Drilling Productivity Report
For key tight oil and shale gas regions

Note:

The DPR rig productivity metric new-well oil/gas production per rig can become unstable during periods of rapid decreases or increases in the number of active rigs and well completions. The metric uses a fixed ratio of estimated total production from new wells divided by the region's monthly rig count, lagged by two months. The metric does not represent new-well oil/natural gas production per newly completed well.

The DPR metric legacy oil/gas production change can become unstable during periods of rapid decreases or increases in the volume of well production curtailments or shut-ins. This effect has been observed during winter weather freeze-offs, extreme flooding events, and the 2020 global oil demand contraction. The DPR methodology involves applying smoothing techniques to most of the data series because of inherent noise in the data.

U. S. Energy Information Administration | Drilling Productivity Report
**Eagle Ford Region**

**Drilling Productivity Report**

**November**

**New-well oil production per rig**

- November: 1,571 barrels/day
- October: 1,587 barrels/day

**Legacy oil production change**

- November: +119 thousand barrels/day
- October: -101 thousand barrels/day
- Net change: +18 thousand barrels/day

**Indicated change in oil production (Nov vs. Oct)**

- New-well oil production per rig: +18 thousand barrels/day

**Gas production**

- November: 6,133 thousand cubic feet/day
- October: 6,258 thousand cubic feet/day

**Indicated change in natural gas production (Nov vs. Oct)**

- New-well gas production per rig: +466 million cubic feet/day
**Haynesville Region**

**Drilling Productivity Report**

### Oil

**New-well oil production per rig**

- **2022**: 1,600 barrels/day
- **2021**: 2,000 barrels/day
- **2020**: 2,400 barrels/day
- **2019**: 2,800 barrels/day
- **2018**: 3,200 barrels/day
- **2017**: 3,600 barrels/day
- **2016**: 4,000 barrels/day
- **2015**: 4,400 barrels/day
- **2014**: 4,800 barrels/day
- **2013**: 5,200 barrels/day
- **2012**: 5,600 barrels/day

**Legacy oil production change**

- **2022**: (1,200) thousand barrels/day
- **2021**: (800) thousand barrels/day
- **2020**: (400) thousand barrels/day
- **2019**: (200) thousand barrels/day
- **2018**: (100) thousand barrels/day
- **2017**: (50) thousand barrels/day
- **2016**: (10) thousand barrels/day
- **2015**: 0 thousand barrels/day
- **2014**: 100 thousand barrels/day
- **2013**: 200 thousand barrels/day
- **2012**: 300 thousand barrels/day

**Indicated change in oil production (Nov vs. Oct)**

- **2022**: +0 thousand barrels/day
- **2021**: -1 thousand barrels/day
- **2020**: +0 thousand barrels/day
- **2019**: -1 thousand barrels/day
- **2018**: +0 thousand barrels/day
- **2017**: +0 thousand barrels/day
- **2016**: +0 thousand barrels/day
- **2015**: +0 thousand barrels/day
- **2014**: +0 thousand barrels/day
- **2013**: +0 thousand barrels/day
- **2012**: +0 thousand barrels/day

**Oil production**

- **2022**: 28,000 thousand barrels/day
- **2021**: 26,000 thousand barrels/day
- **2020**: 24,000 thousand barrels/day
- **2019**: 22,000 thousand barrels/day
- **2018**: 20,000 thousand barrels/day
- **2017**: 18,000 thousand barrels/day
- **2016**: 16,000 thousand barrels/day
- **2015**: 14,000 thousand barrels/day
- **2014**: 12,000 thousand barrels/day
- **2013**: 10,000 thousand barrels/day
- **2012**: 8,000 thousand barrels/day

### Gas

**New-well gas production per rig**

- **2022**: 1,500 thousand cubic feet/day
- **2021**: 1,200 thousand cubic feet/day
- **2020**: 900 thousand cubic feet/day
- **2019**: 600 thousand cubic feet/day
- **2018**: 300 thousand cubic feet/day
- **2017**: 0 thousand cubic feet/day
- **2016**: 0 thousand cubic feet/day
- **2015**: 0 thousand cubic feet/day
- **2014**: 0 thousand cubic feet/day
- **2013**: 0 thousand cubic feet/day
- **2012**: 0 thousand cubic feet/day

**Legacy gas production change**

- **2022**: +809 million cubic feet/day
- **2021**: -609 million cubic feet/day
- **2020**: +200 million cubic feet/day
- **2019**: 0 million cubic feet/day
- **2018**: 0 million cubic feet/day
- **2017**: 0 million cubic feet/day
- **2016**: 0 million cubic feet/day
- **2015**: 0 million cubic feet/day
- **2014**: 0 million cubic feet/day
- **2013**: 0 million cubic feet/day
- **2012**: 0 million cubic feet/day

**Indicated change in natural gas production (Nov vs. Oct)**

- **2022**: +809 million cubic feet/day
- **2021**: -609 million cubic feet/day
- **2020**: +200 million cubic feet/day
- **2019**: 0 million cubic feet/day
- **2018**: 0 million cubic feet/day
- **2017**: 0 million cubic feet/day
- **2016**: 0 million cubic feet/day
- **2015**: 0 million cubic feet/day
- **2014**: 0 million cubic feet/day
- **2013**: 0 million cubic feet/day
- **2012**: 0 million cubic feet/day

