</tbody>
</table>

### Notes:
- Includes supplemental gaseous fuels that are commingled with natural gas.
- Includes motor gasoline consumption. For 1960 through 1989, includes pumped-storage hydroelectricity, which cannot be separately identified.
- Includes denaturant. Because of differences in data sources and estimation methods, the ratio of fuel ethanol consumption and motor gasoline consumption should not be interpreted as the average ethanol blend rate.
- Includes kerosene-type and naphtha-type jet fuel. Beginning in 2005, includes kerosene-type jet fuel only; naphtha-type jet fuel is included in "Other Petroleum.
- Includes kerosene fuel ethanol blended into motor gasoline.
- Includes gasoline, diesel, and other fuels used in aviation, including jet fuel.
- Includes diesel fuel, jet fuel, aviation gasoline, and other aviation fuels.

### Sources:
- Data sources, estimation procedures, and assumptions are described in the Technical Notes.
- See Technical Notes, Section 4.
