2010	329,248	165,030	185,217	329,608	26,289	75,444	1,049	98,946	355,407	240,257	186,266	428,207

¹ Totals may not equal sum of components due to independent rounding.

² Components are not additive because some generators are included in more than one category.

³ Through 2000, data are for electric utility plants with fossil-fueled steam-electric capacity of 100 megawatts or greater. Beginning in 2001, data are for electric utility and unregulated generating plants (independent power producers, commercial plants, and industrial plants) in operating or standby status, with fossil-fueled steam-electric capacity of 10 megawatts or greater.

NA=Not available. – =No data reported.

Note: See "Cooling Tower," "Flue Gas Desulfurization," and "Particulate Collectors" in Glossary.
