### Notes

- **% Prices are not adjusted for inflation. See "Nominal Dollars" in Glossary.**
- **a** Commercial sector, including commercial combined-heat-and-power (CHP) and commercial electricity-only plants. See Note 2, "Classification of Power Plants Into Energy-Use Sectors," at end of Section 7.
- **b** Industrial sector, including industrial combined-heat-and-power (CHP) and industrial electricity-only plants. See Note 2, "Classification of Power Plants Into Energy-Use Sectors," at end of Section 7.
- **c** Residential, commercial, and industrial electricity-only plants. See Note 2, "Classification of Power Plants Into Energy-Use Sectors," at end of Section 7.
- **d** Residential sector, including residential combined-heat-and-power (CHP) and residential electricity-only plants. See Note 2, "Classification of Power Plants Into Energy-Use Sectors," at end of Section 7.
- **e** The electric power sector comprises electricity-only and combined-heat-and-power (CHP) plants within the NAICS 22 category whose primary business is to sell electricity, or electricity and heat, to the public. Through 2001, data are for electric utilities only; beginning in 2002, data also include independent power producers.
- **f** Commercial sector, including commercial combined-heat-and-power (CHP) and commercial electricity-only plants. See Note 2, "Classification of Power Plants Into Energy-Use Sectors," at end of Section 7.
- **g** Residential sector, including residential combined-heat-and-power (CHP) and residential electricity-only plants. See Note 2, "Classification of Power Plants Into Energy-Use Sectors," at end of Section 7.
- **h** Energy-related, independent power producers.
- **i** The percentage of the sector's consumption in Table 4.3 for which price data are available. For details on how the percentages are derived, see Table 9.10 sources at end of section.

### Sources

- Prices are for natural gas, plus a small amount of supplemental gaseous fuels. Prices are intended to include all taxes. See Note 8, "Natural Gas Prices," at end of section.
- Wellhead annual and year-to-date prices are simple averages of the monthly prices; all other annual and year-to-date prices are volume-weighted averages of the monthly prices.
- Geographic coverage is the 50 states and the District of Columbia.
- U.S. Energy Information Administration / Monthly Energy Review May 2018

---

### Notes

- **Note 9.** "Natural Gas Prices," at end of section.
- **Note 10.** "Natural Gas Wellhead Price" in Glossary.
- **Note 11.** "Citygate" in Glossary.
- **Note 12.** Includes taxes.
- **Note 13.** Much of the natural gas delivered for vehicle fuel represents deliveries to fueling stations that are used primarily or exclusively by fleet vehicles. Thus, the prices are often those associated with the cost of gas in the operation of fleet vehicles.
- **Note 14.** Percentages exceed 100% when reported natural gas receipts are greater than reported natural gas consumption—this can occur when combined-heat-and-power plants report fuel receipts related to non-electric generating activities.
- **Note 15.** Revised. NA=Not available. E=Estimate.
