U.S. petroleum flow, 2019

million barrels per day

Sources: U.S. Energy Information Administration (EIA), Monthly Energy Review (April 2020), Tables 3.1, 3.2, 3.3b, 3.3e, 3.4, 3.5, 3.7a-3.7c; and EIA, Petroleum Supply Monthly (March 2020).

1 Unfinished oils, hydrogen/oxygenates/renewables/other hydrocarbons, and motor gasoline and aviation gasoline blending components. 2 Renewable fuels and oxygenate plant net production (1.141), net imports (0.947) and adjustments (0.219) minus stock change (0.024) and product supplied (0.049). 3 Finished petroleum products and hydrocarbon gas liquids. 4 Natural gas liquids. 5 Field production (4.813) and renewable fuels and oxygenate plant net production (-0.021) minus refinery and blender net inputs (0.571). 6 Petroleum products supplied. Notes: Data are preliminary. Values are derived from source data prior to rounding for publication. Totals may not equal sum of components due to independent rounding.
