The data in Table C5 presents residential sector energy consumption estimates for 2018, measured in Trillion Btu, and categorizes the energy by state. The table includes data for states like Massachusetts, Maryland, Louisiana, United States, Nevada, Minnesota, Michigan, Maine, Maryland, Massachusetts, and others. Various energy forms are listed, such as Petroleum, Biomass, Geothermal, Solar, and Electrical Energy, with specific metrics like Distillate Fuel Oil, Kerosene, Wood, and Net Energy. The table notes that data are adjusted for double-counting and includes seasonal variations. Sources for the data are documented at https://www.eia.gov/state/seds/seds-data-complete.php.
