**Trillion Btu**

- **Coal**: Million Short Tons
- **Natural Gas**: Billion Cubic Feet
- **Petroleum**: Million Barrels
- **Biomass**: Million kW
- **Electricity Retail Sales**: Million kWh
- **Net Energy**: Million kWh
- **Electrical System Energy Losses**: Million kWh

### Notes:

- **a** Includes supplemental gaseous fuels that are commingled with natural gas.
- **b** Hydrocarbon gas liquids, include natural gas liquids and refinery off-gases.
- **c** Includes supplemental gaseous fuels that are commingled with natural gas.
- **d** Includes supplemental gaseous fuels that are commingled with natural gas.
- **e** Includes supplemental gaseous fuels that are commingled with natural gas.
- **f** Includes supplemental gaseous fuels that are commingled with natural gas.
- **g** Includes supplemental gaseous fuels that are commingled with natural gas.
- **h** Includes supplemental gaseous fuels that are commingled with natural gas.
- **i** Includes supplemental gaseous fuels that are commingled with natural gas.
- **j** Includes supplemental gaseous fuels that are commingled with natural gas.
- **k** Includes supplemental gaseous fuels that are commingled with natural gas.
- **l** Includes supplemental gaseous fuels that are commingled with natural gas.
- **m** Includes supplemental gaseous fuels that are commingled with natural gas.
- **n** Includes supplemental gaseous fuels that are commingled with natural gas.
- **o** Includes supplemental gaseous fuels that are commingled with natural gas.
- **p** Includes supplemental gaseous fuels that are commingled with natural gas.
- **q** Includes supplemental gaseous fuels that are commingled with natural gas.
- **r** Includes supplemental gaseous fuels that are commingled with natural gas.
- **s** Includes supplemental gaseous fuels that are commingled with natural gas.
- **t** Includes supplemental gaseous fuels that are commingled with natural gas.
- **u** Includes supplemental gaseous fuels that are commingled with natural gas.
- **v** Includes supplemental gaseous fuels that are commingled with natural gas.
- **w** Includes supplemental gaseous fuels that are commingled with natural gas.
- **x** Includes supplemental gaseous fuels that are commingled with natural gas.
- **y** Includes supplemental gaseous fuels that are commingled with natural gas.
- **z** Includes supplemental gaseous fuels that are commingled with natural gas.

### Table CT6. Industrial Sector Energy Consumption Estimates, Selected Years, 1960-2020, Ohio

- **Table CT6. Industrial Sector Energy Consumption Estimates, Selected Years, 1960-2020, Ohio**
- **Conventional hydroelectric power.** For 1960 through 1989, includes pumped-storage hydroelectricity, which cannot be separated identically.
- **Beginning in 1993, includes fuel ethanol blended into motor gasoline. There is a discontinuity in this time series between 2014 and 2015 because of coverage. See Technical Notes, Section 4.**
- **Includes coal and road asphalt, lubricants, petroleum coke, and the "other petroleum products" category. See Technical Notes, Section 4.**
- **Incorporates production and expansion of biodiesel and fuel ethanol.**
- **Includes industrial combined-heat-and-power (CHP) and industrial electricity-only plants.**
- **KWh = Kilowatt-hours.** -- Not applicable. NA = Not available.
- **Where shown, R = Revised data and (s) = Physical unit value less than 0.5 or Btu value less than 0.05.**
- **Notes: Non-basis units and the difference between components due to rounding.**
- **The industrial sector includes industrial combined-heat-and-power (CHP) and industrial electricity-only plants.**
- **The continuity of these data series estimates may be affected by changing data sources and estimation methodologies. See the Technical Notes for each type of energy.**
