---

¹ Includes natural gas, natural gas plant liquids, and nonhydrocarbon gases; but excludes lease condensate.
² Gross withdrawals minus repressuring, nonhydrocarbon gases removed, and vented and flared. See Note 1, "Natural Gas Production," at end of section.
³ Natural gas plant liquids (NGPL) production, gaseous equivalent. This data series was previously called "Extraction Loss." See Note 2, "Natural Gas Plant Liquids Production," at end of section.
⁴ Marketed production (wet) minus NGPL production.
"See Note 3, "Supplemental Gaseous Fuels," at end of section.
⁶ Net withdrawals from underground storage. For 1980–2017, also includes net storage withdrawals. (See Note 4, "Natural Gas Storage Withdrawals," at end of section.)
⁷ See Note 5, "Natural Gas Balancing Item," at end of section. Beginning in 1980, excludes transit shipments that cross the U.S.-Canada border (i.e., natural gas delivered to its destination by the other country).
⁸ See Note 6, "Natural Gas Consumption," at end of section.
⁹ Through 1979, may include unknown quantities of nonhydrocarbon gases.
⁰ For 1989–1992, a small amount of consumption at independent power producers may be counted in both "Other Industrial" and "Electric Power Sector."
