#### Notes:

- **Feedstock\( ^a \)**: Includes biodiesel only; excludes other biofuels. See "Biodiesel" and "Biofuels" in Glossary.
- **Losses and Co-products\( ^b \)**: Total vegetable oil and other biomass inputs to the production of biodiesel—calculated by multiplying biodiesel production by 5.433 million Btu per barrel. See "Biodiesel Feedstock" entry in the "Thermal Conversion Factor Source Documentation" at the end of Appendix A.
- **Biodiesel\( ^d \)**: Derived from the preliminary 2019 stocks value (3,919 thousand barrels), net of 672 thousand barrels (that is shown under "Stocks").
- **Trade**: Derived from the final 2019 stocks value (3,919 thousand barrels), not the final 2019 value for bulk terminals only (672 thousand barrels) that is shown under "Stocks." NA = Not available. – = No data reported. \( ^i \) = Less than 0.5 trillion Btu and greater than -0.5 trillion Btu, or less than 500 barrels and greater than -500 barrels.
- **Other Renewable Fuels\( ^d \)**: Derived from the final 2010 stocks value for bulk terminals, and biodiesel production plants (977 thousand barrels), not the final 2010 value for bulk terminals only (672 thousand barrels) that is shown under "Stocks." NA = Not available. – = No data reported. \( ^i \) = Less than 0.5 trillion Btu and greater than -0.5 trillion Btu, or less than 500 barrels and greater than -500 barrels.

#### Data:

- **Imports**: Includes biodiesel only; excludes other biofuels. See "Biodiesel" and "Biofuels" in Glossary.
- **Exports**: Includes biodiesel only; excludes other biofuels. See "Biodiesel" and "Biofuels" in Glossary.
- **Net Imports\( ^d \)**: see "Biodiesel Feedstock" entry in the "Thermal Conversion Factor Source Documentation" at the end of Appendix A.
- **Stocks\( ^i \)**: See "Biodiesel Feedstock" entry in the "Thermal Conversion Factor Source Documentation" at the end of Appendix A.
- **Stock Change\( ^j \)**: See "Biodiesel Feedstock" entry in the "Thermal Conversion Factor Source Documentation" at the end of Appendix A.
- **Consumption**: See "Biodiesel Feedstock" entry in the "Thermal Conversion Factor Source Documentation" at the end of Appendix A.

- **Feedstock\( ^a \)**: Includes biodiesel only; excludes other biofuels. See "Biodiesel" and "Biofuels" in Glossary.
- **Losses and Co-products\( ^b \)**: Total vegetable oil and other biomass inputs to the production of biodiesel—calculated by multiplying biodiesel production by 5.433 million Btu per barrel. See "Biodiesel Feedstock" entry in the "Thermal Conversion Factor Source Documentation" at the end of Appendix A.
- **Biodiesel\( ^d \)**: Derived from the preliminary 2019 stocks value (3,919 thousand barrels), not the final 2019 value (3,907 thousand barrels) that is shown under "Stocks." NA = Not available. – = No data reported. \( ^i \) = Less than 0.5 trillion Btu and greater than -0.5 trillion Btu, or less than 500 barrels and greater than -500 barrels.
- **Trade**: Derived from the final 2010 stocks value for bulk terminals, and biodiesel production plants (977 thousand barrels), not the final 2010 value for bulk terminals only (672 thousand barrels) that is shown under "Stocks." NA = Not available. – = No data reported. \( ^i \) = Less than 0.5 trillion Btu and greater than -0.5 trillion Btu, or less than 500 barrels and greater than -500 barrels.
