### Notes

- **(a)** Includes supplemental gaseous fuels that are commingled with natural gas.
- **(b)** Beginning in 2009, includes biodiesel blended into distillate fuel oil.
- **(c)** Includes hydrocarbon gas liquids, natural gas liquids and refinery off gases.
- **(d)** Through 2004, includes kerosene-type and naphtha-type jet fuel. Beginning in 2005, includes kerosene-type jet fuel only; naphtha-type jet fuel is included in "Other Petroleum".
- **(e)** Includes asphalt and road oil, aviation gasoline, kerosene, lubricants, petroleum coke, and the "other petroleum products" category. See Technical Notes, Section 4.
- **(f)** Includes coal gasification, coal gas, supplementary coal gas, and other sources of gasified or liquidified coal.
- **(g)** Includes natural gas used as a fuel.
- **(h)** For 1981 through 1992, includes fuel ethanol blended into motor gasoline that is not included in the motor gasoline column.
- **(i)** There are no direct fuel costs for hydroelectric, geothermal, solar, or wind energy.
- **(j)** Expenditures for fuels purchased for electric power generation, included in the expenditure columns for the primary energy sources, are shown as negative expenditures because they need to be removed from total energy expenditures, to avoid double-counting.
- **(k)** Includes electricity imports.

### Sources

- Data sources, estimation procedures, and assumptions are described in the Technical Notes.
- Where shown, R = Revised data.
