— = No consumption.

Where shown, (s) = Less than 0.5.

Notes: · Data are carbon dioxide (CO2) emissions estimates from fossil fuels primary energy consumption, excluding biodiesel and renewable diesel. The state data do not account for interstate flow of electricity and represent CO2 emissions in the state where fossil fuels are

burned to generate electricity, although the electricity might be sold to ultimate customers in other states and sectors. · Totals may not equal sum of components due to independent rounding.
