### Notes:
- Includes supplemental gaseous fuels that are commingled with natural gas.
- Hydrocarbon gas liquids, assumed to be propane only.
- Beginning in 1993, includes fuel ethanol blended into motor gasoline. There is a discontinuity in the expenditure series between 2014 and 2015 because of changes in consumption estimates from the source. See Consumption Technical Notes, Section 4.
- Includes small amounts of petroleum coke not shown separately.

### Additional Information:
- For 1981 through 1992, includes fuel ethanol blended into motor gasoline that is not included in the motor gasoline column.
- Hydrocarbon gas liquids, assumed to be propane only.
- Beginning in 1993, includes fuel ethanol blended into motor gasoline. There is a discontinuity in the expenditure series between 2014 and 2015 because of changes in consumption estimates from the source. See Consumption Technical Notes, Section 4.
