Notes:
- Includes those domestic and Customs-cleared foreign crude oil stocks held at refineries and tank farms or in transit thereto, and in pipelines.
- Includes non-U.S. stocks held under foreign or commercial storage agreements.
- Includes stocks located in the "Northeast Heating Oil Reserve", "Northeast Regional Refined Petroleum Product Reserve", and "State of New York's Strategic Fuels Reserve Program." For details see Appendix C.
- Prior to April 10, 2020 this included stocks of propylene held at terminals.
- Includes minor product stock change based on monthly data. See Glossary for further explanation.
- Formerly known as Unaccounted-for Crude Oil. See Glossary for further explanation.
- Formerly known as Natural Gas Liquids Production, prior to June 4, 2010, this included adjustments for fuel ethanol and motor gasoline blending components.
- Includes denaturants (e.g. Pentane Plus) and other renewables (e.g. biodiesel). Prior to June 4, 2010 this included other oxygenates (e.g. ETBE and MTBE).
- Includes finished petroleum products, unfinished oils, gasoline blending components, fuel ethanol, and NGPLs and LRGs.
- Includes as estimate of minor product stock change based on monthly data.
- Includes monthly adjustments for hydrogen and other hydrocarbon production.
- Total Product Supplied = Crude Oil Input to Refineries + Other Supply Production + Net Product Imports + Stock Change + Adjustment.
