month over month

Drilling data through November
Projected production through January
Monthly additions from one average rig

- Oil: 2,363 barrels/day in January, 2,370 barrels/day in December
- Gas: 8,480 thousand cubic feet/day in January, 8,506 thousand cubic feet/day in December

Indicated change in oil production (Jan vs. Dec)
- Oil: +104 thousand barrels/day, -91 thousand barrels/day, +13 thousand barrels/day

Indicated change in natural gas production (Jan vs. Dec)
- Gas: +373 million cubic feet/day, -314 million cubic feet/day, +59 million cubic feet/day

New-well oil production per rig
- Eagle Ford Region
- barrels/day: 2,500
- Rig count: 350

New-well gas production per rig
- Eagle Ford Region
- thousand cubic feet/day: 15,000
- Rig count: 350

Legacy oil production change
- Eagle Ford Region
- thousand barrels/day

Legacy gas production change
- Eagle Ford Region
- million cubic feet/day

Net change
- January: +13 thousand barrels/day
- December: +59 million cubic feet/day

Gas production
- Eagle Ford Region
- million cubic feet/day

Oil production
- Eagle Ford Region
- thousand barrels/day

New-well gas production
- Eagle Ford Region
- thousand cubic feet/day

New-well oil production
- Eagle Ford Region
- barrels/day

Rig count
- Eagle Ford Region
- rigs

Eagle Ford Region drilling data through November
Projected production through January

U.S. Energy Information Administration | Drilling Productivity Report
**Permian Region**

**Drilling Productivity Report**

**U. S. Energy Information Administration**

**December 2021**

**projected production through January**

**Monthly additions from one average rig**

- **January**: 2,269 thousand cubic feet/day
- **December**: 2,281 thousand cubic feet/day

**Oil and Gas Production**

**Permian Region**

- **New-well oil production per rig**
  - barrels/day
  - Rig count

- **New-well gas production per rig**
  - thousand cubic feet/day
  - Rig count

**Legacy oil production change**

- thousand barrels/day

**Indicated change in oil production (Jan vs. Dec)**

- thousand barrels/day

**Indicated change in natural gas production (Jan vs. Dec)**

- million cubic feet/day

**Oil production**

- thousand barrels/day

**Natural gas production**

- million cubic feet/day

**Note:** Drilling data through November, projected production through January.
The Drilling Productivity Report uses recent data on the total number of drilling rigs in operation along with estimates of drilling productivity and estimated changes in production from existing oil and natural gas wells to provide estimated changes in oil\(^1\) and natural gas\(^2\) production for seven key regions. EIA’s approach does not distinguish between oil-directed rigs and gas-directed rigs because once a well is completed it may produce both oil and gas; more than half of the wells do that.

**Monthly additions from one average rig**
Monthly additions from one average rig represent EIA’s estimate of an average rig’s\(^3\) contribution to production of oil and natural gas from new wells.\(^4\) The estimation of new-well production per rig uses several months of recent historical data on total production from new wells for each field divided by the region's monthly rig count, lagged by two months.\(^5\) Current- and next-month values are listed on the top header. The month-over-month change is listed alongside, with +/− signs and color-coded arrows to highlight the growth or decline in oil (brown) or natural gas (blue).

**New-well oil/gas production per rig**
Charts present historical estimated monthly additions from one average rig coupled with the number of total drilling rigs as reported by Baker Hughes.

**Legacy oil and natural gas production change**
Charts present EIA’s estimates of total oil and gas production changes from all the wells other than the new wells. The trend is dominated by the well depletion rates, but other circumstances can influence the direction of the change. For example, well freeze-offs or hurricanes can cause production to significantly decline in any given month, resulting in a production increase the next month when production simply returns to normal levels.

**Projected change in monthly oil/gas production**
Charts present the combined effects of new-well production and changes to legacy production. Total new-well production is offset by the anticipated change in legacy production to derive the net change in production. The estimated change in production does not reflect external circumstances that can affect the actual rates, such as infrastructure constraints, bad weather, or shut-ins based on environmental or economic issues.

**Oil/gas production**
Charts present all oil and natural gas production from both new and legacy wells since 2007. This production is based on all wells reported to the state oil and gas agencies. Where state data are not immediately available, EIA estimates the production based on estimated changes in new-well oil/gas production and the corresponding legacy change.

**Footnotes:**
1. Oil production represents both crude and condensate production from all formations in the region. Production is not limited to tight formations. The regions are defined by all selected counties, which include areas outside of tight oil formations.
2. Gas production represents gross (before processing) gas production from all formations in the region. Production is not limited to shale formations. The regions are defined by all selected counties, which include areas outside of shale formations.
3. The monthly average rig count used in this report is calculated from weekly data on total oil and gas rigs reported by Baker Hughes.
4. A new well is defined as one that began producing for the first time in the previous month. Each well belongs to the new-well category for only one month. Reworked and recompleted wells are excluded from the calculation.
5. Rig count data lag production data because EIA has observed that the best predictor of the number of new wells beginning production in a given month is the count of rigs in operation two months earlier.
The data used in the preparation of this report come from the following sources. EIA is solely responsible for the analysis, calculations, and conclusions.

**Drilling Info** ([http://www.drillinginfo.com](http://www.drillinginfo.com)) Source of production, permit, and spud data for counties associated with this report. Source of real-time rig location to estimate new wells spudded and completed throughout the United States.

**Baker Hughes** ([http://www.bakerhughes.com](http://www.bakerhughes.com)) Source of rig and well counts by county, state, and basin.

**North Dakota Oil and Gas Division** ([https://www.dmr.nd.gov/oilgas](https://www.dmr.nd.gov/oilgas)) Source of well production, permit, and completion data in the counties associated with this report in North Dakota.

**Railroad Commission of Texas** ([http://www.rrc.state.tx.us](http://www.rrc.state.tx.us)) Source of well production, permit, and completion data in the counties associated with this report in Texas.

**Pennsylvania Department of Environmental Protection** ([https://www.paoilandgasreporting.state.pa.us/publicreports/Modules/Welcome/Welcome.aspx](https://www.paoilandgasreporting.state.pa.us/publicreports/Modules/Welcome/Welcome.aspx)) Source of well production, permit, and completion data in the counties associated with this report in Pennsylvania.

**West Virginia Department of Environmental Protection** ([http://www.dep.wv.gov/oil-and-gas/Pages/default.aspx](http://www.dep.wv.gov/oil-and-gas/Pages/default.aspx)) Source of well production, permit, and completion data in the counties associated with this report in West Virginia.

**Colorado Oil and Gas Conservation Commission** ([http://cogcc.state.co.us](http://cogcc.state.co.us)) Source of well production, permit, and completion data in the counties associated with this report in Colorado.

**Wyoming Oil and Conservation Commission** ([http://wogcc.state.wy.us](http://wogcc.state.wy.us)) Source of well production, permit, and completion data in the counties associated with this report in Wyoming.

**Louisiana Department of Natural Resources** ([http://dnr.louisiana.gov](http://dnr.louisiana.gov)) Source of well production, permit, and completion data in the counties associated with this report in Louisiana.

**Ohio Department of Natural Resources** ([http://oilandgas.ohiodnr.gov](http://oilandgas.ohiodnr.gov)) Source of well production, permit, and completion data in the counties associated with this report in Ohio.
