**Notes:**
- Prices are not adjusted for inflation. See "Nominal Price" in Glossary.
- Prices include Administration, Sales and Transportation. Prices do not include deferral charges, credits, or other adjustments, such as fuel or revenue from purchased power, from previous reporting periods.
- Through 1979, data are for Classes A and B privately owned electric utilities only. (Class B utilities are those with operating revenues of $2.5 million or more; Class B utilities are those with operating revenues between $1 million and $2.5 million.) For 1980–1982, data are for selected Class A utilities whose electric operating revenues were $100 million or more during the previous year. For 1983, data are for a selected sample of electric utilities. Beginning in 1984, data are for a census of electric utilities. Beginning in 1996, data also include energy service providers selling to retail customers. • See Note 7, "Electricity Retail Prices," at end of section for plant coverage, and for information on preliminary and final values.
- Geographic coverage is the 50 states and the District of Columbia.
