</table>

**Notes:**
- A = Anthracite, bituminous coal, subbituminous coal, lignite, waste coal, and coal syrups.
- B = Distillate fuel oil, residual fuel oil, petroleum coke, jet fuel, kerosene, other petroleum, waste oil, and, beginning in 2011, propane.
- C = Natural gas, plus a small amount of supplemental gaseous fuels.
- D = Blast furnace gas, and other manufactured and waste gases derived from fossil fuels. Through 2010, also includes propane gas.
- E = Pumped storage facility project data, used exclusively for pumped storage.
- F = Through 1989, hydroelectric pumped storage data is included in "Conventional Hydroelectric Power." Through 2000, also includes hydroelectric pumped storage used exclusively for pumped storage.
- G = Wood and wood-based fuels.
- H = Municipal solid waste from biogas sources, landfill gas, sludge waste, agricultural byproducts, and, beginning in 2000, other biomass.
- I = Non-renewable waste (municipal solid waste from non-biogenic sources, and tire-derived fuels).
- J = Electricity net generation from solar thermal and photovoltaic (PV) energy at utility-scale facilities. Does not include distributed (small-scale) solar photovoltaic generation.
- K = Includes batteries, chemicals, hydrogen, pig-iron, purchased steam, sulfur, miscellaneous technologies, and, beginning in 2001, non-renewable waste (municipal solid waste from non-biogenic sources, and tire-derived fuels).
- L = Through 1988, all data except hydroelectric are for electric utilities only; hydroelectric data through 1988 include industrial plants as well as electric utilities. Beginning in 1989, data are for electric utilities, independent power producers, commercial plants, and industrial plants.