**Natural gas production**

- **2022**: 16,078 million cubic feet/day
- **2021**: 15,878 million cubic feet/day
- **2020**: 15,678 million cubic feet/day
- **2019**: 15,478 million cubic feet/day
- **2018**: 15,278 million cubic feet/day
- **2017**: 15,078 million cubic feet/day
- **2016**: 14,878 million cubic feet/day
- **2015**: 14,678 million cubic feet/day
- **2014**: 14,478 million cubic feet/day
- **2013**: 14,278 million cubic feet/day
- **2012**: 14,078 million cubic feet/day

### Drilling Data

- **Rig count**:
  - **2022**: 140 rigs
  - **2021**: 140 rigs
  - **2020**: 140 rigs
  - **2019**: 140 rigs
  - **2018**: 140 rigs
  - **2017**: 140 rigs
  - **2016**: 140 rigs
  - **2015**: 140 rigs
  - **2014**: 140 rigs
  - **2013**: 140 rigs
  - **2012**: 140 rigs

- **New-well oil production per rig**:
  - **2022**: 2,000 barrels/day
  - **2021**: 1,600 barrels/day
  - **2020**: 1,200 barrels/day
  - **2019**: 800 barrels/day
  - **2018**: 400 barrels/day
  - **2017**: 200 barrels/day
  - **2016**: 100 barrels/day
  - **2015**: 50 barrels/day
  - **2014**: 20 barrels/day
  - **2013**: 10 barrels/day
  - **2012**: 5 barrels/day

- **New-well gas production per rig**:
  - **2022**: 15,000 thousand cubic feet/day
  - **2021**: 12,000 thousand cubic feet/day
  - **2020**: 9,000 thousand cubic feet/day
  - **2019**: 6,000 thousand cubic feet/day
  - **2018**: 3,000 thousand cubic feet/day
  - **2017**: 1,500 thousand cubic feet/day
  - **2016**: 750 thousand cubic feet/day
  - **2015**: 375 thousand cubic feet/day
  - **2014**: 187 thousand cubic feet/day
  - **2013**: 93 thousand cubic feet/day
  - **2012**: 46 thousand cubic feet/day

---

**Projected production through November**

**Oil**

- **2022**: 10,781 thousand barrels/day
- **2021**: 10,835 thousand barrels/day

**Gas**

- **2022**: -54 thousand cubic feet/day
- **2021**: 0 thousand cubic feet/day

---

**Notes**

- Drilling data through September.
- Projected production through November.

U.S. Energy Information Administration | Drilling Productivity Report
The Drilling Productivity Report uses recent data on the total number of drilling rigs in operation along with estimates of drilling productivity and estimated changes in production from existing oil and natural gas wells to provide estimated changes in oil and natural gas production for seven key regions. EIA’s approach does not distinguish between oil-directed rigs and gas-directed rigs because once a well is completed it may produce both oil and gas; more than half of the wells do that.

**Monthly additions from one average rig**
Monthly additions from one average rig represent EIA’s estimate of an average rig’s contribution to production of oil and natural gas from new wells. The estimation of new-well production per rig uses several months of recent historical data on total production from new wells for each field divided by the region’s monthly rig count, lagged by two months. Current- and next-month values are listed on the top header. The month-over-month change is listed alongside, with +/- signs and color-coded arrows to highlight the growth or decline in oil (brown) or natural gas (blue).

**New-well oil/gas production per rig**
Charts present historical estimated monthly additions from one average rig coupled with the number of total drilling rigs as reported by Baker Hughes.

**Legacy oil and natural gas production change**
Charts present EIA’s estimates of total oil and gas production changes from all the wells other than the new wells. The trend is dominated by the well depletion rates, but other circumstances can influence the direction of the change. For example, well freeze-offs or hurricanes can cause production to significantly decline in any given month, resulting in a production increase the next month when production simply returns to normal levels.

**Projected change in monthly oil/gas production**
Charts present the combined effects of new-well production and changes to legacy production. Total new-well production is offset by the anticipated change in legacy production to derive the net change in production. The estimated change in production does not reflect external circumstances that can affect the actual rates, such as infrastructure constraints, bad weather, or shut-ins based on environmental or economic issues.

**Oil/gas production**
Charts present all oil and natural gas production from both new and legacy wells since 2007. This production is based on all wells reported to the state oil and gas agencies. Where state data are not immediately available, EIA estimates the production based on estimated changes in new-well oil/gas production and the corresponding legacy change.

**Footnotes:**
1. Oil production represents both crude and condensate production from all formations in the region. Production is not limited to tight formations. The regions are defined by all selected counties, which include areas outside of tight oil formations.
2. Gas production represents gross (before processing) gas production from all formations in the region. Production is not limited to shale formations. The regions are defined by all selected counties, which include areas outside of shale formations.
3. The monthly average rig count used in this report is calculated from weekly data on total oil and gas rigs reported by Baker Hughes.
4. A new well is defined as one that began producing for the first time in the previous month. Each well belongs to the new-well category for only one month. Reworked and recompleted wells are excluded from the calculation.
5. Rig count data lag production data because EIA has observed that the best predictor of the number of new wells beginning production in a given month is the count of rigs in operation two months earlier.
The data used in the preparation of this report come from the following sources. EIA is solely responsible for the analysis, calculations, and conclusions.

**Drilling Info** (http://www.drillinginfo.com) Source of production, permit, and spud data for counties associated with this report. Source of real-time rig location to estimate new wells spudded and completed throughout the United States.
