- **Imports**: Net imports minus exports.
- **T&D Losses**: Transmission and distribution losses.
- **End Use**: Retail sales and direct use.

Notes:
- See Note 1, "Coverage of Electricity Statistics," at end of section.
- See Note 2, "Classification of Power Plants Into Energy-Use Sectors," at end of section.
- See Note 3, "Energy Use of Electricity that is 1) self-generated, 2) produced by either the same entity that consumes the power or an affiliate, and 3) used in direct support of a service or industrial process located within the same facility or group of facilities that house the generating equipment. Direct use is exclusive of station use.

---

Transmission and distribution losses (electricity losses that occur between the point of generation and delivery to the customer). Direct use is exclusive of station use.

In 1996, other energy service providers.

Use of electricity that is 1) self-generated, 2) produced by either the same entity that consumes the power or an affiliate, and 3) used in direct support of a service or industrial process located within the same facility or group of facilities that house the generating equipment. Direct use is exclusive of station use.

Notes:
- See Note 1, "Coverage of Electricity Statistics," at end of section.
- See Note 2, "Classification of Power Plants Into Energy-Use Sectors," at end of section.
- See Note 3, "Energy Use of Electricity that is 1) self-generated, 2) produced by either the same entity that consumes the power or an affiliate, and 3) used in direct support of a service or industrial process located within the same facility or group of facilities that house the generating equipment. Direct use is exclusive of station use.

Geographic coverage is the 50 states and the District of Columbia.

* Use of electricity that is 1) self-generated, 2) produced by either the same entity that consumes the power or an affiliate, and 3) used in direct support of a service or industrial process located within the same facility or group of facilities that house the generating equipment. Direct use is exclusive of station use.
* Transmission and distribution losses (electricity losses that occur between the point of generation and delivery to the customer). See Note 1, "Electrical System Energy Losses," at end of Section 2.
* Data collection frame differs and nonsampling error.
* Retail sales to ultimate customers by electric utilities and, beginning in 1996, other energy service providers.
* Use of electricity that is 1) self-generated, 2) produced by either the same entity that consumes the power or an affiliate, and 3) used in direct support of a service or industrial process located within the same facility or group of facilities that house the generating equipment. Direct use is exclusive of station use.
