Notes:  
E=Estimate.  NA=Not available.  (s)=Less than 0.05%.
• Total of nuclear generating units holding full-power licenses, or equivalent permission to operate, at end of period. See Note 1, "Operable Nuclear Reactors," at end of section.
• At end of period.
• For the definition of "Net Summer Capacity," see Note 2, "Nuclear Capacity," at end of section. Beginning in 2011, monthly capacity values are estimated in two steps: 1) updates and derates reported on Form EIA-860(M) are added to specific months; and 2) the difference between the resulting year-end capacity (from data reported on Form EIA-860(M) and final capacity (reported on Form EIA-860) is allocated to the month of January.
• 2008 Total; and 2) the difference between the resulting year-end capacity (from data and CSV files) for all available annual data beginning in 1957 and monthly data beginning in 1973.
