</table>

#### Notes:

- a See "Primary Energy Consumption" in Glossary.
- b Includes non-combustion use of fossil fuels.
- c See Table 10.2b for notes on series components and estimation.
- d Natural gas only; excludes the estimated portion of supplemental gaseous fuels.
- e See Note 3, "Supplemental Gaseous Fuels," at end of Section 4.
- f Does not include biofuels that have been blended with petroleum—biofuels are included in "biomass." includes coal coke net imports, which are not separately displayed. See Table 1.4a and 1.4b.
- g Industries that are classified as "coal" in the primary consumption data are generally also classified as "coal" in the electricity generation data. Includes coal coke net imports, which are not separately displayed. See Table 1.4a and 1.4b.
- h See Table 10.2b for notes on series components and estimation.
- i Electricity retail sales to ultimate customers reported by electric utilities and, beginning in 1996, other energy service providers.
- j Energy consumption data for the energy sector minus the energy content of electricity retail sales. Total losses are allocated to the end-use sectors in proportion to each sector's share of total electricity retail sales. See Note 1, "Electrical System Energy Losses," at end of section.

#### Sources:

- Revised. NA=Not available. –=No data reported. (s)=Less than 0.5 trillion Btu.

#### Notes:

- • Data are estimates, except for coal totals; hydroelectric power in 1949-1978 and 1989 forward; solar; wind; and electricity retail sales.
- • The industrial sector includes industrial combined-heat-and-power (CHP) and industrial electricity-only plants. See Note 2, "Classification of Power Plants Into Energy-Use Sectors," at end of Section 7. See Note 2, "Energy Consumption Data and Surveys," at end of section. Includes coal coke net imports, which are not separately displayed. See Table 1.4a and 1.4b.
- Geographic coverage is the 50 states and the District of Columbia.
