

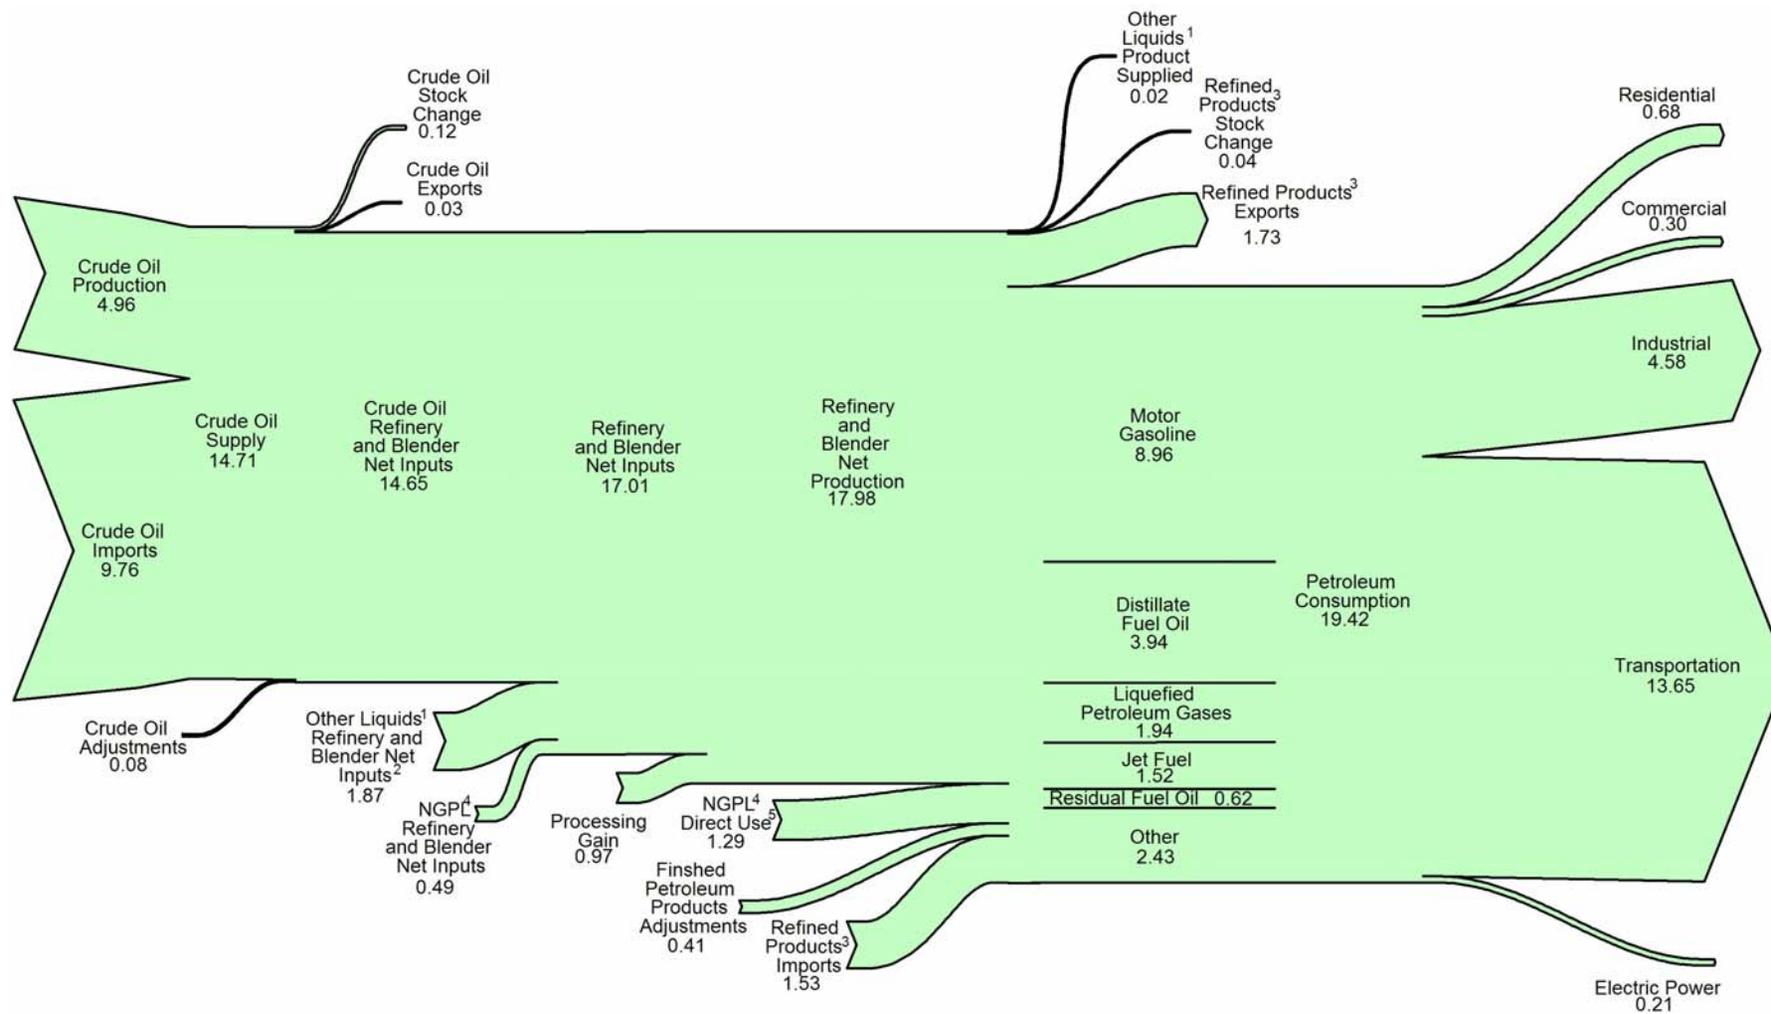

Figure 5.0. Petroleum Flow, 2008
(Million Barrels per Day)

¹ Unfinished oils, other hydrocarbons/hydrogen, and motor gasoline and aviation gasoline blending components.

² Net imports (1.51) and adjustments (0.39) minus stock change (0.04) and product supplied (-0.02).

³ Finished petroleum products, liquefied petroleum gases, and pentanes plus.

⁴ Natural gas plant liquids.

⁵ Production minus refinery input.

Notes: • Data are preliminary. • Values are derived from source data prior to rounding for publication. • Totals may not equal sum of components due to independent rounding.
