Weekly Petroleum Status Report (WPSR) statistics are undergoing an upgrade to incorporate data for unfinished oils (refinery feedstocks) and natural gas liquids transferred to crude oil supply. Until the WPSR conversion is completed, data for the current two months are not directly comparable to historical data.

Notes:
- Petroleum products are produced in an approximation of petroleum consumption and is synonymous with the term "petroleum consumption" in Tables 3.4 and 3.5. See "Propane/Propane-Coke Produced and Petroleum Consumption," at end of section. • Totals may not equal sum of components due to independent rounding. • Geographic coverage is the 50 states and the District of Columbia.

Sources: See end of section.
