<sup>a</sup> Due to consumption weighting, the U.S. average residential price is \$22.74 per million Btu and the U.S. average commercial price is \$22.84 per million Btu.  
 — = No consumption.  
 Where shown, (s) = Physical unit value less than 0.5, Btu value less than 0.05, or expenditure value less than

0.05.  
 Note: Totals may not equal sum of components due to independent rounding.  
 Sources: Data sources, estimation procedures, and assumptions are described in the Technical Notes.
