

Table 3. U.S. uranium mills and heap leach facilities by owner, location, capacity, and operating status

Owner	Mill and Heap Leach ¹ Facility name	County, state (existing and planned locations)	Capacity (short tons of ore per day)	Operating status at end of				
				2017	1st quarter 2018	2nd quarter 2018	3rd quarter 2018	4th quarter 2018
Anfield Resources Inc.	Shootaring Canyon Uranium Mill	Garfield, Utah	750	standby	standby	standby	standby	standby
EFR White Mesa LLC	White Mesa Mill	San Juan, Utah	2,000	operating- processing alternate feed	operating- processing alternate feed	operating- processing alternate feed	operating- processing alternate feed	operating- processing alternate feed
Energy Fuels Wyoming Inc	Sheep Mountain	Fremont, Wyoming	725	undeveloped	undeveloped	undeveloped	undeveloped	undeveloped
Kennecott Uranium Company/Wyoming Coal Resource Company	Sweetwater Uranium Project	Sweetwater, Wyoming	3,000	standby	standby	standby	standby	standby
Total Capacity			6,475					

¹ Heap leach solutions: The separation, or dissolving-out from mined rock, of the soluble uranium constituents by the natural action of percolating a prepared chemical solution through mounded (heaped) rock material. The mounded material usually contains low-grade mineralized material and/or waste rock produced from open pit or underground mines. The solutions are collected after percolation is completed and processed to recover the valued components.

- = No data reported

Notes: Capacity for the 4th Quarter of 2018. An operating status of *operating* indicates the mill usually was producing uranium concentrate at the end of the period.
