

SEDS Data File and Table Variables

Consumption Estimates

The State Energy Data System (SEDS) publishes a complete set of annual state-level energy estimates in PDF and HTML tables on the [SEDS complete](#) website. SEDS also provides the data in various CSV and zip files, including some variables that are not published in the tables. See the [Consumption Technical Notes](#) for the sources and methods used to estimate SEDS energy consumption.

This document describes the SEDS variables (called MSNs) used in each published table and in the data files. See [Section 1](#) of the SEDS Technical Notes for explanation of the five-character MSN code descriptions and the [Codes and Descriptions](#) file for definitions of the published MSN variables.

There are three CSV files that contain estimates for all states and years in cross-tabulation format. [Consumption in Physical Units](#) contains the consumption estimates in physical units for all states, [Consumption in Btu](#) contains the consumption estimates in billion British thermal units (Btu) for all states, and [Thermal conversion factors](#) contains all of the varying conversion factors used to convert data between physical units and Btu for all states and the United States. Zip files are also available for the large data files. In addition, there is a CSV file for each state, named with the two-letter U.S. Postal Code, as well as a file for the United States.

The first record in each file serves as a column heading and contains information about the data in each of the following records. Each data file record that follows begins with the data_status (5 characters, identifying the year of the data cycle plus an “F” that denotes “final”), followed by the state code (2 characters), the MSN code identifier, and the values for the years 1960 through 2019.

Consumption estimates contained in these CSV files are generally rounded to whole numbers. Conversion factors and ratios are usually rounded to a few decimal places. The precision does not necessarily reflect the statistical accuracy of the numbers.

The data files contain additional data series not shown in the report tables that have frequently been requested by customers. For example, the additional data include the individual “Other Petroleum Products” used in the industrial sector, as shown in Appendix B of this documentation.

In addition to the cross-tabulation CSV files, there is a large consolidated data file containing approximately 1.8 million records of the complete set of SEDS production, consumption, price, and expenditure estimates. Users can download the [zip file](#) or the [CSV file](#) for further processing.

The following appendices show the specific data series shown in the SEDS tables and the individual petroleum products included in “Other Petroleum.”

B	Other Petroleum

Contacts:

The State Energy Data System tables were prepared by the Integrated Statistics Team of the Office of Energy Demand & Integrated Statistics, U.S. Energy Information Administration. Questions concerning the contents of the State Energy Data System or these files may be referred to Ryan Repice, (202) 586-5828, or eiainfoUSstates@eia.gov.

Appendix A

The following section lists the SEDS variables in the order they appear in the SEDS consumption tables. Each table column contains one variable.

Appendix B

In the Total Energy, Total End-use, and Industrial Sector tables, “Other Petroleum” includes asphalt and road oil, aviation gasoline, kerosene, lubricants, petroleum coke, and “other petroleum products” as described in Section 4 of the Consumption Technical Notes. Data for the detailed products are available in the CSV file.

The following lists the components of “Other Petroleum,” the fifth character is either “P” for physical units, or “B” for Btu.

Components of P1TC
ARTC
AVTC
KSTC
LUTC
PCTC
OPTC, which includes:
ABIC
COIC
FNIC
FOIC
FSIC
MBIC
MSIC
SGIC
SNIC
UOIC
WXIC

Components of P1TX
ARTX
AVTX
KSTX
LUTX
PCTX
OPTX, which includes:
ABIC
COIC
FNIC
FOIC
FSIC
MBIC
MSIC
SGIC
SNIC
UOIC
WXIC

Components of P1IC
ARIC
KSIC
LUIC
PCIC
OPIC, which includes:
ABIC
COIC
FNIC
FOIC
FSIC

MBIC
MSIC
SGIC
SNIC
UOIC
WXIC
