^a State motor gasoline prices are the same for the commercial, industrial, and transportation sectors.

^b Due to consumption weighting, U.S. average commercial price is \$20.48 per million Btu, U.S. average industrial price is \$20.39 per million Btu, U.S. average transportation price is \$20.20 per million Btu, and the U.S. average price of all sectors is \$20.21 per million Btu.

Where shown, (s) = Btu value less than 0.05.

Notes: Motor gasoline estimates include fuel ethanol blended into motor gasoline. · Totals may not equal sum of components due to independent rounding.

Sources: Data sources, estimation procedures, and assumptions are described in the Technical Notes.
