**Notes:**
- **NA:** Not available.
- **-:** No data reported.
- **Mmbt:** thousand barrels. **Mmptal:** million U.S. gallons. **Btu:** billion Btu.
- **Renewable diesel fuel data in thousand barrels are converted to million gallons by multiplying by 0.042, and are converted to Btu by multiplying by 5.494 million Btu per barrel (the approximate heat content of renewable diesel fuel—see Table A1).**
- **Through 2020, production data are from U.S. Environmental Protection Agency.**
- **Beginning in 2021, production data are from EIA.**
