Appendix D. Data and Methodology Changes

Tables and data files in the State Energy Data System (SEDS) supply a new year of data each production cycle. The latest data may be preliminary and, therefore, revised the following cycle. Changes made to consumption and price source data for historical years are also regularly incorporated into SEDS.

Listed below are changes in SEDS contents beyond the standard updates.

**Petroleum**

*Distillate fuel oil*

For 2019 forward, SEDS estimates distillate fuel oil prices for the residential sector by applying the annual growth rates of weekly residential heating oil prices from EIA’s *Heating Oil and Propane Update* to the previous year’s estimates.
